Meeting Agenda

1. Call to Order/Roll Call
2. Pledge of Allegiance
3. Approval of Minutes
   January 9, 2013 Meeting Minutes
   January 23, 2013 Workshop Meeting Minutes
   Request: Text Amendment to Modify the Commercial Design Standards Relative to Masonry Requirements and to Consider Definition of “Masonry”
5. Public Hearing: Off-Street Parking Standards, Requirements and Definitions - Zoning Code Text Amendment
   (Continued from January 9, 2013, December 5, 2012 & November 7, 2012)
   Request: Text Amendment to Modify Pertinent Parking Standards, Parking Requirements, and Related Definitions
   (Continued from January 9, 2013)
   Request: Text Amendment to Review Requirements for A-Frame, Sandwich Board, and Similar Signs
   (Continued from January 9, 2013)
   Request: Text Amendment to Review Notice Requirements for Public Hearings
8. **Public Hearing: Definitions - Zoning Code Text Amendment**  
   *(Continued from January 9, 2013)*  
   **Request:** Text Amendment to Definition Section to consider Modifying and Adding Certain Definitions Including but Not Limited to “Floor Area, Gross; Lot Coverage, and Development Site

9. **Public Hearing: Health Club or Private Recreation and Firearms Shooting Ranges - Zoning Code Text Amendment**  
   **Request:** Text Amendment to Definition Section to consider Modifying and Adding Certain Definitions Including but Limited to Health Club or Private Recreation and Firearms Shooting Ranges, Consideration of Firearms Shooting Ranges as a Special Use in M-B District Subject to Certain Restrictions, and the Addition or Modification of Off-Street Parking Requirements for Firearms Shooting Ranges, Commercial Recreation Facility, or Other Similar Uses

10. **Public Hearing: Definitions - Zoning Code Text Amendment**  
    **Request:** Text Amendment to Definition Section to consider Modifying and Adding Certain Definitions Including but Not Limited to Banquet Facility, Banquet Hall, Façade, Fence, Semi-Private or Semi-Private Fence, Restaurant and Restaurants, Fast-Food or Carryout

11. **Public Hearing: Accessory Structures - Zoning Code Text Amendment**  
    **Request:** Text Amendment to Permitted Obstructions in Required Yards Section to consider Modifying Regulations Including but Not Limited to Open Balconies, Porches, and Open Patios or Terraces

12. **Public Hearing: Miscellaneous Sections - Zoning Code Text Amendment**  
    **Request:** Text Amendment to Eliminate References to Building Department, Building Commissioner and PC/ZBA

13. **Public Hearing: Compliance Deadlines for Fences - Zoning Code Text Amendment**  
    **Request:** Text Amendment to Consider Modifying or Eliminating Compliance Deadlines Associated with Fence Violations

14. **Public Hearing: Interpretation of Uses - Zoning Code Text Amendment**  
    **Request:** Text Amendment to Correct Section References

15. **Public Hearing: Land Use Requirements - Zoning Code Text Amendment**  
    **Request:** Text Amendment to Consider Massage Therapy as Permitted, Special Use, or Prohibited Use in Certain Zoning Districts

16. **Public Hearing: Appeals of Administrative Order or Zoning Officer - Zoning Code Text Amendment**  
    **Request:** Text Amendment to Consider Modification Concerning the Zoning Board of Appeals as the Final Administrative Determination Body for the Village

17. **Public Hearing: Voting Requirements - Zoning Code Text Amendment**  
    **Request:** Text Amendment to Consider Modifying or Eliminating Voting Deadlines for Plan Commission and Zoning Board of Appeals
18. Public Hearing: Driveway Requirements - Zoning Code Text Amendment  
   Request: Text Amendment to Consider Residential Driveway Requirements

   Request: Text Amendment to Modify Land Use Category Office, Medical (In-Patient Only)

20. Public Hearing: Final Approval Procedure of Planned Unit Development - Zoning Code Text Amendment  
   Request: Text Amendment to Consider Requiring Public Hearing for Final Approval of Planned Unit Developments

   Request: Text Amendment to Organize or Modify References to Glare Reduction Regulations for Signs

22. Other Business: Public Hearing Procedures

23. Next Meeting

24. Public Comment

25. Adjournment
MEETING MINUTES OF THE
PLAN COMMISSION
January 9, 2013
7:00 P.M.

LINCOLNWOOD VILLAGE HALL
COUNCIL CHAMBERS
6900 NORTH LINCOLN

MEMBERS PRESENT:
Chairman Paul Eisterhold
Don Sampen
Patricia Goldfein
George Touras
Don Sampen

MEMBERS ABSENT:
Steve Jakubowski
Mark Yohanna
Sue Auerbach

STAFF PRESENT:
Community Development Manager Aaron N. Cook, AICP
Community Development Coordinator Lauren Wolf
Community Development Intern Andrea Litzhoff

VILLAGE COUNSEL
None.

I. CALL TO ORDER

Chairman Eisterhold noted a quorum of five members present and called the meeting to order at 7:10 p.m.

II. APPROVAL OF MINUTES

Motion to approve the December 5, 2012 Plan Commission minutes was made by Commissioner Touras and Seconded by Commissioner Goldfein. Motion approved 4-0.

Development Manager Cook welcomed the Commissioners to the 2013 New Year. Next month will have even more Zoning Code clean-up with Text Amendments. A legal notice went out for a Text Amendment to review Shooting Ranges in the B-2 District. This will be re-published and will be heard at the February 6, 2013 Plan Commission Meeting.

Request: Text Amendment to Modify the Commercial Design Standards Relative to Masonry Requirements and to Consider Definition of “Masonry”

Chairman Eisterhold started the public hearing by opening all agenda items to discuss at Commission leisure.
January 9, 2013

Development Manager Cook stated that the last meeting the Commission discussed and arrived at general consensus for some of the Commercial masonry requirements. Commissioner Auerbach wrote an email stating she did not want to allow CMU in the allowed materials and it should be banned. She went by the buildings at the town center outlots and they were brick, not CMU. Commissioners Goldfein and Sampen agreed.

Development Manager went over the permitted high quality materials to include:
* Split Face Brick Greater than .5 inches in thickness
* Natural Stone
* Pre-Cast Decorative Stone
* Decorative Concrete Block

Chairman Eisterhold noted that in the text of what was given suggests “a building facing a public street and shall be compatible with the character and scale of the surrounding area”. This is too loosely written. Development Manager Cook stated that anytime there is an effort to bring in loose language a scale or a relationship from one property to a surrounding area can potentially create conflicts. It is there for a new development to not be out of place and scale. In the scenario the existing building could establish the scale of the area and this requirement is meaning build to that.

Chairman Eisterhold questioned what if the adjacent buildings are brick fronts, does that mean the building next door should have a brick front. Development Manager stated in absolute terms, not sure this standard would apply.

Commissioner Touras noted that it is narrowed and defined. Development Manager Cook stated that is for new developments.

Commissioner Goldfein stated that this standard helps because it gives the Village something to fall back on if a new development were to be submitted and doesn’t fit into the existing aesthetic. The material is a component of the design standard.

Chairman Eisterhold questioned if there should be a minimum height for the windows. Commissioner Sampen agreed. Development Manager Cook explained if the top of the windows are at six feet, and we require the high quality material to extend from the ground level minimally to the top of the windows, they are not going to be able to meet the 75% standard. The 75% is the standard and you must meet that. The emphasis must be minimally from ground level to the top of the first story windows. Commissioner Sampen explained that it should be written, “In addition, to the required high quality materials shall at a minimum extend from a ground level to the top of the first floor windows with minor accents allowed”.

Chairman Eisterhold would like Staff to make a final draft and look over at the next meeting. Chairman asked if anyone in the audience wanted to speak. There was none. Commissioner Sampen made a motion to continue to February 6, 2013 meeting. Seconded by Commissioner Touras. Motion carried 4-0.
IV. PUBLIC HEARING: Off-Street Parking Standards, Requirements and Definitions – Zoning Code Text Amendment

Request: Text Amendment to Modify Pertinent Parking Standards, Parking Requirements, and Related Definitions (Continued from December 5, 2012 and November 7, 2012)

Development Manager Cook explained that this matter stemmed from an on-going review of the Village’s parking standards. More specifically, restaurant off-street parking. During that discussion, it was discussed that how we determine the number of parking may be different from what other communities do. Staff researched other communities for the purposes of off-street parking. If a restaurant is 1,000 square feet including all gross area, parking can be done with all 1,000 square feet or some may cut out storage, bathrooms, and hallways in definitions of floor area. Need to provide a minimum off-street parking that will serve that business. On average, how many spaces are needed for the number of square feet. Staff found that other communities include less floor area for off-street parking than Lincolnwood does. Staff recommends excluding from floor area definition for off-street parking:

1. Restrooms
2. Storage Areas
3. Hallways
4. Stairways
5. Elevator Shafts
6. Equipment Areas
7. Food Preparation Areas

After Commission discussion they wanted to exclude: restrooms, hallways, stairways, and elevator shafts from Floor Area for the purposes of off-street parking for Restaurants.

Commissioner Touras wanted to see more samples of other communities like Lincolnwood such as Glenview, Park Ridge and Wilmette.

Chairman Eisterhold asked if anyone in the audience would like to speak on this matter. There was none. Commissioner Goldfein made a motion to continue to February 6, 2013 meeting. Seconded by Commissioner Sampen. Motion carries 4-0.

V. PUBLIC HEARING: Parking Requirements – Zoning Code Text Amendment

Request: Text Amendment to Review Permitted Location for Off-Street Parking and Review of Related Definitions (Continued from December 5, 2012)

Development Manager Cook explained for off-street parking regulations that in yards open air, off-street parking spaces, may be located in any yard except a front yard and a side yard abutting a street, subject however to the provisions within. This is a standard that the vast majority of commercial properties in town have parking between the building and the street they are fronting on. Interestingly enough his was referred to the Commission because of a residential application. A resident sought a variation due to converting an attached garage into living space. The resident desired to keep the
January 9, 2013

driveway for the purposes of parking. That driveway no longer led to an approved parking space and that driveway then was converted to a parking space. The code says you cannot have parking in the front yard. The resident sought a variation and the Zoning Board of Appeals recommended denial. The Village Board sought the Plan Commission to seek a review of this code section.

Commissioner Sampen noted that he is not in favor of changing the requirement. Commissioner Goldfein stated there is nothing wrong with the requirement as written.

Chairman Eisterhold asked if anyone in the audience wanted to speak on this matter. There was none. Commissioner Goldfein made a motion of no change to the existing Ordinance. Seconded by Commissioner Touras. Motion carried 4-0 Aye.

VI. PUBLIC HEARING: Principal Structure Front Yard Setback Requirement – Zoning Code Text Amendment Request: Text Amendment to Relocate Regulation for Average Front Yard Setback to Section IV of Zoning Ordinance

Development Manager introduced Community Development Department Intern Andrea Litzhoff. Ms. Litzhoff explained that it makes sense to move Article III Section 3.09.3 to Article IV Sections 4.11 and 4.12. Also, need to change from Residential District to All Districts. It should be in regulating bulk standards and setback requirements for principal structures.

Chairman Eisterhold questioned if anyone in the audience wanted to speak on this matter. There was none. Motion made by Commissioner Goldfein to make suggested change as presented by Staff. Seconded by Commissioner Sampen. Motion carried 4-0 Aye.

VII. PUBLIC HEARING: Land Use Requirements – Zoning Code Text Amendment Request: Text Amendment to Correct Footnote References of the Land Use Table

Development Manager explained a Text Amendment as proposed to correct erroneous additional standard references for Townhouse, Multi-Family Dwelling and Residential Units above first floor commercial. Those section references are incorrect. The Text Amendment is not to change the classification or standards, it is to correct the incorrect references from the non-existent 4.07(2)12 to 4.07(12).

Chairman Eisterhold asked if anyone in the audience wanted to speak on this matter. There was none. Commissioner Sampen made a motion to make the change for the correct section reference. Seconded by Commissioner Goldfein. Motion carried 4-0 Aye.

VIII. PUBLIC HEARING: Additional Standards for Lincoln Avenue Corridor – Zoning Code Text Amendment Request: Text Amendment to Correct Section References
January 9, 2013

Ms. Litzhoff explained this Text Amendment is to eliminate unnecessary wording. The Code states that Additional Standards for the Lincoln Avenue Corridor. Properties within the Lincoln Avenue Overlay District are subject to additional standards as stated in Article VIII, Parts B and D of this Zoning Ordinance. There is no part D.

Chairman Eisterhold asked if there was anyone in the audience who wanted to comment. There was none. Motion to make the necessary correction and eliminate Part D made by Commissioner Touras and seconded by Commissioner Goldfein. Motion approved 4-0 Aye.

IX. PUBLIC HEARING: Residential Corner Side Yard Setback Requirement – Zoning Code Text Amendment
Request: Text Amendment to Add Corner Side Yard Setback in R4 District

Development Manager Cook stated currently there is no regulation for requirement for corner side yard setback in R4 district. It is 10 feet in the R1-R3 zoning districts. The prior Zoning Code doesn’t have any requirements for corner side yard setback in R4. Staff recommends a 10 foot corner side yard setback consistent with other R1-R3 districts. Staff believes that not including R4 was an omission.

Chairman Eisterhold asked if there was anyone in the audience who wanted to comment. There was none. Motion to amend to add corner side yard setback to 10 fee in the R4 district made by Commissioner Sampen and Seconded by Commissioner Touras. Motion approved 4-0 Aye.

X. PUBLIC HEARING: Wall Sign Requirements- Zoning Code Text Amendment
Request: Text Amendment to Requirements of Number of Wall Signs

Development Manager Cook explained Article XI of the Zoning Code regulates signage within the community. The sign regulations were at one time a stand-alone ordinance however, in 2009 the previously separate Sign Ordinance was incorporated into the Zoning Code as Article XI. Section 11.04 regulates permitted on premises signs which includes requirements for maximum number of wall signs. Section 11.04(2)i also contains certain exceptions which allows for additional wall signs. One of the exceptions reads: The Zoning Officer may authorize one wall sign on walls not facing a street, provided the wall is adjacent to nonresidential property and is visible from the street. The exception staff believes is intended to permit signs in the “back of the house” in which is not visible from residential properties that is not visible from the street. Under these conditions, such a sign would not be considered to add to sign clutter as a result allowed. Staff believes that the specific wording should be changed to not visible from the street.

Chairman Eisterhold asked if there was anyone in the audience that wanted to comment. There was none. Motion to clarify certain exception to the maximum number of wall signs made by Commissioner Touras and Seconded by Commissioner Sampen. Motion approved 4-0 Aye.
XI. PUBLIC HEARING: Sign Requirements – Zoning Code Text Amendment
Request: Text Amendment to Review Requirements for A-Frame, Sandwich Board, and Similar Signs

Chairman Eisterhold asked Staff to have other Communities regulations submitted relative to these type of sign regulations. Asked if anyone in the audience wanted to speak on this matter. There was none. Commissioner Goldfein motioned to continue to February 6, 2013 and Seconded by Commissioner Sampen. Motion approved 4-0 Aye.

XII. PUBLIC HEARING: Notice Requirements- Zoning Code Text Amendment
Request: Text Amendment to Review Notice Requirements for Public Hearings

Chairman Eisterhold asked Staff to have other Communities regulations submitted relative to public hearing requirements. Asked if anyone in the audience wanted to speak on this matter. There was none. Commissioner Sampen motioned to continue to February 6, 2013 and Seconded by Commissioner Touras. Motion approved 4-0 Aye.

XIII. PUBLIC HEARING: Definitions – Zoning Code Text Amendment
Request: Text Amendment to Definition Section to consider Modifying and Adding Certain Definitions Including but Not Limited to “Floor Area Gross; Lot Coverage, and Development Site”

Chairman Eisterhold questioned if anyone in the audience wanted to comment on this matter. There was none. Motion to continue to February 6, 2013 made by Commissioner Goldfein and Seconded by Commissioner Touras. Motion approved 4-0 Aye.

XIV. OTHER BUSINESS:
Public Hearing Procedures will discuss at a future meeting.
On January 23, 2013 there will be a workshop to discuss the Purple Hotel Site.

XV. PUBLIC COMMENT: None.

XVI. ADJOURNMENT:
The next Plan Commission meeting is a scheduled workshop for January 23, 2013 at 7:00 PM. The next Plan Commission public hearing will be held on February 6, 2013. Hearing no further business, Motion to adjourn made by Commissioner Goldfein. Seconded by Commissioner Touras. Motion approved unanimously 4-0. Meeting adjourned at 9:45 PM.

Respectfully submitted,

Lauren Wolf
Community Development Department Coordinator

I. CALL TO ORDER

Chairman Eisterhold noted a quorum of five members present and called the meeting to order at 7:05 p.m.
II. Workshop: Planned Unit Development Conceptual Plan Review: Purple Hotel
4500 West Touhy Avenue
Description: Proposal by North Capital Group to Redevelop the Purple Hotel and Review of Proposed Site Plan

Chairman Eisterhold welcomed all to the Plan Commission Workshop. His opening statement: I believe it has been a number of years since this community and commission has processed a full Planned Unit Development Request. I don’t remember Lowe’s to be a PUD, it was probably Dominick’s and Outlot site at the east end of the old Bell and Howell property and before that was probably the Lincolnwood Town Center on the north end of the original Bell and Howell site. Beyond that we had an amendment to the shopping center PUD for 2 outlot developments about a year and a half ago.

There is no good, better or best way to proceed through this workshop element before we actually proceed with the opening of the Public Hearing process for the petition to redevelop what is affectionately referred to as the Purple Hotel Site.

Tonight is a workshop and this step hopefully will be very informative for the Plan Commission so to get a feel for the site and components of the proposed project. As well for the Petitioner, so to gather insight into our concerns as community representatives within the structure of our code and our duty to conduct the required public hearing process. Likewise, the village staff will be able to further vet the project components conformance with our municipal code. Importantly, tonight begins the public awareness for our community residents some in attendance here tonight and those viewing us on the cable feed of what is being proposed for the redevelopment of the site at the northwest corner of Touhy and Lincoln Avenues.

I remind everyone that this commission will eventually hold a Public Hearing to review the petition with its Plan Commission hat on and will also wear the hat normally worn by the Zoning Board of Appeals. This petition for a PUD puts the petitioner before us and affords the petitioner and the public a unified meeting, saving both the time by avoiding multiple meetings at different bodies and repetition of testimony and possible conflicting opinions or direction being recommended. However, that being said, as we proceed through the process the Economic Development Commission may or may not meet with the petitioner relative to issues germane to their responsibilities. That meeting might well have some relevant suggestions for us to consider in our deliberations for the PUD. Do keep in mind that our eventual recommendation will go to the Village Board for their action. We are responsible to conduct the Public Hearing and to make a recommendation.

While we do have some public here tonight, and their possible comments would normally be accepted at the Public Hearing. We will entertain their comments tonight with some limited time afforded to that towards the end of this workshop. I do ask that they consider expressing questions or suggestions relative to the redevelopment being proposed, if your matter has not been addressed or not deferred to a future meeting. You might ask “why at the end”? The petitioner is here to start what maybe a lengthy explanation of their proposal and many times those questions are answered and
Plan Commission Workshop

January 23, 2013

suggestions addressed in the course of vetting during our workshop and subsequent hearing testimony. So if you still wish to address us later on, with all due respect, do realize that you might get an answer: a mention to take it under consideration: or even a comment that the matter is already planned to be addressed at a subsequent meeting in greater detail. But, we and the petitioner do want to have the benefit of the public’s expertise and concerns that might still wish to be said towards the end of the evening.

Anyone here or at home can submit in writing to Mr. Clarke or Mr. Cook within the next three weeks any item of interest. Those will be shared with the petitioner or incorporated in the staff’s comments as we proceed through the meetings germane.

I do strongly request that if you are thinking about “beating the drum” or “waving the flag” in favor or in opposition to the petition overall we request that you hold those for the Public Hearing dates and to not express them here tonight as this is not the forum for that.

Depending on how far we get tonight and what the petitioner, the commission or the staff desire to further vet the information before the Public Hearing process…there may be further workshops to refine the PUD Plan for the redevelopment of the site. Generally it is much easier to work in this workshop format than to try and do so in the Public Hearing format.

A large portion of what everyone might hear and see tonight will need to be repeated in the Public Hearing process. Some will be omitted because of the vetting process and some information no longer being relevant and some info being further expanded upon.

Tonight we will see that a fair number of the components of the PUD Plan are still sketchy or lack specifics and are not yet available to us. We on the Commission understand that together we need to get past some components and solidify our concerns with our review and suggestions: then the petitioner can focus in efficiently and hammer out those PUD PLAN requirement components becoming more definitive….a good example being the Landscape Plan and the onsite Traffic Plan.

Lastly, it is easy to get lost by jumping around amongst the different plan components. So let’s try and follow the staff report memorandum the “Boldly Printed” categories. As the petitioner has a lot to convey…Please try and hold questions and comments whenever possible till we get to the end of each section and later and the conclusion, if we still have others or missed items.

Let’s try and be definitive as we can, so that the petitioner is not directed in drastically different directions, with each morning, unless we are all trying to consider options.

Mr. Francke stated some changes have already been made to the preliminary site plan. Foresee many modifications to the plan before approved. The vision from the start is to restore and maintain the property. Fundamentally, today want to discuss the unique vision
January 23, 2013

Mr. Weiss has to restore this historic property. When the comprehensive plan was made in 2005, that was a different world.

Weiss Properties showed a brief video for the future of the site.

Mr. Brantly is the Senior Project Manager for the project. This is more than just renovating and re-opening of the hotel. Millions of dollars have already been poured into this property. Plan is for a retro-themed 1960’s décor taken from the original hotel and updated with a modern design. All must understand that this is a multi-phased project. The focal point is the hotel and will grow organically around the site. There are placeholders for future outlot retail development.

Nick Patera showed and discussed the current changes to the site plan.

Development Manager Cook began with a power point discussion highlighting key elements each department had discussed during the developmental team review process with staff. The main areas for concern are the parking lot, the layout and the number of parking spots.

Commissioner Sampen questioned the future retail outlets.
Mr. Francke stated that the hotel is phase one. Need to figure out what to do with the hotel first. Then the next phases will be considered.

Mr. Francke notified the Commission that they do not have an anchor or flag. Have been in discussions with many different hotels. It could even end up being an independent boutique hotel.

The Commission stressed concerns with the site plan, landscaping, pedestrian circulation, and traffic flow.

Weiss Properties did express that they are in preliminary negotiations to receive a lease agreement with Common Wealth Edison to rent the property for parking.

Mr. Panera from Teaks stated that the existing trees on Touhy and Lincoln frontage are Village trees. There is no intent to harm them, only want to follow the streetscape and work as a frame.

Mr. Brantly explained that there will be four access drives and three will be main drives. They are proposing 33,000 square feet in retail space, however, that will be phase two.

Commissioner Touras explained that he will be a tough sell. Concerned that this is a once in a generation opportunity to do something great with the site. After all, this is a PUD, a tough sell to just remodel.

Commissioner Goldfein stated that she is impressed. There is a chance to preserve the property.
January 23, 2013

Commissioner Auerbach stated she had concerns about traffic. To come up with a use that works and keep low traffic counts will draw people back to Lincolnwood. Would like to see it back. In favor of the project, looks good and likes adding a traffic light on Chase and Lincoln Avenues.

Chairman Eisterhold stated a few years ago in favor of the demolition of the Purple Hotel. Mr. Weiss’s vision has impressed him. This was a difficult and unsightly facility and was ill-managed.

Commissioner Jakubowski noted have to accommodate the parking.

Mr. Gamble complimented the new changes to the site plan, still desire more landscaping.

XV. PUBLIC COMMENT: None.

XVI. ADOURNMENT:
The next Plan Commission meeting workshop is scheduled for February 20, 2013 at 7:00 PM. The next Plan Commission Public Hearing will be held on February 6, 2013 at 7:00 PM. Hearing no further business, Motion to adjourn made by Commissioner Auerbach. Seconded by Commissioner Goldfein. Motion approved unanimously 5-0. Meeting adjourned at 10:03 PM.

Respectfully submitted,

Lauren Wolf
Community Development Department Coordinator
Subject Property: N/A (Text Amendment)

Zoning District: Requested action is applicable to B1, B2, B3, O, PUD & MB Districts.

Requested Action: Text Amendment to Article II Section 2.02 to consider a definition of “Masonry”. A Text Amendment to Article VI Section 6.04 to consider amendments to Commercial, Institutional and Civic Building Design Standards, and Text Amendment to Article VIII Section 8.17 relative to Building Materials.

Nature of Request: A text amendment is proposed to the Zoning Code to modify the design requirements for non-residential buildings.

Petitioner: Village Board

Summary
At the January 9, 2013 meeting, the Plan Commission continued deliberation of the non-residential design standards. The discussion revolved around the Village’s requirements for use of masonry and high quality materials.

Once primary point of discussion is whether split face block should be considered a high quality material, i.e. and acceptable material. Staff has provided an article from the Chicago Tribune which identifies split face block as a potentially problematic material if the installation is done incorrectly or poorly. Also included is a Google image search of split face block which provides examples of the appearance of the material as well as examples of the different uses of split face block.

From that meeting there were several changes to the language staff presented on the five main items of discussion. For clarity, staff has incorporated those changes into the language that was presented to the Plan Commission at their January 9, 2013 meeting. The changes suggested by the Plan Commission at their January 9, 2013 meeting are identified in **red bold and double-underline** and deletions are struck through.
1. Requirements of Lincoln Avenue Overlay and Remainder of Village
The Plan Commission concluded that there should be one uniform set of standards should apply to all Commercial, Institutional and Civic Buildings in Lincolnwood. As a result, the Plan Commission should recommend a text amendment to eliminate from Section 8.17 the requirement that within the Lincoln Avenue Overlay District, “Buildings shall be constructed of masonry only.” By eliminating this section, all Commercial, Institutional, and Civic Buildings in Lincolnwood will be held to the same standard as found in Section 6.04(3).

2. Calculating Commercial, Institutional and Civic Building Design Standards
The Plan Commission discussed the Zoning Code requirement for all commercial structures to be constructed with a “predominance” of high quality materials. The Commission generally concurred that the section is unclear and could be clarified. Therefore, below is the recommended text amendment to Section 6.04(3) to provide the desired clarification (new language in italics and deleted language in strikethrough):

“All commercial, institutional and civic buildings shall consist of solid and durable facades on all sides of a building facing a public street and shall be compatible with the character and scale of the surrounding area.

- Each exterior building elevation facade shall incorporate a predominance a minimum of 75% of high quality materials that may include, but are not limited to:
  - brick minimum thickness of 2.25 inches,
  - split faced brick greater than .5 inches in thickness,
  - natural stone,
  - sandstone,
  - other native stone,
  - pre-cast decorative stone, or
  - glass,
  - sealed and coated concrete masonry unit (CMU), and
  - decorative concrete block.

- In addition to the required high quality materials Brick, sandstone or other native stone shall at a minimum extend from ground level to the top of the first floor windows with minor accents allowed in place of the predominant material.”

3. Acceptable High Quality Materials/Masonry
Section 6.04(3) provides examples of what are considered high quality materials. The Plan Commission deliberated what materials qualify as high quality materials. Incorporated into the modified section above is the list of materials identified by the Plan Commission. The new materials that have been included are:

- Split face brick greater than .5 inches in thickness
- Natural Stone
- Pre-cast decorative stone
Sealed and coated concrete masonry unit (CMU)
- Decorative Concrete Block

4. Definition of High Quality Materials
The Plan Commission generally concurred with the definitions as presented at the December 5, 2012 meeting. These definitions are included below.

Masonry materials shall mean and include that form of construction defined below and composed of clay brick, stone, decorative concrete block, rock or other materials of equal characteristics laid up unit by unit set in mortar.

Brick – Includes kiln fired clay or shale brick manufactured to ASTM C216 or C652, Grade SW, can include concrete brick if the coloration is integral, shall not be painted, and is manufactured to ASTM C1634; minimum thickness of two and one quarter inches when applied as a veneer, and shall not include underfired clay or shale brick. Brick also includes split face brick with a minimum thickness of .5 inches.

Stone – Includes naturally occurring granite, marble, limestone, slate, river rock, sandstone, other native stone and other similar hard and durable all weather stone that is customarily used in exterior building construction; may also include cast, pre-cast decorative or manufactured stone product, provided that such product yields a highly textured stone-like appearance, its coloration is integral to the masonry material and shall not be painted on, and it is demonstrated to be highly durable and maintenance free; natural or manmade stone shall have a minimum thickness of two and five eighths inches when applied as a veneer.

Decorative Concrete Block – Includes highly textured finish, such as split-faced, indented, hammered, fluted, ribbed or similar architectural finish; coloration shall be integral to the masonry material; minimum thickness of three and five eighths inches when applied as a veneer. shall include light weight and featherweight concrete block or cinder block units.

5. Unacceptable Materials
Section 6.04(4) of the Zoning Ordinance provides a list of materials that are permitted as minor accents. Staff seeks a discussion on this section (found below) and if this section can be strengthened or clarified to include additional materials that are not desirable.

Section 6.04(4)
“The use of concrete block, split face block, pre-cast panels, and/or masonry stucco is permitted as a minor or accent building material, but is strongly discouraged for use as a predominant building material. The exterior surface of a masonry wall shall consist of a textured finished surface, shall not have a flat surface, and shall not be constructed of concrete block or cinder block having a plain, flat surface. The use of Exterior Insulation Finishing Systems ("EIFS") and metal and vinyl lap hoard siding is prohibited.”

Home inspection 101: Check for split-face block construction

February 21, 2011 | By Mary Ellen Podmolik | The Home Front

John Sullivan, a 27-year-old renter in Chicago's Wicker Park neighborhood, hopes the third time is the charm.

Twice in the past three months Sullivan has put in offers on condos in his neighborhood, but after receiving the results of a property inspection broke the contracts. The culprit both times? Potential water damage problems tied to split-face block construction.

Building Sinking?
Walls Bowing? BBB A+ Rating Foundation Repair Experts 30 years
www.atlasrestoration.com

Problems with improperly treated or maintained split-face concrete blocks aren't anything new. Some home inspectors have been railing against the use of the construction material in Chicago's small condo buildings for a decade.

But keeping the concrete sealed and water repellent might be a project that falls by the wayside at a time when the number of bank-owned foreclosures is on the rise, other units are occupied by renters rather than by owners, and many condo associations have dwindling reserves.

"Now, five, six, seven, eight years after it's been built, we're starting to see the effects of bad construction," said Dan Pape, a principal at Hudson Parker Realty & Finance Group.

It's a Chicago thing
July 13, 2003

May 15, 2007

Construction materials worth $444 were reported stolen...
in Chicago. "Usually it's a 50-50 chance (of a problem). Unfortunately, it's that high."

Sullivan didn't know much about concrete block, but the home inspector on the first property gave him a few articles to read. He did some research, including talking to a colleague who had trouble selling his condo because of its split-face block construction. Five days before closing, Sullivan got a second inspection, and the results sealed his decision to not proceed with the closing.

At the second condo where he had a contract, the home inspector didn't even have to look inside to be able to tell there were potential problems.

Kurt Mitenbuler, who operates an eponymously named home inspection firm in Evanston, is among those inspectors who have been warning about split-face block for years.

"Some of them seem to work OK for reasons that we're still trying to figure out," he said. "I'm not saying don't buy it, but we need to look deeper."

The more education a buyer has about a property, the better, said Mary Ellen Considine, an agent at Keller Williams Realty in Chicago.

"Buyers are driven by their emotion, not their logic," she said. "This is the biggest investment you're going to make."

Buyers also should also check into the reserves of a condo building's homeowners association to determine the level of financial reserves for building repairs.

As for sellers, Chicago home inspector Steve Hier, of Miller-Hier Enterprises, recommends they know what maintenance has been done on their building and be able to show proof of it because potential buyers are getting more savvy.

Quotes on Home Inspection

"Before, people were a little less concerned because the appreciation on these things was 20 percent a year, and they were selling (the unit) in two years, and it didn't matter," Hier said. "These were starter homes for people. That's not the case anymore."

Sullivan has since found a brick duplex in Lincoln Park. He's awaiting the results of the property inspection and, tentatively, is closing on the unit in mid-March.

Winning projects: LISC/Chicago recently recognized community developments, businesses and city leaders that improved Chicago, and two residential projects made the cut in the 17th Annual Chicago Neighborhood Development Awards.

One was the transformation of Hollywood House, a 13-story, 197-unit apartment building for seniors in Edgewater that was purchased by Heartland Housing Inc. with the help of the Illinois Affordable Housing Tax Credit program. The building wasn't emptied while renovations and repairs were performed, 90 percent of the apartments were preserved as affordable housing, and 127 of them are for seniors who earn 60 percent or less of the Chicago median income.

Heartland received the $15,000 Polk Bros. Foundation Affordable Rental Housing Preservation Award.

The other, winning the award for an outstanding for-profit neighborhood project, was Holsten Real Estate Development Corp. for its development of Wilson Yard in Uptown on the site of a former CTA rail yard. The project was many years in the making and controversial because it included 178 affordable, rather than market-rate, rental units, and Target and Aldi stores.

The first residents began moving in nearly a year ago, and it is now 100 percent leased.

mepodmolik@tribune.com
refuse and recyclables by truck or hand. Where provided, refuse areas shall be screened as follows:

i. All outdoor refuse and recycling collection and holding areas shall be screened on three (3) sides from public view by a matching masonry wall integral to the building's architectural design.

ii. The height of such wall enclosure is subject to the regulations set forth in this Article VI, Part D – Landscape Standards.

iii. Where the use of a matching masonry wall for such screening is not feasible, masonry, or other material approved by the Zoning Officer, which is compatible with the main building’s architectural design with the same height requirements of a masonry wall may be substituted at the determination of the Zoning Officer.

iv. The opening to the refuse enclosure shall be gated with a solid gate that is equal in height to the height of the enclosure.

v. Refuse disposal enclosures shall be situated to the greatest extent feasible, so that it does not face towards any abutting property zoned residential.

vi. The enclosure shall be used strictly for the confinement of refuse awaiting pick up and the gate shall remain closed except when refuse pick up occurs.

d. All rooftop mechanical equipment shall be screened and enclosed in a manner that masks the equipment from view from all sides. Architectural features such as parapet walls and varying rooflines are encouraged. The means of screening rooftop equipment shall relate to the building materials, architecture and color.

e. All utilities (e.g. electrical, communication) shall be buried underground.

6.04 COMMERCIAL, INSTITUTIONAL AND CIVIC BUILDING DESIGN STANDARDS

(1) Creative layout and design of the buildings within commercial, institutional, or civic development is encouraged. The architectural quality should be expressed on all four sides of a building and the utilization of a campus-style layout is encouraged in large scale developments. Creative layout and design will help decrease the overall mass of the development, to prevent monotony, and to improve the aesthetic quality of the development.

(2) To improve the future use and adaptability of the commercial, institutional, and civic structures, buildings should not be designed in a manner that limits the ability of the building to be reused for other uses.

(3) All commercial, institutional and civic buildings shall consist of solid and durable facades on all sides of a building facing a public street and shall be compatible with the character and scale of the surrounding area. Any exterior building façade shall incorporate a predominance of high quality materials that may include, but are not limited to, brick, sandstone, other native stone, or glass. Brick, sandstone or other native stones shall at a minimum extend from ground level to the top of windows with minor accents allowed in place of the predominant material.
(4) The use of concrete block, split face block, pre-cast panels, and/or masonry stucco is permitted as a minor or accent building material, but is strongly discouraged for use as a predominant building material. The exterior surface of a masonry wall shall consist of a textured finished surface, shall not have a flat surface, and shall not be constructed of concrete block or cinder block having a plain, flat surface.

(5) Any façade greater than 75 feet in length shall incorporate recesses, projections, windows or other ornamental/architectural (i.e. dormers, awnings, towers, etc.) features along at least 30% of the length of the façade abutting a public street in an effort to break up the mass of the structure.

(6) Brick facades shall not be painted.

(7) Outlot buildings that are part of a planned development or planned commercial center should reflect the style, materials and/or design elements of the main building. In cases where the existing main building does not meet the design guidelines and standards (i.e., in terms of visual design materials and layout of the building), new outlot development proposals will be reviewed using the guidelines and standards contained in this document.

(8) Pedestrian scale features/amenities, such as solid-colored awnings, covered walkways, windows, street furniture, bicycle rack facilities, and clearly defined entranceways are encouraged.

(9) Common open space and outdoor seating areas are encouraged.

(10) The location of drive-through facilities, including drive-through lanes, bypass lanes, and service windows, adjacent to a public right-of-way are not desirable and discouraged.

(11) All roofs on a commercial structure shall incorporate at least one of the following architectural treatments: (See Figures 6.04 A-D)

   a. Overhanging eaves, extending no less than three feet past the supporting walls;

   b. Sloping roofs that do not exceed the average height of the supporting walls, with an average slope greater than or equal to four (4) feet of vertical rise for every twelve (12) feet of run (4:12) and less than or equal to twelve (12) feet of vertical rise for every twelve (12) feet of horizontal run (12:12).

   c. Three or more slope roof planes; or

   d. Prominent cornices along the roof line of any façade.
8.17 BUILDING AND SITE ENHANCEMENTS

BUILDING DETAILS

Pedestrian scale elements shall be included in the facade or any building elevation fronting a public right-of-way other than an alley. Examples of such pedestrian scale elements are: decorative lighting, planters, and awnings.

BUILDING MECHANICALS

Mechanical units shall be hidden from views from public rights-of-way and adjacent properties. HVAC duct work shall not be placed on the exterior of walls.

AWNINGS

Awnings are encouraged.

SHUTTERS

Shutters, if used, shall be sized and mounted appropriately for the window, and shall be operable.

COLORS

Colors visible from the street shall be earth tones such as brown, dark green, sand, red-brown.

PERMITTED OVERHANGS

Balconies and oriel shall extend over sidewalk or right-of-way by 12 inches.

Turrets and eaves may extend over sidewalk by 24 inches.

BUILDING MATERIALS

Buildings shall be constructed of masonry only. Aluminum and vinyl siding as well as concrete block shall not be allowed.

Lighting should be designed as an architectural element and integrated with the building design.

Buildings with awnings help create a sense of human scale. Consistency in awning shape, size, horizontal location, and color should be encouraged.

Buildings with long, monotonous walls should be avoided. Monotonous walls can be broken up with windows, display cases, architectural detailing, and variation in the height of buildings. A consistent build-to-line should be maintained along the street.

Buildings that avoid long, monotonous walls should be encouraged.

An example of operable shutters facing the street.

Permitted Overhang: Example of an acceptable corner tower oriel.
Staff Report
Plan Commission
February 6, 2013
Continued from January 9, 2013, December 5, 2012 and November 7, 2012

Subject Property: N/A (Text Amendment)

Zoning District: Requested action is applicable to all zoning districts but is primarily applicable in non-residential districts.

Requested Action: Text amendment to Article II Part A, Section 2.02 regarding Definition of “Floor Area (For Determining Off-Street Parking and Off-Street Loading Requirements)”

Nature of Request: A text amendment is proposed to the Zoning Code to modify the definition of Floor Area (For Determining Off-Street Parking and Off-Street Loading Requirements).

Petitioner: Village Board

Summary
At the January 9, 2013 Plan Commission meeting, the Commission asked for additional research of communities in closer proximity and of like character to Lincolnwood. To supplement the information from the staff summary provided for the January 9th Plan Commission meeting (found below) staff has provided information from the following communities. Staff could not determine the methods for determining off-street parking based on floor area in Park Ridge or Winnetka. The assist the Plan Commission, the relevant sections which identify which floor areas are not to be included when calculating required off-street parking are in bold underline. Staff believes that the research of all communities still reveals that other communities exclude more space (floor area) when calculating Floor Area for purposes of determining off-street parking.

Evanston

FLOOR AREA (GROSS FLOOR AREA): The sum of the gross horizontal areas of the several floors of a building, except a cellar floor, measured from the exterior faces of the exterior walls or from the center line of walls separating two (2) buildings. The "floor area" of a building shall also include, but not be limited to, basements, all attic space, finished or unfinished, having five (5) feet or more space from floor to rafter, interior balconies and mezzanines; and enclosed porches or porches covered by a roof suitable for covering a habitable room. Any space devoted to required off-street parking or loading for the building shall not be included in "floor area." The following areas shall be excluded from calculations for "floor area": elevator shafts, stairwells, space used solely for
heating, cooling, mechanical, electrical and mechanical penthouses, refuse rooms and uses accessory to the building.

Glenview

For the purpose of determining off-street parking and loading requirements, the term "floor area" shall be defined to be the sum of the gross horizontal areas of the several floors of a building, or portion thereof, devoted to a use requiring off-street parking or loading as provided in this article. Such area shall include accessory storage areas located within selling or working space devoted to retailing activities, the production or processing of goods, or business or professional offices. However, the term "floor area" shall not include floor space devoted primarily to the housing of mechanical or electrical equipment, or storage purposes, except as otherwise noted in this article, nor floor space and ramps, aisles and maneuvering space devoted to off-street parking or loading facilities, nor basement floor space, other than the area devoted to merchandising activities, the production or processing of goods, business or professional offices, or dwelling uses.

Niles

Floor area—For the purpose of determining off-street parking and off-street loading requirements. The sum of the gross horizontal areas of the several floors of the building, or portions thereof devoted to a use requiring off-street parking or off-street loading, however, floor area for the purpose of determining off-street parking spaces shall not include floor area devoted to off-street parking or loading facilities including ramps, aisles or maneuvering spaces. All horizontal dimensions shall be taken from the exterior faces of the exterior walls.

Wilmette

For the purpose of determining off-street parking and loading requirements, "floor area" shall mean the sum of the gross horizontal floor area of the several floors of a building measured from the interior faces of the exterior walls, excluding areas used for the storage of merchandise or materials, mechanical equipment rooms, rest rooms, and areas used for off-street parking and loading and related aisles, ramps, and maneuvering space.

Note: The following sections are from staff report distributed for the January 9th Plan Commission meeting. The following are the only modifications
1. Identifying the relevant sections of the definitions that exclude certain floor areas when calculating required off-street parking.
2. Changes to the recommended areas to consider excluding based on conversation at the January 9 Plan Commission meeting.

Summary

Recently the Plan Commission recommended to the Village Board a reduction in the required off-street parking for sit-down restaurants. During that discussion, the Plan Commission identified that the method in determining the floor area for purposes of determining off-street parking may also need to be reviewed. As part of the vote by the Village Board to concur with the Plan Commission's recommendation to reduce the required off-street parking for sit-down restaurants, the Village Board directed the Plan
Commission to hold a public hearing to consider a text amendment to the definition of Floor Area (For Determining Off-Street Parking and Off-Street Loading). In addition to the referral, the Village Board directed the Plan Commission to comprehensively review all off-street parking requirements and associated definitions.

Prior to continuing with a review of the appropriate number of off-street parking spaces for carry-out restaurants and other uses, staff believes reviewing the definition of how floor area is determined is most appropriate. Therefore, at the November 7th Plan Commission meeting, staff intends to focus on a review of the definition of Floor Area only. The definition for Floor Area that is currently in the Zoning Ordinance is:

"Floor area", when prescribed as the basis of measurement for off-street parking spaces and off-street loading spaces for any use, shall be the sum of the net horizontal area of the several floors of the building, excluding areas used for accessory off-street parking facilities and the horizontal areas of the basement and cellar floors that are devoted exclusively to uses accessory to the operation of the building. All horizontal dimensions shall be taken from the exterior faces of the walls.

Off-Street Parking Definition Research
Staff conducted research of other selected Chicago suburbs. Staff focused on the suburbs previously researched as part of the restaurant parking text amendment. Copied below are the applicable definitions from these other communities.

Berwyn
"FLOOR AREA. The gross floor area and the open land area required for service to the public as customers, patrons, clients or patients, including areas occupied by fixtures and equipment used for the display or sale of merchandise. FLOOR AREA does not include areas used as restrooms, or areas or parts of areas used principally for nonpublic purposes, such as storage, automobile parking, incidental repairs, processing or packaging of merchandise or show windows, or for offices incidental to the management or maintenance of stores or buildings."

River Forest
"FLOOR AREA, NET (For Determining Off Street Parking And Loading Requirements): The sum of the net horizontal floor area of the several floors of a building measured from the interior faces of the exterior wall or from the interior faces of walls separating two buildings.

A. The net floor area of a building shall include:
   1. Basement area, when used for other than storage, service facilities or mechanical equipment;
   2. Penthouse area, excluding mechanical spaces;
   3. Attic space having headroom of seven feet or more;
   4. Interior balconies and mezzanines;
   5. Enclosed porches;
   6. Floor area devoted to building storage areas;
   7. For retail or commercial uses the net floor area of a building shall only include the sales or public floor area.
B. The net floor area of a building shall not include:
   1. Floor space occupied by mechanical, telephone and electrical equipment, including mechanical spaces;
   2. Stairwells, escalators and elevator shafts;
   3. Public restrooms;
   4. Interior off street parking and loading.”

Des Plaines
"Floor area" for purposes of measurement for off-street parking spaces shall not include: floor area devoted primarily to storage areas, food preparation areas and bathrooms.”

Bolingbrook
“(B) For Determining Off-Street Parking and Loading Requirements:
The sum of the following areas:
   1. floor space devoted to the principal use of the premises, including accessory storage areas located within selling or working space such as counters, racks, or closets;
   2. any basement floor area devoted to retailing activities; and
   3. floor area devoted to the production or processing of goods or to business or professional offices.

For this purpose, floor area shall not include space devoted primarily to storage purposes (except as otherwise noted herein), off-street parking or loading facilities, including aisles, ramps and maneuvering space or basement floor area other than area devoted to retailing activities, the production or processing of goods, or business or professional offices.”

Morton Grove
“gross floor area and the open land required for service to the public as customers, patrons, clients or patients, including areas occupied by fixtures and equipment used for the display or sale of merchandise. Floor area does not include areas used as restrooms, or areas or parts of areas used principally for nonpublic purposes, such as storage, automobile parking, incidental repairs, processing or packaging of merchandise or show windows, or for offices incidental to the management and maintenance of stores or buildings.”

Skokie
Floor area, net (for determining off-street parking and loading requirements).
"Floor area," when prescribed as the basis of measurement for off-street parking and loading spaces for any use, shall be the sum of the gross horizontal area of the basement, and all other floors, excluding hallways, stairways, elevator shafts, boiler and air conditioning equipment rooms, or areas used for off-street parking facilities. All horizontal dimensions shall be taken from the exterior faces of the exterior walls, or from the centerlines of walls separating 2 buildings.

A clear trend is evident upon review and comparison of these definitions. Other communities exclude much more space when calculating Floor Area for purposes of determining off-street parking. It is commonplace for communities to exclude certain areas within a business such as restrooms, storage areas, hallways, stairways, etc. Lincolnwood currently makes no similar exclusions other than basement and cellar areas.
Recommendation
Staff believes that based on the research conducted, Lincolnwood is not currently following best practice when it comes to calculating Floor Area for the purposes of determining off-street parking. Therefore, staff recommends an amendment to this definition to exclude certain areas from the calculation. Areas to consider excluding based upon the research include:

1. Restrooms & Locker Room for Employees
2. Storage Areas
3. Hallways
4. Stairways
5. Elevator Shafts
7. Food Preparation Areas: Employee Break Rooms
Subject Property: N/A (Text Amendment)

Zoning District: Requested action is applicable to the B1, B2, B3, O and MB District.

Requested Action: Text amendment to clarify regulations of A-frame and sandwich board signs as regulated by Article XI Section 11.06(1) and Section 11.04(8).

Nature of Request: Consideration of the requirements for A-frame and sandwich board signs.

Petitioner: Village Board

Summary
Article XI of the Zoning Code regulates signage within the community. This Zoning Code Article includes a list of Prohibited Signs which are found in Section 11.06. Staff has struggled with the intent and enforcement of this section as it relates to A-frame signs and/or sandwich board signs. The Prohibited Signs section states: “The following sign types are specifically prohibited in all locations within the Village:” The section pertaining to A-frame and sandwich board signs reads:

(1) A-frame, sandwich board and other signs which are placed on a sidewalk or curb or between a sidewalk and curb or other parkway, except special event signs and open house directional signs.

Staff is unclear the intention of this section given the opening statement of the Prohibited Signs section to not allow certain sign types in any location within the Village. The Prohibited Sign section is not the only section in which A-frame and sandwich board signs are regulated. Section 11.04(8) provides regulations for Special Event/Grand Opening Signs. Included in these regulations is a reference to A-Frame signs. This section permits, on private property, an A-frame sign for a period of 15 consecutive days. This additional section which identifies the standards for A-frame signs could potentially make the reference to A-frame signs within the Prohibited Signs list redundant and unnecessary depending upon what the desired restriction of A-frame and sandwich board signs.

Staff seeks direction on the desired regulation is to:
- Prohibit all A-frame and sandwich board signs completely on public and private property.
- Prohibit A-frame and sandwich board signs within the public right-of-way only.
• Prohibit A-frame signs and sandwich board signs completely except for special event signs and open house directional signs and to allow those temporary signs within the public right-of-way.

Research of Other Communities
Attached is a spreadsheet containing information from other communities and their regulations on A-Frame/Sandwich Board signs. Of the communities where staff could determine specific regulations, it appears that a consistent standard is to not permit A-Frame/Sandwich Board signs within the public right-of-way. These types of signs are also typically categorized as temporary signs. Accordingly, there are time limitations that are placed on how long such signs are permitted to be in place on private property.

Recommendation
Staff is seeking discussion and clarification on the intent of the Prohibited Signs section as it relates to A-frame and sandwich board signs. Staff suggests the consideration should include discussion on the desired regulation of the particular sign type as well as discussion on the permitted locations (private property and/or public right-of-way).

It would seem that it is common in other communities surveyed to restrict the amount of time these types of signs are permitted, i.e. during business hours only, or for a period of eight weeks. If the Plan Commission determines that the intent is to permit these types of signs but only on a temporary basis staff recommends clarifying both the Prohibited Sign section and the Special Event/Grand Opening Signs Section. Based on this, staff recommendations are found below:

Section 11.06(1)
(1) A-frame, sandwich board and other signs which are placed on a sidewalk or curb or between a sidewalk and curb or other roadway or public right-of-way, except as permitted and regulated by Section 11.04(8) Special Event/Grand Opening Signs signs and open house directional signs.

Section 11.04(8)
(8) Special Event/Grand Opening Signs: The following temporary, special event signs shall be permitted on private property only for a total of two (2) nonconsecutive events per year, but shall not be erected or maintained for a period exceeding fifteen (15) consecutive days per event, and must be removed if wind gusts exceed safety guidelines or design standards for the sign, or the standards for safety tie downs to or by which they are affixed or secured:
i. Portable signs;
ii. Pennant/streamer signs;
iii. Temporary banner signs;
iv. A-frame signs; and
v. Other temporary signs for special events not requiring a special sign permit, and as may be approved by the Zoning Officer.

ii. **Underside Canopy Signs:** An additional canopy sign may be mounted on the underside of a canopy, perpendicular to the building wall, provided that no more than one underside canopy sign is installed per business establishment. The area of an underside canopy sign shall not exceed four (4) square feet.

iii. **Clearance:** A clearance of eight feet (8') shall be maintained from finished grade to the lowest point of any canopy sign.

iv. **Extension and Projection:** A canopy sign mounted on a canopy face shall not extend above or below the canopy face nor shall it project more than fifteen inches (15") beyond the canopy face.

(5) **Awning Signs:** Individual letters, words or symbols may be affixed or applied to any awning surface, provided that the area of the awning sign does not exceed fifteen percent (15%) of the exterior surface area of the awning.

(6) **Permanent Window Signs:** Permanent window signs may be affixed or applied to window glass, provided that the area of permanent window signs does not exceed twenty percent (20%) of the window surface area. A maximum of four (4) permanent window signs per business establishment may be illuminated.

(7) **Changeable Copy Signs:** Changeable copy signs are permitted only as an integral part of a monument sign, provided that the changeable copy area is no larger than twenty five percent (25%) of the entire sign face. Illuminated changeable copy signs shall comply with the requirements for internally lit signs, inhibiting light transmission. Only gasoline price signs accessory to gasoline service stations will be permitted to have manual or electronic changeable copy, which signs shall be maintained to show current gasoline prices at all times.

(8) **Special Event/Grand Opening Signs:** The following temporary, special event signs shall be permitted for a total of two (2) nonconsecutive events per year, but shall not be erected or maintained for a period exceeding fifteen (15) consecutive days per event, and must be removed if wind gusts exceed safety guidelines or design standards for the sign, or the standards for safety tie downs to or by which they are affixed or secured:

i. Portable signs;
ii. Pennant/streamer signs;
iii. Temporary banner signs;
iv. A-frame signs; and
v. Other temporary signs for special events not requiring a special sign permit, and as may be approved by the Zoning Officer.

11.05: EXEMPT SIGNS

The following signs, while subject to any other Village ordinance which may apply, are exempt from the permit requirements set forth in this Article.

(1) **Construction Signs:** One nonilluminated single faced temporary sign per construction site shall be permitted not exceeding twelve (12) square feet of sign area in residential zoning districts or sixty four (64) square feet in business or manufacturing districts, provided that such signs shall be erected no more than five (5) days prior to the beginning of construction for which a valid
ii. No transit shelter sign shall extend beyond the side of the structure to which the sign is mounted;

iii. No transit shelter sign shall be installed in a Residential District of the Village, except signs displaying: (a) transit service information; or (b) public service information provided by the Village; and

iv. No transit shelter sign shall be installed on any shelter for which the Board of Trustees has not adopted a resolution approving the installation of signs thereon, which resolution shall not be adopted except upon the submission by the applicant of evidence that the owner of the property on which the shelter is or will be located has authorized the placement of the shelter and the installation of signs thereon.

(Ordinance No. 2011-2937)

11.06: PROHIBITED SIGNS

The following sign types are specifically prohibited in all locations within the Village:

1. A-frame, sandwich board and other signs which are placed on a sidewalk or curb or between a sidewalk and curb or other parkway, except special event signs and open house directional signs.

2. Abandoned signs.

3. Advertising vehicles.

4. Off premises advertising signs, except transit shelter signs installed pursuant to Section 11.05(23) of this Article. (Ordinance No. 2011-2937)

5. Animated signs.

8. Flashing signs.

9. Light pole signs.

10. Painted wall signs.

11. Portable signs, except special event signs.

12. Projecting signs.

13. Signs, which:

   i. Bear or contain statements, words, pictures or symbols which are unlawful;

   ii. Are attached to any fence or freestanding wall;
Staff Report  
Plan Commission  
February 6, 2013  
Continued from January 9, 2013

Subject Property: N/A (Text Amendment)

Zoning District: Requested action is applicable to all Zoning Districts in which public hearings are held.

Requested Action: Text amendment to clarify Notice Requirements as regulated by Article X Section 5.20(1)e.

Nature of Request: Consideration of the notification requirements for public hearings.

Petitioner: Village Board

Summary
Article X Section 5.20 of the Zoning Code identifies the notice requirements for public hearings. This section outlines requirements for placing notice in a newspaper, installation of public notice signs, and written notice to property owners for all public hearings. Section 5.20(1)e states that in certain situations and at the discretion of the Zoning Officer, “...the Zoning Officer may require that Applicant give the notices required...beyond two hundred fifty (250’) but not exceeding five hundred (500’) feet from the site...”

The criteria listed in this section as to when additional notice may be required beyond 250 feet includes,

“Whenver an application pertains to a site of two acres or more, and the Zoning Officer determines that because of size, location, proximity to other Zoning Districts, existing or likely traffic pattern, nature of use, or for any other appropriate reason or combination of reasons...”

This section leaves it to the discretion of the Zoning Officer that for any reason notice beyond the 250 feet may be required. Staff’s concern is that it is difficult to anticipate each and every time in which a matter may be controversial and therefore merit greater notice. Staff prefers that the community identify what the appropriate notice is for all public hearing matters and eliminate the discretionary additional notice.

Summary of Research
Based on the research of nearby communities no other community has a discretionary notification provision in which staff determines when additional notice is given. Skokie and Glenview have provisions that the Plan Commission and/or the Zoning Board of Appeals may require additional notices beyond what is required by code. All other communities researched identify the notification distance and provide no additional discretionary notice requirements.
Recommendation
Staff maintains that this is a matter for the community to determine what is most appropriate. Staff does believe that Section 5.20(1)e is too discretionary relative to when additional notice is required. Staff recommends either establishing a notice distance for all public hearings or to clarify and be more specific on the parameters in which additional notice must be provided.

Regulation

Lincolnwood Zoning Code 5.21.1B and 5.21.1E

b. The Village shall give notice in writing to property owner(s) of each lot located within two hundred fifty feet (250'), including streets, of the property lines of the subject property for which the requested relief is sought. All notices required pursuant to this Section 5.20 shall be sent by United States mail not more than thirty (30) days nor less than fifteen (15) days in advance of such hearing. The Applicant shall reimburse the Village for all costs associated with the issuance of notices pursuant to this Section 5.20(1)(b), including staff costs, in accordance with Section 5.02 of this Zoning Ordinance. (Ordinance No. 2010-2887)

e. Whenever an application pertains to a site of two acres or more, and the Zoning Officer determines that because of size, location, proximity to other Zoning Districts, existing or likely traffic pattern, nature of use, or for any other appropriate reason or combination of reasons, a larger notice area should be required in order to better inform those beyond the regular notice area who might be particularly impacted, then the Zoning Officer may require that Applicant give the notices required pursuant to this Section 5.20 to the owner of lots lying within a specified radius beyond two hundred fifty (250') feet but not exceeding five hundred (500') feet from the site which is the subject of the application. (Ordinance No. 2010-2887)

Skokie Zoning Code Article 2, Section 118-34 Initiation and Amendment of Cases

(1) Personal notice. The petitioner shall provide notices to property owners of as ascertained by the most recent available property tax records available to the public by the Cook County Assessor's Office, of all lots, or buildings lying in whole or part within 250 feet of the property lines of the subject property. The petitioner shall also provide notices to all tenants, occupants, and property owners on the subject property. The petitioner shall file an affidavit with the Village Manager or designee containing a complete list of the names and last known addresses of all persons served proper notice pursuant to this section. The notice shall be delivered by certified mail, properly addressed not more than 45 days nor less than 15 days prior to the hearing. The petitioner shall provide to the Community Development Department the receipts of payment from the U.S. Postal Service for certified mail delivery prior to the hearing. Exceptions to this procedure are given for the following cases:

a. Exception permits sought for rear and side yard locations not abutting a street or alley: Notice shall be given only to the aforementioned residents and persons to whom the real estate tax bills are sent of properties abutting those side and rear yard locations.

b. Vacations of alleys or streets shall require written notice to all property owners within 250 feet of the subject alley or street to be vacated.

(2) Publication of notice. The Village Manager or designee shall publish a notice in a newspaper of general circulation within the Village not more than 30 days or less than 15 days prior to the hearing.

(3) Posting of notice. The Village Manager or designee shall post notices on the property for which a case has been filed so that they are visible from the street and on the main entrance door of the improvement so that it is visible from the outside, if such an improvement exists, not more than 30 days and not less than 10 days prior to the hearing.

a. On an unimproved property: Placed in such a manner as to be visible from the street.

b. On an improved property: Placed on the front or main entrance door of the improvement so as to be visible from the outside and placed on the lot in such a manner as to be visible from the street.

(4) Additional notices. Supplemental or additional notices may be distributed, published, or posted as the Zoning Board of Appeals or Plan Commission may request from time to time.
Morton Grove Unified Development Code 16.5B.B

B. Notice: The building department shall give notice of public hearings for the plan commission and zoning board of appeals in the form and manner as described below, and to the persons identified below:

1. Content: All notices by newspaper and mail shall include the date, time, and place of the public hearing, the purpose of the hearing, and the address or location of the property involved.

2. Newspaper Publication: Notice of all zoning board of appeals/plan commission cases shall be published in a newspaper with general circulation in the village at least once no less than fifteen (15) days nor more than thirty (30) days before the hearing date.

3. Mail: Notice by regular United States mail shall be sent to all owners of property within two hundred fifty feet (250') of the subject property (100 feet for zoning board of appeals cases involving single- or two-family residences), such notice to be postmarked not less than fifteen (15) days nor more than thirty (30) days before the hearing date.

4. Signs: Signs shall be erected on the property which is the subject of the public hearing, indicating that an upcoming public hearing will be held concerning the property. Such signs shall be conspicuously displayed at least ten (10) days before the public hearing and shall be removed upon the rendering of a decision by the body in question. (Sign size shall be a minimum of 18 inches by 24 inches.) (Ord. 11-29, 8-8-2011)

Glenview Zoning Code Article II Sec. 98-47 Variations

(b) Application and notice of hearing. A complete application for a variation, including all information as shall be required from time to time by the Village, shall be filed with the director of development, who shall forward a copy of the application to the zoning board or appeals. No more than 60 days after the filing of such application, a hearing shall be held on the application. Notice of such hearing shall be published at least once, not more than 30 days, nor less than 15 days before the hearing, in one or more newspapers with a general circulation within the Village. The published notice may be supplemented by such additional form of notice as the zoning board of appeals by rule may provide.

Evanston Zoning Code 3.4.6 Procedure for Review and Decision of Proposed Amendments

(A) Public Hearing: After the filing of a petition for amendment in proper form, the Zoning Administrator shall set a date for a public hearing.

(B) General Notice of Public Hearing: Notice of the public hearing required by Subsection 6-3-4-6(A) shall be given by the Plan Commission by one (1) publication in one (1) or more newspapers of general circulation. Notice shall be published a minimum of fifteen (15) days prior to the hearing date and a maximum of thirty (30) days prior to the hearing date.

(C) Mailed Notices Required for Redistricting or Rezoning: Notice shall also be given by first class mail to all owners of property within a five hundred (500) foot radius of the subject property, inclusive of public roads, streets, alleys and other public ways from the area proposed to be rezoned or redistricted whose addresses appear on the current tax assessment list as provided by the applicant. The failure of delivery of such notice, however, shall not invalidate any such amendment. In addition, a sign shall be posted on the property for a minimum of ten (10) working days prior to the public hearing indicating the place, time and date of the hearing.
Wilmette Zoning Code Section 20-4.8.1. Notice of public hearings

(a) Published notice. For any public hearing required by this Chapter, and for any public meeting at which the Appearance Review Commission will consider granting an application for an Appearance Review Certificate, the Director of Community Development shall cause a notice of the date, time, place, and purpose of such hearing or meeting to be published in a newspaper of general circulation within the Village not less than 15 days nor more than 30 days in advance of the scheduled hearing or meeting date. Where the hearing or meeting involves an application for approval of a variation, special use, rezoning, or Appearance Review Certificate, the published notice shall identify the address of the affected property and the name of the applicant.

(b) Posted notice. For any public hearing required by this Chapter for approval of a variation, special use, or rezoning, other than a comprehensive rezoning of the entire Village, and for any public meeting at which the Appearance Review Commission will consider granting an application for an Appearance Review Certificate, the Director of Community Development shall cause a notice of the hearing or meeting to be posted on the affected property not less than 15 days nor more than 30 days in advance of the scheduled hearing or meeting date. Such notice shall show the number assigned to the application (if any), the date, time, and place of the public hearing or meeting, and the nature of the application being considered at the hearing or meeting. The notice shall be posted no more than 15 feet from the front lot line and no less than four feet nor more than six feet above grade, so as to be visible from the public way.

(c) Personal notice for variations, special uses, and rezonings. For any public hearing required by this Chapter for approval of a variation, special use, or rezoning, other than a variation from the Sign Ordinance or a comprehensive rezoning of the entire Village, the applicant shall notify by written notice of the hearing all persons to whom the current real estate tax bills are sent, as shown on the records of the County Assessor, for all lots any part of which lie within 250 feet of the boundaries of the subject property, not excluding streets and alleys, as well as all occupants of such lots. All such notices shall be provided to the applicant by the Director of Community Development and shall show the number assigned to the application (if any), the date, time, and place of the public hearing, and the nature of the application being considered at the hearing. All such notices shall be delivered not less than 15 days nor more than 30 days in advance of the scheduled hearing date. For the purposes of this Section, the term "occupant" shall include occupants of all residential, business, and institutional properties.
Park Ridge Zoning Ordinance Section 3.3 Notice

A. Published Notices
For all applications that require a public hearing, the City shall cause a notice to be published in a newspaper of general circulation within the City. The notice shall include the date, time, place and purpose of such hearing, the name of the applicant, and the address of the subject property. Such notice shall be published no less than fifteen (15) days, nor more than thirty (30) days, in advance of the scheduled hearing date.

B. Mailed Notice
1. For public hearings for major and minor zoning variances, special use, planned development applications and zoning map amendments, written notice on forms provided by the Zoning Administrator, shall be mailed by regular mail no less than fifteen (15), but nor more than thirty (30), days prior to the public hearing to the occupants of all properties located within two-hundred fifty (250) feet from the property line of the subject property. The notice shall include the date, time, place and purpose of such hearing, the name of the applicant, and the address of the subject property.

2. The applicant shall provide the stamped and addressed notices to the Zoning Administrator who shall deposit them in a U.S. postal facility for delivering. The applicant shall also provide an affidavit stating that the stamped notices include each and every property within two-hundred fifty (250) feet. The City shall provide an affidavit stating that the stamped notices were mailed. The two-hundred fifty (250) feet shall be measured from all directions along the perimeter of the subject property.

3. For administrative zoning variances, written notice on forms provided by the Zoning Administrator, shall be mailed by regular mail no less than fifteen (15), but nor more than thirty (30), days prior to the Zoning Administrator’s decision to the occupants of all properties located adjacent to the subject property as well as the property located directly across the street. The applicant shall provide the stamped and addressed notices to the Zoning Administrator who shall deposit them in a U.S. postal facility for delivering. If a noticed property owner objects to the administrative variance, such variance shall then be considered a minor variance and subject to the minor variance notice requirements.

4. Giving notice pursuant to this section shall not be construed to prevent the applicant from giving such additional notice as he/she may deem appropriate.

5. The body conducting the hearing shall hear no application unless the applicant complies in all respects all notice requirements.

Des Plaines Zoning Ordinance Section 3.1-3 Notice.

A. Notice of Public Hearing in Newspaper. For any development review procedure that requires a public hearing, the City shall arrange for the publication of a public notice in a newspaper of general circulation in the Des Plaines jurisdictional area. The notice shall include the date, time and place of such hearing or meeting, a description of the matter to be heard or considered, the address or particular location of the subject property, and, in the case of a public hearing for an Amendment, a legal description of the subject property. The notice shall run at least one time, not more than thirty days nor less than fifteen days prior to the public hearing.

B. Notice of Public Hearing Through Posted Sign. In addition to the newspaper notice provision required above, not more than thirty days nor less than fifteen days prior to any public hearing on a development review procedure the Zoning Administrator shall cause to be posted on the property affected a notice sign stating that a hearing will be held and including the date, time and place of such hearing or meeting, and a description of the matter to be heard or considered.

C. Notice of owners within 300 feet. In any public hearing regarding a map amendment, conditional use, or major variation, the Petitioner shall be required to notify property owners by U.S. Mail within 300 feet of the perimeter of the subject lot of record. Petitioner shall sign an affidavit verifying said mailing occurred attaching the copy of the document.
Winnetka Zoning Ordinance Section 17.72.040 Amendments

D. Notice of Hearing.

1. Publication of Notice. Notice shall be given of the time and place of the hearing, not more than thirty (30) nor less than fifteen (15) days before the hearing, by publishing a notice at least once in one or more newspapers published in the Village, or, if no newspaper is published in the Village, then in one or more newspapers with a general circulation within the Village.

2. Notice to Affected Property Owners. In cases where the proposed amendment involves a change in zoning classification of particular property and such amendment is initiated by the Village Council, the Plan Commission, the Zoning Board of Appeals or the Village Manager, notice shall be served upon the owner or owners of property which are the subject of the proposed amendment in person or by certified mail within ten (10) days after the filing of the application.

3. Mailed Notice. In cases where the proposed amendment involves a change in zoning classification of particular property, the Zoning Administrator shall prepare a list of the names and addresses of all persons to whom the latest general real estate tax bills were sent for all property situated within two hundred fifty (250) feet of the property which is the subject of the proposed amendment. Written notice of the time and place of the public hearing shall be sent to each person whose name appears on the list prepared by the Zoning Administrator, at the address shown on such list. The Zoning Administrator shall send such written notice by first class mail, postage prepaid, not less than ten (10) days prior to the date of such public hearing. The failure of any person to receive the written notice issued pursuant to this paragraph shall not affect the jurisdiction of any body authorized to conduct a hearing or otherwise consider the application for special use. Nor shall the failure of any person to receive such written notice invalidate, impair or otherwise affect the subsequent grant or denial of any amendment granted following such public hearing.
d. All notices required pursuant to this Section 5.20 shall identify: the location of the subject property for which relief is sought; a brief statement of the nature of the relief requested; and the date, time, and location of the public hearing.

e. Whenever an application pertains to a site of two acres or more, and the Zoning Officer determines that because of size, location, proximity to other Zoning Districts, existing or likely traffic pattern, nature of use, or for any other appropriate reason or combination of reasons, a larger notice area should be required in order to better inform those beyond the regular notice area who might be particularly impacted, then the Zoning Officer may require that Applicant give the notices required pursuant to this Section 5.20 to the owner of lots lying within a specified radius beyond two hundred fifty (250') feet but not exceeding five hundred (500') feet from the site which is the subject of the application. (Ordinance No. 2010-2867)

(2) No notice required pursuant to this Section 5.20 shall be deemed insufficient because: (i) it fails to specify which section of this Zoning Ordinance is applicable; or (ii) if relief, authorization or amendment has been sought under a certain section or sections of this Zoning Ordinance, but as a result of the hearing, the relief, authorization or amendment sought is modified or otherwise granted pursuant to a different section or sections of this Zoning Ordinance.

(3) This Section 5.20 shall not apply to the notices required pursuant to Section 5.13 of this Zoning Ordinance for appeals of decisions by the Zoning Officer.

5.21 VIOLATION, PENALTY, ENFORCEMENT

(5) Violation; Penalty: Any person, firm, limited liability company or corporation who violates, disobeys, omits, neglects or refuses to comply with, or who resists the enforcement of, any of the provisions of this Zoning Ordinance shall, upon conviction, be fined for each offense as required in the Village’s Fee Ordinance. Each day that a violation is permitted to exist shall constitute a separate offense.

(6) Civil and Administrative Enforcement:

a. General Authority: In case any building or structure is erected, constructed, reconstructed, altered, repaired, converted, or maintained, or any building, structure, or land is used in violation of this ordinance or other regulations made under authority conferred thereby, the Village, in addition to other remedies, may institute any appropriate action or proceedings to: (1) prevent such unlawful erection, construction, reconstruction, alteration, repair, conversion, maintenance, or use; (2) restrain, correct or abate such violation; (3) prevent the occupancy of said building, structure or land; or (4) prevent any illegal act, conduct, business or use in or about the premises.

b. Legal Actions: In the enforcement of this Zoning Ordinance, the Zoning Officer shall have the right to exercise all the powers authorized by the statutes of the State of Illinois, and by Village codes and ordinances, to ensure compliance with, or to prevent or abate any violation of, the provisions of this Zoning Ordinance, and in particular shall, where necessary or appropriate, institute or cause to be instituted by the Village Attorney in the name of the Village any and all actions, legal or equitable, including appeals, that may be required for the enforcement of this Zoning Ordinance.
Staff Report
Plan Commission
February 6, 2013
Continued from January 9, 2013

Subject Property: N/A (Text Amendment)

Zoning District: Requested action is applicable to all Districts.

Requested Action: Text Amendment to Article II Section 2.02 to consider adding definitions for Impervious Coverage and Development Site and modifying the definition for Floor Area, Gross.

Nature of Request: Consideration and review of new definitions for Impervious Coverage and Development Site and modify the definition of Floor Area, Gross in order to clarify the definition.

Petitioner: Village Board

Summary
Note: Below is the summary provided at the January 9, 2013 Plan Commission meeting. This matter was continued.
The Village Board has directed the Plan Commission to hold a public hearing to consider adding definitions of Impervious Coverage and Development Site as well as modifying the existing definition of Floor Area, Gross.

Impervious Coverage
The Zoning Code contains a bulk regulation which limits that maximum Impervious Coverage in Residential Districts to 60%. However, the Zoning Code contains no definition for Impervious Coverage. Staff recommends that the Section 2.02 of the Zoning Code be amended to add a definition for Impervious Coverage as follows:

Impervious Coverage: The horizontal area to include building coverage, all surfaces that do not allow water penetration including but not limited to driveways, paving bricks, composed stone, sidewalks, and all detached buildings and structures.

Development Site
Part C of Article VIII contains the regulations for the B-3 Village Center Planned Development District. This section includes unique procedural standards such as public hearing requirements for all new development. The Purpose and Intent Section 8.18
requires that, “As a planned unit development district, all development sites shall adhere to procedures and standards...” The Zoning Code does not contain a clear definition of “development site” which makes it potentially unclear as to when a public hearing is required within the B-3 District. For example, staff does not believe that reoccupancy of an existing space to require a public hearing under this section however new construction does require public hearing. Defining what is a “Development Site” and thus, what projects require public hearings, is important to ensure consistent enforcement of Article VIII Part C Village Center Planned Development District.

Staff recommends that Section 2.02 of the Zoning Code be amended to add a definition for Development Site as follows:

**Development Site:** A property in which new construction and any addition or expansion of an existing building will occur shall be considered a Development Site. Within an existing building a change in use shall not be considered a Development Site subject however to compliance with all applicable standards for the new use.

**Floor Area, Gross**
Attached for reference is the current definition of Floor Area, Gross. This definition includes the areas that are included toward maximum Floor Area Ratio and those areas that are excluded from the Floor Area Ratio calculation. The consideration of a potential text amendment pertains to the exclusion for enclosed off-street parking. Recently, an architect for a residential project designed a new single-family home based on the horizontal area devoted to off-street parking and off-street loading facilities, located in each floor of a building would be excluded from the maximum floor area ratio. This exclusion, staff believes, is applicable to commercial, business, office, and manufacturing buildings which include an indoor parking and loading area.

Additionally, the same section identifying certain exclusion contains exclusion for the first two hundred fifty square feet or fifty percent of the floor area of a detached or attached garage, whichever is less. Staff did not concur with the architect’s assertion that this section excluded residential attached garages.

In order to clarify and strengthen the definition of Floor Area, Gross staff recommends:

Gross floor area shall exclude the following specific areas:

a. horizontal area devoted to off-street parking and off-street loading facilities, located in each floor of a **manufacturing, business, office, and multi-family residential** building;

**Attachments:**
1. Zoning Ordinance Section 2.02 Definition of Floor Area, Gross
FLOOR AREA, GROSS: The sum of the gross horizontal areas of all floors of a building or of such area devoted to a specific use, measured from the exterior face of exterior walls or from the centerline of walls separating two buildings or uses. Gross floor area shall include, without limitation, areas such as:

a. basement floors;
b. elevator shafts and stairwells at each floor;
c. floor spaces and shafts used for mechanical, electrical, and plumbing equipment, except equipment located in a cellar or on the roof;
d. penthouses;
e. interior balconies and mezzanines;
f. enclosed porches; and
g. floor space used for accessory uses.

When any space has a floor-to-ceiling height of 14 feet or more, each 14 feet of height, or fraction thereof, shall constitute a separate floor, provided, however, for spaces with a sloping or slanting ceiling, only that portion of such space with a floor-to-ceiling height of 14 feet or more shall be treated as a separate floor.

Gross floor area shall exclude the following specific areas:

a. horizontal area devoted to off-street parking and off-street loading facilities, located in each floor of a building;
b. cellar floors;
c. attic floors;
d. decks and patios;
e. open, unenclosed porches;
f. sheds one hundred (100) square feet in area or less;
g. chimneys projecting not more than two feet from an exterior wall; and
h. the first two hundred fifty (250) square feet or fifty percent (50%) of the floor area of a detached or attached garage, whichever is less.

FLOOR AREA (FOR DETERMINING OFF-STREET PARKING AND OFF-STREET LOADING REQUIREMENTS): "Floor area", when prescribed as the basis of measurement for off-street
Subject Property: N/A (Text Amendment)

Zoning District: Requested action is applicable to the B1, B2, B3, O-1, and M-B Districts.

Requested Action: Text Amendment to Various Sections of the Zoning Ordinance including but not limited to the Definitions Section, Land Use Table, Off-Street Parking Schedule, etc. relative to modifying the definition of Health Club or Private Recreation, Firearms Shooting Ranges.

Nature of Request: Consideration to Modify and/or add certain definitions including but not limited to Health Club or Private Recreation and Firearms Shooting Ranges; Consideration of Firearms Shooting Ranges as a Special Use in the M-B District subject to certain restrictions; and the Addition or Modification of Off-street Parking Requirements for Firearms Shooting Ranges, Commercial Recreation Facility, or Other Similar Uses

Petitioner: Village Board

Summary
On November 9, 2012, the Village Board adopted Resolution No R2012-1710, initiating a referral to the Plan Commission for text amendments to the Zoning Ordinance. These proposed text amendments concern Firearms Shooting Ranges and the existing definition found in the Zoning Ordinance for “Health Clubs and Private Recreation”. The purpose of these text amendments is to:

1. Specifically exclude from the definition of “Health Clubs and Private Recreation”, Firearms Shooting Ranges, and
2. Establish in the Zoning Ordinance, “Firearms Shooting Ranges” as a Special Use in the M-B Zoning District.

The adopted Village Board Resolution suggests, but does not identify, that other restrictions may be determined to be necessary and desirable in establishing Firearms Shooting Ranges as a Special Use in the M-B Zoning District.

Definitions
Currently, within the Zoning Ordinance the pertinent definition reads:

HEALTH CLUB or PRIVATE RECREATION
A building or portion of a building designed and equipped for the conduct of sports, exercise, leisure time activities, or other customary or usual recreational activities, operated for profit or not-for-profit and which can be open only to members and guests of the organization or open to the public for a fee.
For public hearing consideration, staff suggests that this definition be broken down into three separate definitions as follows:

**Firearms Shooting Range:** A specialized indoor soundproof facility, supervised by a Range Safety Officer and designed for the safe shooting practice of firearms, such as handguns and rifles.

**Health Club:** A business establishment which promotes physical fitness and which contains equipment for body exercising or other facilities intended to improve physical fitness, diet, weight control and/or health and which is generally utilized by members who pay a periodic fee for facility access and use.

**Commercial Recreational Facility:** A privately owned for-profit commercial facility designed and equipped to provide customary leisure time or recreational activities, such as bowling, swimming, miniature golf, ice skating, tennis, racquetball and like activities.

If the Plan Commission concurs with this definitional breakdown, staff would further recommend that both “Health Club” and “Commercial Recreational Facility” be added to the Use Table in the Zoning Ordinance to replace the current listing for “Health Club and Private Recreation” and that this definition be eliminated altogether from the Ordinance.

**Parking Standards**
With the addition of a separate listed use in the Use Table for Firearms Shooting Ranges, staff recommends the addition of a parking standard for this use. Previously, based on research, staff recommended a parking standard for shooting ranges as follows:

- 2 parking spaces per shooting range station plus 3 spaces per 1,000 square feet of floor space not devoted to indoor shooting range.

Should the Plan Commission concur with the separation in the Use Table for “Health Club” and “Commercial Recreation Facility”, staff would also like to review appropriate parking standards for these uses for possible amendment. Currently, the parking standard for “Health club or recreation facility, private” is 1 space per 3 persons+ 1 space per /2 full time employees. Staff notes that currently a separate parking standard already exists for bowling alleys (5 spaces per lane).

**Firearms Shooting Range Use**
The Village Board initiated text amendment proposes that Firearms Shooting Ranges be allowed in the M-B District as a Special Use. Last June, as part of the Shore consideration, a proposed text amendment was presented for Firearms Dealers as a Special Use in the M-B District. This proposal also included:

- an 800 foot minimum distance requirement from any “P” Park zoned property or,
- any “R” Residentially zoned property

The effect of enacting a similar 800 foot minimum distance for Firearms Shooting Ranges from “P” or “R” zoned property would be a significant reduction in the area of the M-B zone in which a shooting range could be located (see attached map). Staff believes that this additional locational restriction within the M-B District has merit for Firearms Shooting Ranges and suggests its consideration as part of these text amendments.
Health Club, Private Recreation, Firearms Shooting Ranges Text Amendment  February 6, 2013

Staff notes that this proposal for an 800 foot minimum distance from R or P zoned property is just that, a minimum distance from property which is zoned for Park or Residential use, rather than from how a property might be actually used. This distinction is made since previously some in the community mistook the minimum distance proposal from P zoned property as meaning a required minimum distance from any type of park or open space, such as the proposed bike trail (which is not zoned P). Staff recommends using Zoning Districts and the Village Zoning Map for determining any minimum distance, since this is very objective.

In addition to considering this minimum distance requirement, staff suggests that performance standards for Shooting Ranges be considered for this use. Surprisingly, while there is an estimated 16,000-18,000 indoor shooting ranges in operation in the United States; staff has found few local requirements for them. In reviewing the literature on shooting range uses, the following four areas appear to represent the areas of greatest concern with this use:

1. Customer/Employee Safety
2. Health concerns (lead exposure)
3. Property/Business Security Plan
4. Noise concerns

To respond to these areas of concern, staff recommends that the following Performance Standards for Firearms Shooting Ranges be considered for inclusion in the Zoning Ordinance:

2. Range must conform to US Department of Labor Occupational Safety and Health Administration (OSHA) requirements
3. Range must be in conformance with an established and Police Chief approved Range Safety Plan, which shall specify range safety requirements and procedures for customers and workers.
4. Range must be in compliance with a Police Chief approved Security Plan for the business and property.
5. Range must comply with any and all applicable US or Illinois Environmental Protection Agency requirements concerning lead and noise
6. Range must comply with Village noise restrictions.

Attached is the US Department of Energy Range Design Criteria as well as a recent ordinance which regulates shooting ranges in Richland Township Pennsylvania. To provide additional background, also attached is an August 2012 memorandum prepared by the City of Urbana Illinois concerning a proposed text amendment in that city concerning firearms dealers and shooting ranges.

DOE disclaims any and all liability for personal injury or property damage due to use of this document in any context by any organization, group, or individual, other than during official government activities.

Local DOE management is responsible for the proper execution of firearms-related programs for DOE entities. Implementation of this document’s provisions constitutes only one segment of a comprehensive firearms safety, training, and qualification program designed to ensure that armed DOE protective force personnel are able to discharge their duties safely, effectively, and professionally. Because firearms-related activities are inherently dangerous, proper use of any equipment, procedures, or techniques etc., identified herein can only reduce, not entirely eliminate, all risk. A complete safety analysis that accounts for all conditions associated with intended applications is required prior to the contents of this document being put into practice.
CERTIFICATION

This document contains the currently-approved firearms "Range Design Criteria" referred to in DOE O 473.3, Protection Program Operations.

ATTACHMENT 1 -- RANGE DESIGN FIGURES .......................... Attachment 1-1
This page intentionally left blank.
1. **PURPOSE.** This document contains design criteria for U.S. Department of Energy (DOE) live-fire ranges for use in planning new facilities and major rehabilitation of existing facilities. This document will be approved and maintained by the Office of Security, Office of Health, Safety and Security (HSS) as a stand-alone document on the HSS website: [http://www.hss.doc.gov/SecPolicy/pfs.html](http://www.hss.doc.gov/SecPolicy/pfs.html).

2. **PLANNING FACTORS.** All applicable local, State, Federal, U.S. Environmental Protection Agency, Occupational Health and Safety Administration (OSHA), and National Environmental Policy Act requirements should be addressed and be reviewed annually (at least every 12 months) by the site to incorporate any requirements and/or changes that occur.

3. **PLANNING OVERVIEW.**

   a. **General Considerations.**

      (1) Live-fire range design should: (a) promote safe, efficient operation; (b) include provisions for ease of maintenance; and (c) be affordable to construct and maintain.

      (2) Live-fire ranges should be designed to prevent injury to personnel and to prevent property damage outside the range from misdirected or accidental firing and ricochets. They should also be designed to direct ricochets away from the firing line inside the range.

      (3) An open range may be established provided that enough distance and land area available to allow for surface danger zones (SDZs) appropriate for the weapons to be used. Lack of SDZs may require baffled ranges. Extreme weather conditions may necessitate indoor ranges.

   b. **Type of Range.**

      (1) Range requirements should be considered when determining the type and size of the range and the material to be used.

      (2) The range should be suitable for training and qualifications for all courses of fire used on the site as set forth in the HSS-approved Firearms Qualification Courses.

      (3) The range should be designed for shooting day and reduced-lighting DOE firearms courses, moving targets, multiple targets, and advanced shooting courses/activities (e.g., shooting at steel targets) that may be required by the site.
(4) When determining whether the facility will be an indoor, open outdoor, partially baffled, or fully baffled range, the decision-making process should include site weather conditions, available land, available funding, and environmental, safety, and health considerations. The following additional factors should be considered.

(a) How many shooters must be accommodated?

(b) Will emphasis be on training or competitive activities?

(c) What types of firearms and range of ammunition will be used? (See Table 1.)

(d) Will the facility be used exclusively by DOE or will it be open to other organizations?

(e) What special uses will be made of the facility: e.g., advanced training, special weapons, or explosives?

(f) What lighting will be required, and what lighting is desired?

(g) What administrative space will be needed?

(h) What types of target mechanisms will be used?

(i) Will spectator safety areas be needed?

(j) What types of acoustics will be needed?

(k) How will lead contamination be controlled?

(l) Where will bullet traps be needed?

(m) Where will firearms cleaning and maintenance be performed?

c. **Site Selection Preparation.** The site selected should accommodate the required facility. It should meet acceptable standards for safety and have sufficient space, access, and acceptable zoning and construction costs. Land acquisition costs, future land values, and possible restrictions should also be examined. To ensure the project is feasible the following data should be considered.

(1) **Documents.** Copies of specific site, environmental, and construction criteria; applicable mandated regulations from Federal, State, county, and local authorities; copies of ordinances, zoning regulations, soil conservation standards, health department requirements, and any other regulations that may pertain to the project should be obtained.
(2) **Alternate Sites.** Identify alternate sites, because one or more of the potential sites may be unsuitable or construction costs may be prohibitive.

(3) **Technical Data.** Gather technical data relevant to each site including zoning maps, aerial photographs, topographic maps, and onsite ground and aerial information.

d. **Considerations.** The criteria to be considered in this process are:

(1) environmental restrictions; e.g., Endangered Species Act, Wilderness Act, and air and water pollution criteria;

(2) access; e.g., is it adequate or should a roadway be constructed to the site;

(3) construction cost; e.g., berms, baffles, barriers, earth moving;

(4) other restrictive Federal or State statutes and local ordinances; and

(5) community growth, especially in areas where urban growth is rapid. Escalating property values may make it unwise to construct in a particular area.

e. **Preliminary Design Stage.**

(1) Prepare:

(a) a preliminary layout sketch of each site;

(b) a draft document, which should include specifications for applicable zoning, building codes, environmental, safety, and health considerations, and other pertinent restrictions;

(c) alternative preliminary site plans showing different range layouts;

(d) a planning cost estimate; and

(e) a risk analysis report.

(2) Submit all environmental, zoning and building permit applications for approval. Be prepared, via the draft document, to present and, if necessary, defend the proposal at public hearings before zoning boards, health officials, and other governmental bodies involved in issuing permits.

f. **Final Design Stage.**

(1) The preliminary site plans include a layout of the proposed range with its accompanying safety fan in a cross section and top view.
(2) The range master/manager, training manager, safety manager, industrial
hygienist, appropriate operating personnel and public works engineer
should review and approve the design requirements during the planning
phase, before the construction drawings are started, and during the
construction phase.

4. **OUTDOOR RANGE DESIGN.**

   a. **Site Selection.**

      (1) Outdoor range sites should be remote from other activities but accessible
          by road. SDZs should not extend across traveled roads, navigable
          waterways, railroads, or other areas.

      (2) To protect against unauthorized access, SDZs should be controlled while
          firearms are being discharged. To prevent future encroachment, SDZs
          should be recorded on site maps.

      (3) If other methods to control access to SDZs are not effective, then the
          zones should be fenced in. Natural barriers around the site; e.g., rivers,
          hills or a large drainage channel may be used to prevent encroachment and
          will ensure privacy. The best site is one with a natural backstop for
          projectiles to reduce the cost of constructing earth impact berms and to
          provide natural sound abatement.

      (4) Outdoor ranges should be oriented to eliminate firing into the sun. The
          range should be oriented to the north or slightly to the northeast. The ideal
          direction is between due north and 25° northeast.

   b. **Range Planning.**

      (1) Firing into upward sloping land and land with natural backstops of hills or
          mountains is recommended.

      (2) Firing platforms, access roads, and targets should be elevated above the
          flood level.

      (3) The line of fire in rough terrain should be perpendicular to high ground.
          The line of fire on flat terrain should be free of knolls, ridges, and trees
          that reduce visibility.

      (4) Known distance ranges should be as flat or evenly graded as possible. If
          the grade between the firing points and target does not exceed 2 percent,
          then the firing points may be below the target.

      (5) Roads used for setting and servicing targets in impact areas and for
          maintenance of earth berm may be graded pathways. Roads in areas not
          subject to disturbance; e.g., vehicle parking areas, and roadways behind
firing lines or out of range of weapons. should be designed for anticipated vehicle weight and usage.

(6) The ground between the targets and firing line should be free of any hardened surface (smooth-surfaced walkways excepted) such as rocks or other ricochet-producing material.

(7) The surface may be sodded or planted with low-growing ground cover.

(8) The surface should be smooth, firm, and graded to drain away from the targets. A slight side-to-side grade of 1 percent to 2 percent should be provided for storm water runoff. For baffled ranges, the lateral slope should not exceed 2 percent because of the geometry of the baffle system.

(9) The overall size will be governed by the range distance and number of firing positions.

(10) Range distances from the firing line to the target are determined by the approved DOE qualification courses of fire for all weapons available for use by Protective Force (PF) personnel and by site-specific training courses of fire. The distances from the firing line to the target should be accurate to ±.01 percent. It is important that any inaccuracy in the firing line-to-target distance is a greater, rather than lesser, distance (e.g., 101 yards for a 100-yard range instead of 99 yards).

(11) Shooters should have secure footing.

c. **Surface Danger Zones.** SDZs should be established to contain all projectiles and debris caused by firing ammunition and explosives (see Table 1). SDZ dimensions are dictated by the types of ammunition, types of targets, and types of firing activities allowed on the range. A basic SDZ consists of three parts: impact area, ricochet area, and secondary danger area (Figure 1). Figures 2 through 6 illustrate the application of the basic parts in the design of SDZs for various kinds of range activities.

(1) The primary danger area established for the impact of all rounds extends 5° to either side of the left and right limits of fire and downrange to the maximum range of any ammunition to be used on the range.

(2) The ricochet area is 5° to either side of the impact area and extends downrange to the maximum range of any ammunition to be used on the range.

(3) The secondary danger area is that area paralleling, and 100 yards outside of, the outermost limits of the ricochet area and extending downrange to the maximum range of any ammunition to be used on the range.
(4) Boundaries of SDZs must be posted with permanent signs warning persons of the danger of the live-fire range and prohibiting trespassing. The signs must be posted in a way that will ensure a person cannot enter the SDZ without seeing at least one legible sign (i.e., usually 200 yards distant or less).

(5) Limit of fire markers, both external and internal, must be placed to denote right and left limits of fire. Where cross firing is to be conducted, internal limit markers must be emplaced to denote internal right or left limits of fire from specific firing positions.

(6) Ranges may be located parallel to one another if in compliance with Figure 19 for separation.

(7) When there is insufficient distance to lay out a new range with the required SDZ or utilize other ammunition with a maximum range that does not exceed the SDZ, engineered or administrative controls can be used to control firing on that range. Permission to deviate from established SDZ requirements must be granted by the DOE cognizant security authority and supported by a safety risk analysis.

(8) Administrative controls such as use of the low-ready position or engineered controls such as muzzle traverse/elevation limiters can be used to control the firearm. Natural terrain such as a mountain or a hill provides an excellent backstop for firing. The terrain should be high enough to capture rounds fired at up to a maximum 15° muzzle elevation.

(9) To change the size and shape of an SDZ, baffles may be installed. Partial and full baffle systems consist of the following components: overhead baffles, a canopy shield over firing points, bullet impact Berm, and side berms, sidewalls, or side baffles. A fully baffled range must be constructed so all direct fire can be contained within the range (see Figures 7 and 8).

d. **Support Facilities.** Range planners should consider the site-specific need for the following range support facilities.

(1) Targets.

(2) Target storage.

(3) Bunkers, trenches, and protective barriers for personnel protection.

(4) Range control towers.

(5) Toilets.

(6) Range poles, banners, markers, and signs.
(7) Communication systems.
(8) Access and range roads.
(9) Parking areas.
(10) Potable water.
(11) Target maintenance.
(12) Ammunition storage.
(13) Power.
(14) Sewer.
(15) All other necessary utilities.

</table>
e. **Design Criteria.**

(1) **Firing Line Items.** Provide the following components:

(a) **Floor Surface.** The surface should be smooth, firm, and graded to drain away from the targets. A slight side-to-side grade of 1 percent to 2 percent should be provided for storm water runoff. Transverse firing line grading should match target line transverse grading. The distance between the firing line(s) must be sufficient to support the type of training conducted. Firing lanes must be clearly marked on the surface to match the targets. Depending on the number of personnel to be supported and the funds available, the following surfaces should be considered:

1. ground firmly compacted with mown grass;
2. sand or fine gravel;
3. wood decking of sufficient thickness and support to prevent movement; and
4. concrete topped with appropriate cushioning material.

(b) **Overhead Containment.** On partially and fully baffled ranges, a ballistic canopy (see Figure 9) should be provided over all locations where a weapon may be expected to be discharged (firing line, by definition). Figure 9 represents one construction approach, but the canopy must contain the direct fire effects of the most energetic round fired on the range. This canopy should begin at least 3 feet behind the firing line. General structural requirements may dictate more distance. The canopy should extend forward a minimum distance of 13 feet minimum, which will work geometrically with the first overhead baffle to prevent a weapon from firing directly out of the range (see Figures 16 and 17). The canopy should be constructed of ballistic material with sacrificial cladding as described below. Sound reduction ceiling waffles should be considered. Weather roofing is required above the ballistic material and it must slope sufficiently to drain.

(2) **Firing Point.** The depth of the firing point is determined by the shooting activity; e.g., rifle firing requires more depth than pistol firing.

(a) The minimum depth of the firing point is the area required for the shooter, shooter’s equipment, scorers, and range officers. For example, a pistol range might have a firing line approximately 6 to 10 feet deep, while a rifle range would have a firing line up to 20 feet deep. This variation is based on available space, type of
shooting, size of target frames and carriers, and the spacing of
target frames or carriers.

(b) For rifle ranges, each firing point should be 9 feet wide (see
Figure 10). Firing lanes for pistols and shotguns should be 5 feet
center to center (see Figure 11).

(3) **Ballistic Material.** The purpose of this material is to absorb, deflect, or
fragment projectiles. Material for baffles on partially and fully baffled
ranges is shown in Figures 12 and 18. Wood that is used should be of
middle grade exterior timber or plywood. Timber in contact with the
ground must be pressure-treated for this purpose. Avoid exposed
connectors if possible. Refer to Table 2, Thickness of Material for
Positive Protection Against the Caliber of Ammunition Listed, for the
thickness of various materials.

(4) **Sacrificial Cladding.** Provide ⁷⁄₈-inch thick plywood with a ¹⁄₄-inch air gap
on any surfaces (baffles, wing walls, metal connectors, etc.) that are within
11 yards of the firing line to prevent back splatter.

(5) **Firing Line Cover Material.** The firing line should be covered to protect
the shooter and allow activities to be held regardless of the weather. On
ranges with several firing lines, the cover is generally installed at the
longest firing distance. The firing line covers described below are for
shelter only and should not be confused with the ballistic firing line
canopies required on baffled ranges. Material that can be used for firing
line covers includes wood, concrete, steel, and plastic. Most covers are
constructed from wood products and are a shed or gable roof design. In
some cases, corrugated metal or fiberglass roofing material can actually
increase sound levels at the firing line and in areas around the range.
Therefore, to reduce noise, corrugated metal or fiberglass roofing material
should not be used unless it is acoustically treated. The structure should
be designed to include the following:

(a) The shed roof should have a 6-inch cavity filled with fiberglass
insulation (or equivalent) and be enclosed on the bottom with
⁷⁄₈-inch plywood or insulation board. Although this will not
provide a completely effective sound barrier, sound waves will
strike and penetrate the inside layer of plywood, and the sound will
be reduced;

(b) A plywood shed roof should have a 6-inch hollow core enclosed
with a small grid mesh screen and a six-mil polymer barrier to
retain the insulation. The intervening space should be filled with
blown-in insulation to trap sound waves and reduce the drum effect
of an open roof; and
(c) A gable roof has a large hollow area above the joists; however, additional sound damping materials should be installed to reduce the drum effect and the sound pressure level as they are reflected onto the firing line area. The underside of the roof surface will require a minimum of 4 inches of insulation to fill in between the rafters and a minimum of 3 inches of insulation above the ceiling and between the joists. This will reduce the drum effect caused when sound waves strike surface material (e.g., corrugated metal) and will absorb a portion of the reflected sound waves.

(6) Surface Material. Positions should be hard-surfaced (e.g., concrete, gravel, wood, asphalt, or sod).

(a) For ranges where prone shooting is conducted, gravel or similar materials may cause difficulty for the shooter. When the surface material is concrete or asphalt, shooting mats or padding will be required when the kneeling or prone positions are used.

(b) For ranges with multiple firing lines, hard-surfaced firing lines located downrange of another firing line should be recessed or shielded from bullet impact to avoid ricochets off exposed edges.

(7) Landscaping. The site should be landscaped to provide for erosion control, noise abatement, maintenance, appearance, fire protection, and safety.

NOTE: Any landscaping will complicate the removal of lead in the berms, especially on impact surfaces, and will create higher maintenance costs.

(a) Berms should be planted with grass to prevent erosion. Ground cover is acceptable on existing berms that have been maintained and where erosion is not a problem.

(b) When grass is selected as a ground cover, it should be appropriate for the geographic area and should readily grow and provide good coverage. The degree of shading caused by overhead baffles will determine the type of grass for the range floor. Use grasses and cover for earth berms that will not be accessed by moving equipment so that natural growth heights will be acceptable. In areas where the soil is poor or extremely sandy, plants such as Bermuda grass, ice plant, or vine root can be used to control soil erosion.

(c) Heavy landscaping may be used to cut down on noise transmission. Plants and trees may be planted behind the firing position shelters to alleviate noise transmission problems.
Soundproofing the firing line structures should be considered in problem areas. Trees should be kept away from firing lines to allow range control officers to see all shooters.

(d) For windbreaks, trees may be planted along the length of the range with partial side berms or wing walls where strong prevailing crosswinds are problems to shooting accuracy.

(e) Densely planted rows of fast-growing, compact, and thorny shrubs may be planted below the trees at ranges with partial berms or wing walls to abate noise, prevent encroachment, and alleviate crosswind problems.

(8) **Target Line and Mechanisms.** Components must be as follows:

(a) The target line should be a minimum of 30 feet from the toe of the impact berm. The distance between targets must be the same as the distance between firing positions.

(b) Target line bases must match grading with the firing line. Mechanical target support bases must be protected from the direct line of fire. They may be buried flush with the ground or placed behind a protective wall. Note that a small raised earth berm at this location generates significant ricochet. The complexity of the mechanism will dictate the protection requirement. See Figure 13 for wall or trench protection of high cost target line mechanisms.

(c) Target supports can be made of steel angles and channels, PVC pipe or wood. Do not use metal parts within 33 feet of the firing line where direct fire strikes are anticipated. Discharging weapons close to metal surfaces is extremely dangerous. Present the smallest surface area that is structurally sound to the line of fire to minimize ricochet. Design the target holders for easy and inexpensive replacement. Portable, self-supporting 2- by 4-inch wood frames or 2-inch by 2-inch wood plank placed into buried PVC pipe work well on simple ranges. The full face of the target must be visible to the shooter.

(d) Turning targets and the display time are at the discretion of the user. Commercially available, electrically motorized target carrier and electronic scoring systems should be considered where economically feasible.

(e) On open ranges, a single target line with multiple firing lines is preferred. On partially or fully baffled ranges, in most instances, a single firing line with multiple target lines will produce the most cost-effective range because of the firing line canopy. An
(9) **Impact Structures.** The structure varies depending on the type of range. Natural terrain such as a mountain, cliff, or steep hill may be incorporated into impact structures provided the completed structure complies with the minimum design requirements. Acceptable structures by range type are listed below.

(a) For open ranges, the top elevation of the earth impact berm should be 26 feet above the range surface for ranges 100 yards long or longer and 16 feet above the range surface for ranges 50 yards long or less. The impact berm should extend 50 yards beyond where the target line ends for 100-yard-long ranges or until joining with the side containment, if provided for ranges 50 yards long or less.

(b) The suggested elevation may be met by designing a combination of earth berm and vertical baffle (see Figure 14). The earth berm portion should have a top elevation of 16 feet above the surface of the range. The vertical baffle should be constructed of ballistic material and designed to withstand local seismic and wind loads. This combination arrangement would reduce the footprint and the amount of material in the earth berm.

(c) The preferred slope of the impact berm face is 1 to 1 or steeper. The steeper the slope, the more likely the berm is to absorb projectiles. The top should be 10 feet wide. The impact slope should be constructed with a 3-foot layer of easily filtered soil (to reclaim the lead projectiles) free of boulders, trees, rocks, stones, or other material that will cause ricochet. The rear slope should be appropriate to the native soil and maintenance requirements.

(d) For partially and fully baffled ranges, the top elevation of the impact structure will vary depending on the overhead baffle and impact structure arrangement. The impact structure for a partially baffled range can be: standard impact berm, bullet trap, or hybrid. For fully baffled ranges, the impact structure must be a bullet trap. In all instances, the impact structure must connect to the side containment. The top of the berm should be at an elevation 5 feet above the point where the highest line of direct fire can strike the berm.

(e) Outdoor baffled bullet stops can be constructed by placing the last vertical overhead baffle over the last target line and placing a sloped baffle to connect from the top of the earth berm to the back of the last vertical baffle. The bottom of this lower-sloped overhead baffle should be 2 feet above the highest point on the
berm where direct fire might strike. See Figure 15 for material and construction details. Rainfall runoff from the sloped baffle onto the berm must be considered. (See “Use of Bullet Traps and Steel Targets” for Shoot House bullet trap information.)

(10) **Side Containment.** For partially and fully baffled ranges (Figures 7 and 8), the top elevation of the side containment must geometrically mate with the overhead baffles to be high enough to prevent any direct fire from exiting the range. Full-side height containment should extend 3 feet to the rear of the firing line. Locate the side containment at least 10 feet outside of the centerline of the outermost firing lane. Construction may be in the following forms.

(a) **Earth Berm.** Construct earth berms to an inside slope of 1 to 1.5. If native soil characteristics will not produce a stable slope at this angle, provide geotechnical fabric reinforcement in the fill. The top width of the berm should be at least 10 feet. No rocks are permitted in the top 3 feet of the inside surface. Generally, earth berms cannot be used on partially or fully baffled ranges; however, earth berms are permissible if the firing range is small and the overhead baffle and berm geometry intercept ricochets.

(b) **Continuous Walls.** Construct continuous walls of ballistic material to withstand local wind and seismic loads. Provide sacrificial cladding to 13 feet forward of the firing line and 3 feet behind the firing line. Continuous walls are preferred for fully baffled ranges.

</tbody>
</table>

**NOTE:** Figures are based on new material. Degradation may occur over time.

(c) **Wing Walls.** Wing walls (side baffles) are discontinuous side protection set at 45° to the line of fire. Locate the wing walls so that they are overlapped by 6 inches based on any line of fire that may strike them. Construct the wing walls of ballistic material to
withstand wind and seismic loads. Additionally, provide sacrificial cladding on wing walls closer than 30 feet to the firing line.

(d) **End Walls.** End walls may be constructed at the firing lane edge on the firing line in lieu of extending side containment 3 feet behind the firing line. Walls should be long enough to close off any line of sight between the end of the side containment and the rear 3 feet mark. The end walls should be constructed of ballistic material with sacrificial cladding extending from the canopy to the firing line surface.

(11) **Overhead Baffles.** Overhead baffles must be located so that no direct fire can exit the range from any firing position. The first overhead baffle must be geometrically coordinated with the firing line ballistic canopy (see Figure 9). The elevation of the top of each succeeding baffle should be 6 inches higher than a line of fire that just clears beneath each preceding baffle (see Figure 16). Overhead baffles should be the same height and spaced apart down range to achieve the required geometry (see Figure 17). The last baffle should be placed so the line of fire will strike the impact structure no higher than 5 feet below the top elevation of the structure. On a fully baffled range, the last overhead baffle must be over the last target line.

(a) On partially baffled ranges, overhead baffles must extend laterally to within 1 foot of the side containment. On fully baffled ranges, the overhead baffle must tie into the side containment.

(b) The vertical dimension of an overhead baffle when it is vertical varies with the number and spacing of the baffles. Normally, the height is between 5 and 8 feet when considering structural support size and costs.

(c) The baffles must be constructed of ballistic material. Baffles within 11 yards of the firing line should be covered with sacrificial cladding. See Figures 12 and 18 for possible configurations.

(d) Space the structural columns as far apart laterally as possible to open firing lanes. If possible, do not construct columns within the range. Design columns or beams to withstand local wind and seismic loads, and provide protective steel plate on the faces of the columns exposed to the firing line in accordance with Figures 12 and 18. Provide sacrificial cladding if the column is within 10 yards of the firing line. Overhead baffles may be placed on a flatter slope and overlapped to function as firing line canopies if multiple firing lines are to be used (see Figure 17). This arrangement is cost-effective for baffled combat lanes.
5. **INDOOR RANGE DESIGN.**

   a. **Use of Indoor Ranges.**

      (1) Indoor ranges must be designed so projectiles cannot penetrate the walls, floor or ceiling, and ricochets or back splatter cannot harm range users. Considerations should be made for cleaning of all surfaces and handling of hazardous wastes.

      (2) Lead exposure requirements must be reviewed for applicability.

   b. **Site Selection.**

      (1) **Walls and Partitions.** Indoor ranges must incorporate walls and partitions capable of stopping all projectiles fired on the range by containing or redirecting bullets to the backstop.

      (2) **Existing Buildings.** If there are existing drawings of the facility, copies should be obtained from the original owner, architect, engineer, builder, or building permit. If original drawings of the building are not available, a sketch can be made of each floor of the building with a special emphasis on the load-bearing walls. The following considerations should be used when making the initial evaluation of an existing building.

         (a) **General Construction.** Buildings constructed of wood products should be avoided. Modifications to reinforce the structure to support metal backstops or to reduce fire hazards may not be cost-effective.

         (b) **Exterior Walls.** The type of exterior wall construction (e.g., masonry, wood, concrete, metal, combination, other) should be identified. Masonry buildings should be given primary consideration, especially those constructed on concrete slabs.

         (c) **Floors, Walls, and Ceilings.** Floors, walls, and ceilings must be able to contain the sound in addition to the bullet fired.

            1. The ideal wall is made of poured concrete a minimum of 6 inches thick.

            2. To aid in range cleaning, concrete floors should be finished so they have a nonporous surface.

            3. Ceilings should be 8 feet high and enclosed to reduce air turbulence created by ventilation systems.

            4. Evaluate the structural support designs of older buildings for their ability to withstand new loading. Original design
considerations usually do not allow for installing heavy backstops and other range equipment.

5 To decide if modifications are necessary, slab buildings must be analyzed carefully to determine the capacity for floor loading. If there are no floor drains and it is economically feasible, modifications should also include adding one or more floor drains.

6 Ceiling joists may require strengthening to support baffles and shielding material.

(d) **Electrical.** Electrical needs may require the installation of heavy-duty wiring both internally and externally to accommodate the added power needs of range ventilation, heating, lighting, and target-carrier mechanisms.

(e) **Plumbing.** Plumbing does not usually require major modifications, however, heavy metals may be prohibited from area wastewater treatment collection systems. Therefore, an approved filtration system may be necessary for disposal of hazardous waste material; e.g., lead.

(3) **Precast Buildings.**

(a) Precast concrete companies can provide complete precast buildings (job site-delivered) if engineering specifications for steel placement are provided on a set of plans (drawings) for the proposed building.

(b) Precast assembly allows for installation of a roof design more suitable for an indoor range. Gabled or hip roof designs should not be used.

(c) Hollow, precast concrete panels provide an option to bar joists, eliminating bullet ricochet or splatter. A flat bar joist design is the recommended alternative to hollow, precast concrete panels.

(d) The flat roof design also provides support for heating, ventilating, and air conditioning (HVAC) equipment outside of the range, which saves space and reduces cost.

(4) **New Construction.** New indoor construction projects require the same guidelines as existing buildings; however, they offer the advantage of building a structure specifically for use as an indoor shooting range.
c. **Range Planning.** Design work for ventilation, wall structures, floors, ceiling, acoustics, backstops, and lighting will depend on how the range will be used.

(1) A determination for the type of building required includes the following considerations.

(a) Can the range be built in an existing building or is a new one required?

(b) How large should it be?

(c) How many shooters will it be expected to serve?

(d) Will it be used for competition?

(e) Should space be allowed for classrooms?

(f) How much will the facility cost?

(2) The planning process should include:

(a) obtaining ordinances, zoning regulations, building codes, soil conservation regulations and other information pertaining to legal requirements;

(b) for evaluation, identifying a site for a new building or several existing buildings that may have the suitable design characteristics; and

(c) gathering other technical information relevant to the project. This information includes zoning requirements, onsite information, and range design criteria. Local zoning codes or health department regulations normally will provide answers or solutions on how the project is to be handled.

d. **Design Criteria.** Based on the site selected, type of shooting, number of users, and site layout, the next step is to design the facility by preparing detailed drawings showing specifications and necessary dimensions. The four main considerations for indoor ranges are shooter needs, type of shooting activity, number of firing points, and number of users. Special consideration should be given to ventilation, lighting, safety baffles, and backstop design. The following standard and optional features for indoor ranges should be considered.

(1) **Backstops and Outdoor Baffled Bullet Stops.** See “Use of Bullet Traps and Steel Targets” for Shoot House bullet trap information.
(a) The design of a backstop or baffled bullet stop is a contributing factor to the service life of the unit. Steel should be installed according to the type of ammunition to be used and to proven angle configurations.

(b) The design criteria should be based on the planned use of the facility. Metal plates selected for use in a backstop or baffled bullet stops must resist repeated stress according to the degree of stress applied. Necessary characteristics are resistance to abrasion, resistance to penetration, surface hardness, thickness, and alloyed strength to resist metal fatigue.

(c) The main backstop is generally a fabricated steel plate or series of plates used to stop bullets fired on a range. Backstop configurations and plate thickness will change according to type of shooting activity.

(d) Steel backstops with sand or water pits are common; however, a few indoor ranges use earthen or sand backstops.

CAUTION: Earthen or sand-filled backstops are not recommended because they can create health hazards for maintenance workers from silica and lead dust. They also cause excessive wear on ventilation fans.

(e) Backstops must extend from side to side and from ceiling to floor to protect the end of the range completely from penetration by direct bullet strike and prevent ricochets, back splatter, and splatter erosion of side walls.

(f) Four basic backstop designs are used for indoor ranges: Venetian blind, escalator, Lead-a-lator, and the angled backstop (45°) back plate. Other backstop designs exist and should be researched for applicable use.

1 Venetian Blind Backstop. Requires less space, but without proper installation and regular maintenance it can cause back splatter problems from exposed edges of each main segment of the backstop. Keeping the exposed edges ground to original specifications is time-consuming, difficult, and requires skilled personnel.

a To control back splatter, a curtain should be hung in front of the backstop. Tests have been conducted on materials including canvas, burlap, cardboard, insulation board, and synthetic rubber. Properly installed, these materials effectively stop back
splatter. Walls using insulation board or a synthetic rubber curtain are best.

b The main advantage of the venetian blind backstop is minimal space requirements. While an angled plate or an escalator will use 14 feet of space, the venetian blind uses only 5 feet.

2 Escalator Backstop. Sets up with flat steel plates laid out on a framework sloping away from the shooter. Between each series of plates, an offset allows a bullet sliding down the facing surface to drop into a hidden tray for easy cleanup. At the top or back of the backstop, a swirl chamber is provided to trap the bullets or bullet fragments as they exit the backstop surface. Once the bullet’s flight ends in a spin-out chamber, the bullet or pieces fall into a cleanup tray.

3 Lead-a-lator®. A variation of the escalator-type backstop that uses a curved instead of flat piece of steel. The surface is concave and operates so that a bullet will follow the contour of the surface into a dry lead spinout chamber where it is trapped.

4 Angled Backstop (or 45° Inclined Plates). Uses a sand or water trap and has been the traditional alternative for indoor ranges.

a The angle of the plate should never exceed 45° from the ground. The 45° plate and pit backstop is relatively inexpensive, but there are several disadvantages. Sand traps require frequent cleaning to remove bullet fragments. Cleaning operations require workers to wear high-efficiency particulate air (HEPA) filter masks if material is removed dry. It is best to dampen the sand trap material before and during cleaning operations to eliminate dust. To maintain a healthier internal environment, frequent removal, disposal, and replacement of lead-laden sand is required. The surface should be continually raked to keep the sand level and to guard against splatter as lead buildup occurs.

b The cleaning operations are easier when a water trap is used. However, a water trap requires chlorine and other chemicals to retard algae growth and antifreeze in colder months to prevent freezing.
Installing a water pit requires a different approach to foundations and footings, especially in areas affected by earthquakes or freezing.

(2) **General Range Cleaning.** Both dry and wet methods can be used to clean the range. The method selected depends on the frequency of use. The wet method is preferred when floor drains are available, and keeping materials wet during cleaning operations reduces or eliminates release of microscopic dust particles. When dry methods must be used, workers must use the appropriate personal protective equipment (PPE) that has been established by local industrial hygiene personnel. After cleaning operations are complete, workers must shower and have work clothing laundered.

(3) **Backstop Steel Plate Specifications.**

(a) Steel plates supported by concrete or masonry should be anchored by expansion bolts or toggle bolts, as suitable for construction, with flush countersunk heads not more that 12 inches on center of all edges of each plate. Joints and edge lines should be backed with continuous ½-inch thick plate no less than 4 inches wide. Bolts should pierce both the facing and back plates. Expansion bolts should penetrate concrete not less than 2 inches. Steel plates must have milled edges at all joints.

(b) Joints must be butted flush and smooth. After the plates are erected, they must not have any buckles or waves. Exposed edges must be beveled at 42° to a fillet approximately ½-inch thick. There must be no horizontal joints in any steel plate work.

(c) Welding must meet the American Welding Society code for welding in building construction. Steel plates joined at, and supported on, structural steel supports must be spot-welded to steel supports not more than 6 inches on center.

(4) **Baffles, Deflectors, and Shields.** Baffles on indoor ranges protect lighting fixtures, HVAC ducts, ceilings, and target carrier apparatus. Baffles are designed to protect against the occasional errant bullet but not for repeated bullet strikes.

(a) To cover or protect vulnerable ceiling areas or range fixtures, baffles must extend the entire width of the range and downward. Spacing of baffles on a 50 to 75 feet range depends on the ceiling design. Range distance (firing line to target line) and height are factors. Ceilings must be impenetrable.
(b) Baffles or deflector plates must be used when modifying an existing building, especially in a building constructed of wood. This will prevent bullets from escaping or penetrating. Baffles should be a minimum of 10-gauge steel covered with a minimum of 1 inch of soft wood to prevent back splatter. The wood traps the projectile whereas bare steel redirects it downward into the range area. A wood surface must be applied to overhead baffles, because ranges with untreated baffles usually show significant damage to concrete floors and often complete penetration through wood floors.

(c) Baffles should be installed at a 25° angle as measured from the horizontal plane of the ceiling. The baffle size and placement depends on what surface areas require protection. For example, ceiling baffles are wider than side baffles.

(d) Unlike baffles, deflectors are installed vertically and horizontally to redirect wide-angle shots into the backstop area. Deflector shields protect pilasters, leading edges of sand traps, bottom edges of backstops, doorways, windows, ventilation registers along the wall, etc. Deflectors are not covered with wood generally, but may be. These devices are also installed at a 25° angle either to the wall surface or floor.

(e) To protect ceiling areas, special impenetrable shields are installed above the firing line, especially in wood frame buildings.

1. Shields should extend the entire width of the range and 12 feet forward of the firing line. Floor shields may be required on wood floors.

2. Shields must be constructed from metal sheets according to planned use. For example, 10-gauge steel covered with a minimum of 1 inch of soft wood is effective in stopping most pistol calibers.

(5) **Floors, Walls, and Ceilings.** Indoor range facility floors, walls, and ceilings must be impenetrable; therefore, an existing building must have a structural analysis to determine loading factors that may exceed original design specifications. Wooden buildings may require modifications to support the increased weight. Specifications for new construction call for either poured-in-place concrete, pre-cast concrete, or dense masonry block. Solid cinder block should be used in place of hollow-core block. Specifications for modifying existing buildings call for adding additional materials to prevent bullet escape, which can be done with wood and steel laminated shields. Laminated shields can be constructed onsite by placing sheet-steel or steel plates between two sheets of ¾-inch plywood.
this method is more expensive than the extended booth design. It allows for an open firing line and better visibility for the range officer. Walls should be treated beginning 3 feet to the rear of, and extending forward of, the firing line until all vulnerable surfaces are protected. Acoustical material should be applied to the surfaces to aid in sound control.

(a) **Floors.** The range floor should be constructed by using a single pour and a fine, uniform-aggregate mix of concrete. Reinforcement should be No. 4 steel rods placed 12 inches on center along with 6- by 6-inch 8/8-gauge welded wire fabric. This may vary according to soil conditions. Very large floor areas may require two or more pours with expansion joints between each slab.

1. The floor should be designed to slope down toward the target line, beginning at the firing line. ¼-inch per foot.

2. The floor should be no less than 4 inches thick.

3. Floor size is governed by design. Larger size will result in higher costs for ventilation, lighting, heating, and overall building design. The decisions should be based on expected number of users versus overall cost.

(b) **Floor Guards.** Floor guards are provided to protect leading edges or protrusions; e.g., drains, traps or other protrusions from the floor area. Floor guards are designed to redirect errant bullets into the backstop area, which minimizes range damage.

1. Floor guards are constructed from 10-gauge steel and may be covered with wood.

2. Floor guards are installed horizontally along the floor surface parallel to the firing line.

3. Floor guards typically slope away from the firing line at a 25° angle to the horizontal.

4. Floor guards should extend only as high as necessary to protect exposed surfaces.

(c) **Floor Drains.** Floor drains should be constructed of cast iron soil pipe. The drain pipe should be attached to a lateral drain located 1 foot forward of the backstop floor guard. The drain pipe must lead to a filtration system approved by the cognizant environmental, safety, and health organization on the site.
(d) **Walls.** Poured concrete or masonry is preferred for wall construction, but wood may be used. Wall thickness must conform to acceptable engineering standards and comply with Federal, State, county and local zoning codes. Usually, no less than 3-inch thick, reinforced walls should be constructed to prevent the exit of any projectiles.

**NOTE:** This specification usually requires the use of steel or similar material where wooden walls are used. The size depends on building design, geological conditions, and climate. Size includes the height, thickness, and length of the running wall.

(e) **Ceiling.** Ceiling material should reduce sound, protect lighting devices, reflect light and be impenetrable. Typically, ceilings include 10-gauge steel baffles, 2- by 4-feet white acoustic panels, and clear-light panels.

1. The ceiling should be a minimum of 8 feet above the floor level and have an acoustically treated, smooth surface to allow for positive air movement downrange.

2. Baffles to protect adjoining areas should be above a false ceiling or designed into the roof/ceiling structure.

(6) **Shooting Booths.** Commercial or locally built shooting booths may be desirable on pistol ranges; however, they are not recommended for rifle ranges. Shooting booth panels can provide an impenetrable barrier between shooters, reduce sound levels, restrict the travel of brass, and act as a spray shield when revolvers are used.

(a) Shooting booths should be omitted for ranges that use only rifles.

(b) A shooting booth should never extend more than 18 inches behind the firing line because greater extension may obstruct the range control officer’s visibility.

(c) Bullets fired from any firearm used on the range must not be able to penetrate booth panels. The booth panel must be able to withstand the impact of a bullet fired at any angle to the surface and at point-blank range.

(d) Design criteria for the construction of booth panels are as follows:

1. Cover the 10-gauge steel plate with a nominal 2 inches of soft wood. In a series of tests using 10-gauge steel plate, firing all lead bullets at right angles, the plate covered with a nominal 2 inches of soft wood withstand direct hits from
all standard pistol calibers up to, and including, .44 caliber magnum;

2. Use special acoustical materials to ensure that panels reduce muzzle blast effects on all shooters and range personnel;

3. Ensure that panels do not restrict airflow;

4. Ensure that panels do not restrict the range officer's visibility of the firing line; and

5. Construct panels so they extend from the floor to a minimum height of 6 feet. Panels should be ceiling height.

(7) **Target Carriers and Turning Mechanisms.** An indoor range can be operated more efficiently and safely by installing a target transport system. This system may be a simple, hand-made device or a completely automatic, electrically powered system. Either one will enhance safety by eliminating the need to walk downrange to replace targets. Target carrier systems speed up range operations. A turning target mechanism is available that faces the target parallel to the line of sight and then turns the target 90° to the line of sight to begin the stated time period. The target carriers should position the targets in the approximate center of the backstop.

(8) **Control Booth.** Range control booths must allow for maximum visibility and provide for easy access into and out of the range and ready area. The control booth should provide seclusion from and immediate access to the range environment. This design protects the range officer from frequent exposure to high sound levels and lead emissions.

(9) **Communications.** A communications system capable of relaying range commands distinct and separate from the sounds generated by shooting activities is required. Communications systems must account for shooters who wear two pairs of hearing protectors and persons who have substantial hearing loss.

(10) **Ventilation and Filtering Systems.** This section deals with the design or redesign of ventilation systems for indoor firing ranges. Administrative or engineering controls must be instituted to prevent shooters from being exposed to airborne lead levels exceeding acceptable limits. Administrative controls are used either when engineering controls fail to reduce exposure or when range use exceeds HVAC system specifications. Administrative controls are especially applicable to reducing risks on existing ranges.
(a) Administrative controls used to reduce exposure levels on an indoor range must be rigidly followed and enforced, and compliance must be recorded in a log book for purposes of analysis and reference.

(b) The following administrative controls are provided and must be used where individuals are frequently exposed to airborne lead.

1. Provide range maintenance personnel with appropriate PPE: e.g., safety glasses and respirators.

2. Provide proper HEPA filter cleaning equipment. The equipment must be able to remove accumulated lead dust from floors, walls, and ledges and must include attachments capable of removing lead-laden sand from the backstop area.

(c) A ventilation system must be installed that will provide clean air in the user’s breathing zone to reduce exposure to potentially dangerous materials to safe levels.

(d) Adopt administrative controls that monitor and control exposure time for a given user and/or assigned range personnel.

(11) **Lighting.**

(a) A visually safe facility should be free of excessive glare and major differences in light levels. Therefore, floors and ceilings should be designed to provide light reflection. In the event of a power outage, battery-powered emergency lighting must be provided for emergency exits.

(b) Rheostat-controlled lighting fixtures, which can reproduce near-daylight and low-light conditions, are best suited for indoor ranges. Range lighting involves three systems: general lighting, local lighting, and semi-direct lighting.

1. General lighting provides uniform light levels over the entire range area and adjoining areas and is usually installed in a symmetrical arrangement to blend with the architecture.

2. Local lighting supplements general lighting along the firing line to provide better visibility for those tasks associated with the loading and firing of firearms.

3. Semi-direct lighting distribution directs 60 to 90 percent of the lighting on the target with a small upward component to
reflect from the ceiling and walls to soften shadows and generally improve range brightness. When ceilings are white, lighting fixtures mounted too close together create excessive glare.

(c) Lamp specifications for general lighting must be adjustable to provide 0.2 to 50 foot-candles of luminance measured at a point 7 yards from the target line. Local lighting should produce 0.2 to 60 foot-candles of luminance on the firing line. Semi-direct lighting on the targets should achieve 0.2 to 100 foot-candles of luminance. Glare should be reduced or eliminated by incorporating pastel colors in the interior design.

(d) Lighting designs should also seek to balance the color of light emissions. For example, most fluorescent fixtures produce high levels of blue, which alone are not suitable for indoor ranges. If fluorescent fixtures are used, green tubes or other light sources should be installed to balance the colors.

(12) **Plumbing.** Plumbing requirements specify that there must be a fresh water supply for personal hygiene and for range cleaning chores. There also must be a waste removal system for normal waste material and material removed from the range. An approved filtration system must be provided for range cleaning waste. Floor drains should be connected to this alternate waste system. Restrooms, showers, and sinks should be connected to a regular sewer system.

(13) **Sound Control.** Sound control on indoor ranges includes two distinct components: airborne and structure-borne sound. For airborne sound, all leaks into outer areas should be sealed, which includes airtight insulation around doors, windows, HVAC ducts, walls, and ceilings. Structure-borne sound reduction is necessary to protect adjoining, occupied rooms. Acoustical material should be applied to walls, HVAC ducts, floor, and ceiling areas.

(14) **Range Control.** Range control provides rules and supervision that encourage safe and proper use of a range. Safety devices control the physical use of an indoor range and may include warning lights, alarm bells, switch locations, etc. For example, an indoor range with a door in the downrange area should be equipped with an alarm. The door could also be secured by a mortise lock or barred from within but must remain a fire exit. Fire codes generally prohibit bars on doors that would delay escape from a building. Emergency personnel must be able to access the doors. Any door that can be accessed from the outside must be marked with warning devices to indicate when the range is in use. When installing doors on indoor ranges, refer to Life Safety Code National Fire Protection Association (NFPA) 101.
(15) **Target Carriers.** Target carriers are used for the convenience of shooters to allow them to continue shooting without delay when target changes are necessary. For health considerations, target carriers keep shooters out of the high lead concentration areas and safely behind the firing line.

(16) **Heaters.** Protected heating units should be installed behind and above the firing position to provide a comfort zone for shooters.

(17) **Gun Racks.** Gun racks should be mounted behind the firing positions as an additional safety feature to reduce gun handling and to keep the range areas orderly. Appropriate material should be used to construct the gun racks, and the design must correspond to the weapons being used.

6. **LIVE FIRE SHOOT HOUSE.**

   a. **Introduction.**

   (1) A live fire shoot house (LFSH) is intended for use in advanced tactical training for Security Police Officers. Use of this facility includes individual tactics or Special Response Team force option training. All LFSHs must have an elevated observation control platform (EOCP). The following sections illustrate recognized construction methods for LFSHs. However, they do not eliminate the requirement for sound professional engineering design and validation.

   (2) Administrative controls not directly related to design and construction must be in place during facility use. The administrative controls and engineering design allow for a reduction in physical barriers that prevent rounds from escaping the facility. Designed barriers must prevent a round fired with a vertical upward error of 15° from escaping the facility.

   b. **Site Selection.**

   (1) Site selection for an LFSH is similar to that for any range facility. Terrain features, noise, and availability of utilities and access roads must be considered, as already discussed in previous sections for indoor and outdoor ranges. The LFSH should be placed adjacent to other range facilities whenever possible so that it may utilize the same support facilities, access roads, etc.

   (2) Facility design, target and shooter placement, and other administrative controls minimize the possibility of rounds being fired over the top of the walls and leaving the structure and mitigate the need for an SDZ outside the confines of the LFSH proper.
c. **Design and Layout.**

1. The interior layout of the facility is based on the mission and training requirements of the site. Facility design should incorporate a wide variety of room configurations. Some of the room configurations that should be considered are: multiple floors, an L-shaped room, stairwells, rooms within a room, hallways, and closets.

2. The floor plan design should accommodate the movement of target systems, bullet traps, and other equipment into and out of the LFSH.

3. Exposure to airborne contaminants for a fully enclosed LFSH must be controlled by adequate ventilation. The lighting requirements are similar to those for indoor ranges.

d. **Wall Construction.**

1. **Wall Height.** Exterior walls of the LFSH must be designed to absorb the most energetic projectile identified for use within the facility. Wall height must be a minimum of 8 feet. The wall height should allow a maximum error angle of 15° from horizontal standing shooting distance from the target and still enable a projectile to be contained by the wall, which can be described by the following equation: Wall Height is equal to the muzzle height plus 0.27 (tangent 15°) times the target distance. The following table assumes a muzzle height of 5 feet.

<table>
<thead>
<tr>
<th>Distance from Muzzle to Ballistic Wall (Feet)</th>
<th>Wall Height (Feet)</th>
</tr>
</thead>
<tbody>
<tr>
<td>11' 1&quot;</td>
<td>8' 0&quot;</td>
</tr>
<tr>
<td>13' 3&quot;</td>
<td>8' 6&quot;</td>
</tr>
<tr>
<td>14' 10&quot;</td>
<td>9' 0&quot;</td>
</tr>
<tr>
<td>17' 0&quot;</td>
<td>9' 6&quot;</td>
</tr>
<tr>
<td>18' 6&quot;</td>
<td>10' 0&quot;</td>
</tr>
<tr>
<td>20' 9&quot;</td>
<td>10' 6&quot;</td>
</tr>
<tr>

</tbody>
</table>

If the distance from muzzle to ballistic wall exceeds the required wall height, other administrative, engineering or natural ballistic wall controls must be administered or considered such as shooter-to-instructor ratio, canopies, baffles, natural terrain, existing SDZ, standard operating procedures, and training.

2. **Ballistic Walls.** Ballistic interior walls are the preferred method of construction. Where non-ballistic interior walls are used, additional administrative controls must be applied to target placement and team...
choreography. Ballistic walls are required in all cases where containment of the round and protection of personnel is paramount.

(a) Footings. Footings must be designed using the engineering criteria that best ensures structural integrity and stability of wall construction.

(b) Composite Walls.

1 A combination of ¾-inch exterior grade plywood and steel is effective. Minimum thickness will be ¾-inch mild steel with an exterior-grade plywood separated by a minimum of ¾ inch with a maximum of 1½ inches from the steel surface.

2 Other combinations are possible. The main criterion is that the wall must stop any round fired and contain bullet fragments.

(3) Non-Ballistic Walls. These walls are constructed of materials that offer no protection to personnel or equipment in adjoining rooms. Material used for these walls must not contribute to or enhance ricochet or splatter. Additional administrative controls must be applied such as target placement and team choreography.

e. Doors. All doors must be constructed of wood with no glass. Additionally, at least a portion of the rooms must have working doors, some opening inward, some opening outward, and doors opening left and right.

NOTE: All devices in the LFSH, such as brackets and hangers, used to secure walls to floors or secure doors must be covered or protected to mitigate any tripping or ricochet hazards.

f. Ceiling or Roofs. Ceilings or roofs can be of value when the shoot house is required for year-round use in areas with severe weather conditions. Exposure to airborne contaminants must be controlled by adequate ventilation. The lighting requirements for fully enclosed shoot houses are similar to those for indoor ranges. When training exercises require target placement above the wall design, the ceiling or roof must be protected unless firing into an approved SDZ.

g. Floors.

(1) Floor construction must be selected for its ability to absorb direct fire, minimize ricochets, and provide a walking surface free of slipping/tripping hazards. Floors should provide the same ricochet protection as walls. Options include:
(a) exterior-grade plywood floor constructed in accordance with American Plywood Association guidelines over smooth finished concrete;

(b) concrete with brushed surface that minimizes slip and tripping hazards;

(c) asphalt;

(d) exterior-grade plywood;

(e) shredded bias-ply tires; and

(f) earth, free of rocks and debris that could cause ricochet.

(2) Construction joints between walls and floors must be designed to contain projectiles within the LFSH.

h. **Bullet Traps.**

(1) **General Information.**

(a) Targets used in LFSHs must be placed so that fire is directed into a bullet trap designed to capture the rounds.

(b) Bullet traps must be constructed to contain the most energetic projectile to be fired into them without dimpling/pitting the steel and contain splatter and fragments in all directions. The size and shape of a bullet trap may be altered, but materials may not be substituted.

(2) **Specifications for construction.** See “Use of Bullet Traps and Steel Targets” for Shoot House bullet trap information.

i. **Elevated Observation Control Platform (EOCP).**

(1) EOCPs enhance the ability to observe and control LFSH operations. Administrative controls must be considered when constructing the EOCP. Platform construction and location is based on the training to be conducted. EOCPs must be constructed in accordance with all applicable regulations for elevated work platforms.

(2) EOCPs must be constructed to:

(a) maximize instructors’ observation and control of the entry team fire and movement;
(b) facilitate communication between instructors on the EOCP and the floor;

(c) position the lowest point of the horizontal walking surface higher than the 15° vertical error for any target engaged;

(d) provide ready access;

(e) integrate instructors’ movement with team flow;

(f) maximize instructors’ ability to see shooters clearly at all times; and

(g) have supporting structures placed so that they pose no additional hazards such as tripping, ricochet, splatter, etc.

NOTE: SEE TABLE 2 FOR THICKNESS OF STEEL
Figure 13
Ballistic Protection of Target Mechanism
Notes:

1. Outline of impact berm if all earth berm is used in lieu of combination earth berm/baffle.

2. Back slope may be increased or decreased dependent upon soil stability, erosion potential, or maintenance equipment.

3. Provide adequate distance between berm and target line for maintenance of target and slope of berm [minimum 9 m (10 yd)].

4. Preferred slope of impact berm face is 1:1 or steeper. For shallower slopes a bullet catcher is required. Top baffle must be placed as shown if used in lieu of all earth berm. Bullet catcher is 0.95 cm (3/8 in.) steel plate positioned above point of bullet impact at 90° angle to face of berm slope. Plate protrudes at least 0.6 m (2 ft) from face of berm.

Outdoor Baffled Bullet Stop
Figure 16
Baffled Range Profile
Notes:

1. These are typical examples of a baffled range.
2. Baffles are spaced according to the downrange area.
   a. Where inhabitants are less than 0.4 km (0.25 mi), use design "A."
   b. Where controlled areas extend beyond 0.4 km (0.25 mi), use design "B."
3. Baffle installation may not be required where terrain features such as mountains exist.
4. When baffles may be required as encroachment occurs, plan a program of installation over a 5-year period.
5. See Figure 9 for firing line cover details.

Figure 17
Baffle System Geometry
Figure 18
Overhead Baffle Ballistic Designs
NOTE: SURFACE DANGER ZONES FOR PARALLEL UMBERMED RANGES MAY OVERLAP AS SHOWN, BUT NOT CLOSER THAN 45 m (50 yd) TO THE ENTRY POINT FOR THE TARGET LINES ON THE ADJACENT RANGE. WHEN THIS IS NOT POSSIBLE AND THE REQUIREMENT EXISTS FOR SIMULTANEOUS OPERATION OF ADJACENT RANGES, A SEPARATING WALL OR BERM WILL BE REQUIRED. THE LENGTH OF THE WALL OR EMBANKMENT SHALL BE FROM THE MOST DISTANT FIRING LINE TO THE TARGET LINE. THE WALL MAY BE 200 mm (8 in) THICK CONCRETE, 300 mm (12 in) THICK GROUT-FILLED CONCRETE MASONARY UNIT, OR EQUIVALENT.
TOWNSHIP OF RICHLAND

ORDINANCE NO. _____

AN ORDINANCE OF THE TOWNSHIP OF RICHLAND AMENDING THE TOWNSHIP ZONING ORDINANCE, CHAPTER 27, SECTIONS 303, 506 and 788 OF THE CODE OF THE TOWNSHIP OF RICHLAND, TO REVISE AND ESTABLISH REGULATIONS PERTAINING TO SHOOTING RANGE USES BY SPECIAL EXCEPTION AND, IN THE RR DISTRICT ONLY, AS AN ACCESSORY USE

I. Legislative Findings.

A. The Board finds that certain amendments are needed to clarify the Township’s zoning regulations with respect to shooting ranges.

B. The Board has, pursuant to Section 609.2 of the Pennsylvania Municipalities Planning Code declared its ordinance provisions relating to shooting ranges to be substantively invalid and resolved to prepare a curative amendment to cure the invalidity;

C. The Board of Supervisors has given due public notice, held the requisite hearing and duly notified the Allegheny County Department of Economic Development as pertains to the proposed rezoning and the Planning Commission has made a recommendation.

II. Amendments. The Board of Supervisors of Richland Township ordains that the Zoning Ordinance of the Township of Richland, Chapter 27 of the Code of the Township of Richland, is hereby amended, as follows:

A. Section 27-303, Definitions, is revised to amend the definition of the term “Shooting Range, Indoor” to read, in its entirety, as follows:

“Shooting Range, Indoor”, a totally enclosed building that is equipped for the practice of shooting, including archery, where no activity associated with shooting is conducted outside the building.

B. Section 506.A, Permitted Accessory Uses & Structure in any Residential and Mixed Use Districts, is amended by adding thereto a new Section 27-506.A(11) to read:

(11) A Shooting Range, Indoor Use, shall be available as an accessory use to a single family dwelling in the RR District only, provided that all of the following criteria are met:
(a) The shooting range shall be located on a lot of at least 5 acres in size;

(b) The shooting range shall be available only for the private, recreational use of the owner or occupant of the lot and their guests;

(c) The applicant shall demonstrate that the use will be compatible with the adjacent residential neighborhood and will not adversely affect the residential use and enjoyment of adjoining lots.

(d) If located in a building separate from the principal building, the shooting range building shall be located at least 60 feet from any adjacent residentially zoned or used property and shall not be located closer to the front lot line than the principal buildings on the lot.

(e) The applicant shall also comply with the criteria at § 27-788 A, B, C, D and J.

C. Section 27-788. Shooting Range, Indoor, is amended to read, in its entirety, as follows:

A. The building and method of operation shall conform to any applicable Commonwealth of Pennsylvania, Environmental Protection Agency, and OSHA standards for indoor ventilation, emission into the atmosphere, and lead management.

B. The design and construction of the shooting range shall completely confine all ammunition rounds within the building and in a controlled manner.

C. The design and construction of the shooting range shall be certified by a registered architect or engineer in the State of Pennsylvania.

(1) The certified plans shall include the specifications and construction of the bullet trap(s), ceilings, exterior and interior walls and floors.

(2) The certified plans shall state what type and caliber of ammunition the shooting range is designed to totally confine.

(3) A security plan for the building shall be submitted which secures the shooting range against unauthorized entrants.
D. No ammunition shall be used in the shooting range that exceeds the certified design and construction specifications of the shooting range.

E. For shooting ranges that are other than used for private recreational purpose, firearms shall not be stored on the premises when the shooting range is closed for business, unless they are stored in an acceptable gun safe or other secure locking device.

F. On-site supervision shall be supplied at all times by an adult who is an experienced shooting range operator. The shooting range operator shall be responsible for the conduct of their place of business and the conditions of safety and order in the place of business and on the premises.

G. Each shooting range shall have a clear and concise safety plan. The plan must be reviewed annually and distributed to all shooting range users to study and use.

H. Minors shall not be allowed in the shooting range unless accompanied by an adult at all times. This provision shall not be interpreted to prohibit minors from participating in a firearm safety class which is supervised by an adult instructor.

I. In multi-tenant buildings, the shooting range shall be soundproofed to prevent the sound from being heard by persons in adjoining units.

J. The applicant shall have the burden to demonstrate that the shooting range is designed to promote the safety of all persons on the premises or on abutting property when the shooting range is being used. The applicant may meet its burden by showing compliance with applicable National Rifle Association or other generally recognized guidelines for shooting range design and safety, or by submitting evidence from persons with experience and expertise in shooting range design and safety.

III. **Severability.** The provisions of this Ordinance are severable. If any provision or part thereof is held to be illegal or invalid, the remaining provisions shall remain in full force and effect.

IV. **Repeal.** Any ordinance or part of any ordinance conflicting with this Ordinance is repealed to the extent of such conflict.

V. **Effective Date.** This Ordinance shall be effective immediately upon adoption.
ORDAINED AND ENACTED INTO LAW by the Board of Supervisors at a public
meeting this _____ day of ____________________, 2012.

ATTEST:                                             TOWNSHIP OF RICHLAND

DEPARTMENT OF COMMUNITY DEVELOPMENT SERVICES

Planning Division

memorandum

TO: Laurel Lunt Prussing, Mayor

FROM: Elizabeth H. Tyler, PhD, FAICP, Community Development Director

DATE: August 16, 2012

SUBJECT: An amendment to Table V-1, Article II, Article V, and Article VII of the Urbana Zoning Ordinance to establish standards for “Firearm Store” and “Private Indoor Firing Range” (Plan Case 2181-T-12)

Introduction

The Zoning Administrator is requesting that the Zoning Ordinance be amended to add use categories and restrictions for firearm stores and firing ranges. The proposed Ordinance amendment would add definitions to Article II, add these uses to Table V-1 (Table of Uses), and add standard Special Use Permit conditions to Article VII of the Urbana Zoning Ordinance. Additionally, a restriction would be added under Article V for home occupations involving firearm sales.

The purpose of the proposed amendment is to address a deficiency in the Zoning Ordinance regarding two firearms-related uses. Recently, a business owner approached the City to determine where a principal use gun shop could be operated under Urbana zoning. The business, D & R Firearms, is looking to locate on one of two properties off of South Poplar or Glover Streets, north of Washington Street. Because the Zoning Ordinance’s Table of Uses does not specify firearm stores or indoor firing ranges whatsoever, City staff has not been able to guide this potential new business in terms of procedures and standards.

For uses not listed in the Table of Uses, Section V-1.B of the Zoning Ordinance provides that “such use shall be subject to the regulations of the use (whether permitted by right, a conditional use, or special use) to which it is most related or similar, as determined by the Zoning Administrator.” For firearm sales there are compatibility and security considerations that must be taken into account that do not apply to any other use listed in the Zoning Ordinance, and therefore there are no other uses that closely match the proposed use. Similarly, indoor firing ranges are not listed in the Table of Uses. In order for the City to preserve options in reviewing such proposed uses, it is necessary to first establish specific regulations by amending the Zoning
Ordinance. The draft ordinance under consideration would establish firearm stores and indoor firing ranges as Special Uses, limited to two zoning districts, and to be reviewed by the Plan Commission and City Council on a case-by-case basis.

It is important to note that this Zoning Ordinance amendment is intended to address the process and standards for potential firearm stores and indoor firing ranges. The amendment is not intended to address firearm ownership; nor is it intended to address firearm sales generally as an activity. Based on legal research, it would be in the best interest of the City to adopt procedures and standards for potential firearm stores and indoor firing ranges, consistent with the City’s comprehensive planning policies and land use restrictions.

The Urbana Plan Commission held a public hearing on this case at their July 19, 2012 and August 9, 2012 meetings. Approximately 28 members of the public attended the July 19 meeting, and three members of the public attended the August 9 meeting. Representatives of D&R Firearms attended both public hearings and answered questions from the Plan Commission about Federal and State regulations, procedures, and the local market for such uses. Following the public hearing on August 9, the Plan Commission, by a vote of 6 ayes and 1 nayes, recommended approval with five specific amendments. The attached draft ordinance incorporates these recommended amendments.

Background

Federal Regulatory Context
Firearm sales are licensed and regulated by the Federal Bureau of Alcohol, Tobacco, and Firearms (ATF). There are several federal laws that apply to firearm sales, including the Gun Control Act (18 U.S.C. Chapter 44), the National Firearms Act (26 U.S.C. Chapter 53), and the National Instant Criminal Background Check System (24 CFR Part 25). These laws require that anyone selling firearms obtain a license from ATF and meet their requirements for record-keeping, storage, background checks, and limiting sales to adults. A comprehensive list of federal laws regarding firearms is available at [http://www.atf.gov/publications/firesarms/](http://www.atf.gov/publications/firesarms/).

State Regulatory Context
Additionally, the State of Illinois has its own laws regarding firearms. Those wishing to purchase or sell firearms must qualify for and obtain a state-issued Firearm Owner’s Identification card (FOID). For FOID card holders, state law imposes a 72-hour waiting period to purchase handguns and a 24-hour waiting period to purchase long guns. Gun dealers must comply with strict record-keeping and must have the State Police approve each firearm transaction in advance. Illinois also bans sales of firearms at schools and establishments that sell liquor. A complete compilation of State of Illinois laws and statutes regarding firearms can be found at: [http://www.atf.gov/publications/download/p/atf-p-5300-5-2011/atf-p-5300-5-illinois-2011.pdf](http://www.atf.gov/publications/download/p/atf-p-5300-5-2011/atf-p-5300-5-illinois-2011.pdf). This document also abstracts municipal firearm regulations reported to the ATF.

Illinois Municipal Context
Generally, the Illinois Legislature provides municipalities broad authority to regulate firearms and ammunition. Illinois' Firearms Owners Identification Card Act provides that "[t]he provisions of any ordinance enacted by any municipality which requires registration or imposes greater restrictions or limitations on the acquisition, possession and transfer of firearms than are imposed by this Act, are not invalidated or affected by this Act." The attached Zoning News Bulletin (Exhibit A) outlines a range of issues and solutions municipalities typically have for firearm-related uses. Research of municipal ordinances regarding firearm sales shows that many communities do not regulate firearm sales but instead rely solely upon state and Federal statutes. For example, the City of Champaign classifies firearm sales as a retail use allowed anywhere retail sales are permitted. It should be noted that the City of Champaign does restrict firearms sold at pawn shops through their city code, including prohibiting window display and requiring a burglar alarm.

Zoning. For cities regulating firearm sales, a standard approach is through zoning standards. Nationally, such regulations often include minimum distances from schools, parks, places of worship, and other firearm stores. In Illinois, some municipalities, principally in Cook County, have imposed minimum distance requirements for firearm stores and indoor firing ranges from other such uses, and from schools, parks, and places of worship.

Courts have upheld municipal restrictions on the location of gun sales within a specified distance of schools, playgrounds, parks, and places of worship. And because firing ranges may create excessive noise and pollution, courts have also prohibited ranges from operating in locations that are too close to residences. But the restrictions must be reasonable. In Illinois Sporting Goods Association v. County of Cook (1994), the U.S. District Court for the Northern District of Illinois found that a half-mile distance requirement for firearm stores from schools and parks was a valid exercise of the County's police power because it was rationally related to the governmental interest in reducing firearm violence among youth. However, the Court issued a preliminary injunction against the County because the regulations imposed this distance requirement only to sporting goods shops and gun stores and not to other businesses selling firearms, such as "big box" retailers. Some suburban Chicago municipalities have until recently continued to require a half mile separation for gun stores. The Village of Lincolnwood is currently considering reducing their minimum distance requirement from half a mile to 800 feet.

More recently in Illinois, court decisions have led two Cook County municipalities to either drop or reduce minimum distance requirements. Following a landmark U.S. Supreme Court decision in 2010 -- McDonald et al v City of Chicago et al -- the Village of Oak Park's Public Health Board, following an extensive review of evidence over a series of public meetings, recommended against imposing rules such as minimum distance requirements. And similarly, after the 7th Circuit Court of Appeals (Ezell v City of Chicago) overturned a City of Chicago ban on indoor firing ranges in July 2010, the City of Chicago first allowed indoor firing ranges no closer than 1,000 feet to any home, school, place of worship, park, retail sales of liquor, library, museum, hospital, or place of children activities. After these restrictions were challenged in court as being too harsh, the City of Chicago in 2011 reduced the distance to 500 feet. In short, municipal minimum distance requirements for businesses
involving firearms must be reasonably constructed and applied, and rationally related to serving an important public purpose.

Zoning standards for firing ranges are less common than those for firearm sales. Cities regulating firing ranges typically concentrate on outdoor ranges, requiring location on larger parcels with ample setbacks from neighboring properties. Such requirements generally keep outdoor firing ranges to the mostly rural or fringe areas around cities, reducing the chance that they will negatively impact urban neighborhoods. Where permitted, indoor firing ranges generally have fewer use restrictions. Design standards published by the federal government may be adopted to ensure safety and low noise impacts on adjacent properties.

The National Shooting Sports Foundation lists some 225 sporting ranges in Illinois, including indoor and outdoor firing ranges, skeet clubs, and archery ranges, meaning that many Illinois communities have been able to accommodate such uses.

**Licensing.** Nationally, some communities provide standards through licensing rather than zoning. They require city-licensing of firearm dealers in addition to Federal licensing. Licensing programs have been used by municipalities to require more detailed record-keeping or daily reporting, fingerprinting of gun purchasers, annual inspections, and collection of fees. The Village of Northbrook, Illinois, has used its licensing program to restrict sale of handguns. Some cities also limit the number of firearm dealer licenses, much like they do for liquor or taxi licenses. This approach may work well for larger cities that have a high concentration of!gun shops.

**City of Urbana Zoning**

The City of Urbana currently has no zoning standards for principal use firearm sales (gun shops) or firing ranges. Table V-1 of the Zoning Ordinance does not list firearm sales or gun shop as a principal use. According to Section V-1.B of the Zoning Ordinance, when a principal use is proposed to be established that is not listed in Table V-1, the Zoning Administrator shall determine what is the most related or similar use. The proposed use would then be allowed under the same regulations as the most similar use. In the case of firearm sales, there is no similar use provided in the Table of Uses, due to the special considerations unique to this use.

“Sporting goods store” is a related use, but it is not generally similar. A sporting goods store sells a variety of merchandise, including clothing, fitness equipment, and sport-specific equipment. Sporting goods stores sometimes sell firearms for hunting or target shooting, but is only a component of a larger retail business. Similarly, a general merchandise store such as Walmart may sell firearms in their sports or outdoor department. Firearm sales would generally be allowed as an accessory use for these stores if it is a small part of their business. These businesses must have a federal license to sell firearms. Staff is not aware of any sporting goods stores or general merchandise stores that sell firearms within the City of Urbana. Pawn shops are locations in the City where firearms are known to be sold. As with sporting goods and general merchandise stores, firearm sales are a small part of the business and considered an accessory to the principal use.
Site Security Plan

To better understand the aspects of site security planning for home-based firearms dealers, City staff on August 3, 2012 met on site with the owners of D&R Firearms which operates under a City home occupation permit. Site security features of note include secure storage of firearms in construction-type storage boxes bolted to concrete floors; window bars; alarm activated by motion sensors, contacts, and push button; barred windows; barred and reinforced exterior doors; security signs; and preset procedures in case of emergency. Urbana Police and Fire and METCAD all have a copy of the security plan so that they can respond accordingly in case of emergency.

Discussion

Firearm sales are proposed to be added to the Table of Uses as Special Use Permit, along with standard conditions designed to promote the safety and general welfare of the public. Firearm sales would only be allowed in Urbana’s IN-1 (Light Industrial/Office) and B-3 (General Business) zoning districts and only as Special Uses. The B-3 district is intended for general commercial activity for uses that are more intense than those allowed in neighborhood business districts. While a gun shop is not a high-impact use in terms of generating vehicle trips, excessive noise, or other potential nuisances, it may not be compatible with residential and institutional uses. The IN-1 district is designed to provide for limited retail commercial uses, in addition to office and light industry. Properties zoned IN-1 are generally located in areas that are not next to residences.

Requiring a Special Use Permit will give Plan Commission and City Council a chance to review each proposed gun shop application. Per Section VII-V of the Zoning Ordinance, Special Use Permits are evaluated on the following factors:

- Is the proposed use conducive to the public convenience at the proposed location?
- Is the proposed use designed, located, operated so that it will not be unreasonably injurious or detrimental to the district it is in or to the public welfare?
- Does the proposed use conform to the applicable regulations and standards of, and does it preserve the essential character of the district?

City Council may require additional conditions for individual Special Use Permits as deemed necessary for the public health, safety, and welfare. In addition to these criteria, City staff and the Plan Commission are recommending standard conditions that all principal use firearm sales businesses meet. Rather than minimum distance requirements, the Plan Commission is recommending an increased public notice requirement to notify property owners within 500 feet rather than the normal 250 feet from the proposed Special Use. Additionally, conditions would include limited hours of operation, prohibition of unaccompanied minors in gun stores, prohibition of display of guns and ammunition in windows, and a security plan approved by the Chief of Police.
The Urbana Plan Commission discussed whether to impose standard minimum distance requirements for firearm stores and firing ranges from potentially sensitive land uses nearby. The Urbana Zoning Ordinance now has minimum distance requirements for other uses, including Outdoor Commercial Recreational Enterprises, Riding Stables, Kennels, Veterinary Hospitals, Truck Terminals, Billboards, Adult Entertainment Uses, Telecommunication Towers, and Wind Turbines.

Additionally the State of Illinois requires a minimum 100 feet between any retail sales of liquor and any “church, school other than an institution of higher learning, hospital, home for aged or indigent persons or for veterans, their spouses or children or any military or naval station, provided that this prohibition shall not apply to hotels offering restaurant service, regularly organized clubs, or to restaurants, food shops or other places where sale of alcoholic liquors is not the principal business carried on . . .” Urbana City Codes generally require public hearings for issuance of new liquor licenses.

Given the intent of this amendment to address firearm stores and indoor firing ranges and not firearm sales generally, and in light of recent court decisions, the Plan Commission is not recommending distance restrictions. Rather, the Plan Commission recommends that public hearing noticing for these uses be expanded, and that potentially sensitive adjacent land uses be handled on a case-by-case basis through the public hearing process.

Two related text amendments have been included with this plan case: requiring an approved security for home occupations involving firearms, and permitting private firing ranges as a special use in certain districts. Currently the Zoning Ordinance does not address home occupations that deal with firearms. The home occupation ordinance does not distinguish different types of businesses; instead it regulates businesses based on how they impact their surrounding neighborhood. Home offices and mail-order/internet businesses are generally approved, but retail uses that depend on walk-in customers are not allowed.

For firearm sales as a home business, one major concern is securing weapons kept in the home. All businesses must advertise in some fashion to potential clients, but advertising that one’s home contains a number of firearms poses a security risk, even if those weapons are secured in a gun safe. For home businesses involving firearms, allowing limited clientele through special orders would require very limited stock. This combined with a required site security plan will address many concerns.

Firing ranges are another use involving firearms that is not addressed in the Zoning Ordinance. Staff has received inquiries about potential firing range businesses in the past. These uses are generally recreational, but could have impacts on surrounding properties if not properly designed and constructed. Primary concerns include safety for users of the range and adjacent properties, and noise for surrounding properties. These concerns are addressed in federal guidelines for Range Design Criteria (www.hss.doe.gov/SecPolicy/pfs/Range_Design_Criteria.pdf). Staff is
proposing to define an indoor firing range as a use that meets the federal range design criteria. The criteria include specifications for baffles, backstops, HVAC systems, sound-proofing, and other requirements to ensure that ricochets do not escape the building or harm users, and that sound from discharging weapons will not affect neighbors. Any potential indoor firing range would also have to ensure noise levels do not exceed the City’s noise standards. Outdoor firing ranges are not being addressed as part of this Zoning Ordinance amendment as more study is needed to draft proper standards.

Comprehensive Plan

The following goals and objectives of the 2005 Urbana Comprehensive Plan relate to this case:

**Goal 17.0 Minimize incompatible land uses.**

**Objectives**

17.1 Establish logical locations for land use types and mixes, minimizing potentially incompatible interfaces, such as industrial uses near residential areas.

17.2 Where land use incompatibilities exist, promote development and design controls to minimize concerns.

The proposed text amendment would accomplish these goals by establishing logical locations for potentially incompatible firearm-related uses, separate from residential and institutional uses. It would also add design controls to minimize incompatibilities between uses.

Proposed Text Amendment

Based on the comments provided at the public hearing held by the Urbana Plan Commission on July 19 and August 9, 2012, as well as specific amendments recommended by the Plan Commission, the following revised Zoning Ordinance text amendment is proposed. Underlined words indicate proposed text to be added to the Zoning Ordinance.

Section II-3, Definitions

Section II-3, Definitions, of the Urbana Zoning Ordinance, would be amended by adding the following new definitions.

*Firearm:* Any device from which a projectile is discharged by gunpowder through a barrel.

*Firearm Store:* A retail store that derives its principal income from buying and selling firearms, with or without sale of ammunition and/or firearms accessories.

*Firing Range, Private Indoor:* A building inside of which club members, or the public at large, discharge firearms for target practice.
Section V-13, Regulation of Home Occupations

Section V-13, Regulation of Home Occupations, of the Urbana Zoning Ordinance would be amended by adding the following condition for administrative approval of any home occupation permit involving sale of firearms.

H: The sale of firearms as a home occupation shall require approval of a site security plan by the Urbana Police Chief, or designee, with renewal every three years.

Table V-1. Table of Uses

Table V-1, Table of Uses, of the Urbana Zoning Ordinance would be amended by adding the following new principal uses and footnotes.

† See Section VII-5.D for Standards for Firearm Stores
‡‡ See Section VII-5.E. Standards for Private Indoor Firing Ranges

Section VII-5. Special Use Terms and Conditions

The following standard conditions would be required of any firearm store or private indoor firing range issued a Special Use Permit as authorized by the Urbana City Council.

D. The following conditions shall apply to any Firearm Store:

1. Public hearing notification requirements of Section XI-10.B of the Urbana Zoning Ordinance shall be increased from 250 feet to 500 feet.
2. Approval of a site security plan by the Urbana Chief of Police, or designee, shall be a condition for approval of a Special Use Permit. Updated site security plans shall be submitted to the Police Chief at least every three years.
3. Firearms and ammunition shall not be displayed in windows.
4. Hours of operation shall be limited to 9:00 a.m. to 9:00 p.m.
5. No individual under the minimum age to purchase a firearm in the State of Illinois shall be allowed on the premises unless accompanied by a parent or legal guardian.

E. The following conditions shall apply to any Indoor Firing Range:

1. Public hearing notification requirements of Section XI-10.B of the Urbana Zoning Ordinance shall be increased from 250 feet to 500 feet.
2. Private Indoor Firing Ranges shall conform to U.S. Department of Energy's Range Design Criteria or subsequent criteria.

3. No individual under the minimum age to purchase a firearm in the State of Illinois shall be allowed on the premises unless accompanied by a parent or legal guardian.

4. Hours of operation shall be limited to 9:00 a.m. to 9:00 p.m.

Summary of Findings

1. The Zoning Administrator is proposing to amend the Urbana Zoning Ordinance in order to establish regulations for firearms-related uses, which are currently not addressed in the Table of Uses.

2. Firearms sales are regulated by federal and state laws, and are licensed through the Bureau of Alcohol, Tobacco, and Firearms.

3. The proposed amendment will modify Articles II, V, and VII of the Urbana Zoning Ordinance to allow firearm stores and indoor firing ranges in limited districts under specific conditions.

4. The proposed amendment would require a security plan; limit hours of operation; and bar entry of Firearm Stores by unaccompanied minors.

5. The proposed amendment will require firearm stores and indoor firing ranges to be approved by City Council as a Special Use and with expanded notification requirements.

6. The proposed amendment will provide standards to ensure firearm sales and firing ranges do not have a negative impact on surrounding properties.

7. The proposed amendment is consistent with the goals and objectives of the 2005 Urbana Comprehensive Plan to minimize potentially incompatible land uses and to promote design controls to minimize concerns.

8. The proposed amendment conforms to notification and other requirements for the Zoning Ordinances as required by the State Zoning Act (65 ILCS 5/11-13-14).

Options

The Urbana City Council has the following options regarding Plan Case 2181-T-12:
a. Approve the proposed Zoning Ordinance amendment;
b. Approve the proposed Zoning Ordinance amendment with specific suggested changes; or
c. Deny the proposed Zoning Ordinance amendment.

Recommendation

The Urbana Plan Commission on August 9, 2012, by a vote of 6-ayes and 1-nay, recommended APPROVAL of proposed Zoning Ordinance amendment as attached. City staff likewise recommends approval.

Under Illinois State law, the City of Urbana would need to report any municipal regulations of firearms to the State Police within 30 days of passage.

ORDINANCE NO. ____-____

AN ORDINANCE AMENDING THE ZONING ORDINANCE OF THE CITY OF URBANA, ILLINOIS
(Revising Table V-1, Article II, Article V, and Article VII to establish
standards for "Firearm Store" and "Private Indoor Firing Range" - Plan Case
No. 2181-T-12)

WHEREAS, the City Council of the City of Urbana, Illinois adopted
Ordinance #9293-124 on June 21, 1993 which adopted the 1993 Comprehensive
Amendment to replace the 1979 Comprehensive Amendment to the 1950 Zoning
Ordinance of the City of Urbana which is also known as the Urbana Zoning
Ordinance; and,

WHEREAS, the Zoning Administrator is proposing to amend the Urbana Zoning
Ordinance in order to establish procedures and standards for firearm stores,
fire ranges, and home occupations involving firearm sales; and

WHEREAS, the proposed amendment will require firearm stores and indoor
firing ranges to be reviewed by the Urbana Plan Commission and City Council
on a case-by-case basis as part of the Special Use Permit process; and

WHEREAS, said text amendment is consistent with the goals and
objectives of the Urbana Comprehensive Plan; and

WHEREAS, after due publication in accordance with Section XI-7 of the
Urbana Zoning Ordinance and with Chapter 21, Section 11-13-14 of the Illinois
Revised Statutes, the Urbana Plan Commission held a public hearing on this
application at their July 19, 2012 and August 9, 2012 meetings; and

WHEREAS, the Urbana Plan Commission on August 9, 2012 voted 6 ayes to 1
nay to recommend approval with specific changes based on public comments;

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF
URBANA, ILLINOIS, that the Urbana Zoning Ordinance shall be amended as
follows:
Section 1. That Section II-3, Definitions, of Urbana Zoning Ordinance is hereby amended to add the following new definitions:

Firearm: Any device from which a projectile is discharged by gunpowder through a barrel.

Firearm Store: A retail store that derives its principal income from buying and selling firearms, with or without sale of ammunition and/or firearms accessories.

Firing Range, Private Indoor: A building inside of which club members, or the public at large, discharge firearms for target practice.

Section 2. That Section V-13, Regulation of Home Occupations, of the Urbana Zoning Ordinance is hereby amended to add the following new requirement:

H: The sale of firearms as a home occupation shall require approval of a site security plan by the Urbana Police Chief, or designee, with renewal every three years.

Section 3. That Table V-1, Table of Uses, of Urbana Zoning Ordinance is hereby amended by adding the following new uses and footnotes:

† See Section VII-5.D for Standards for Firearm Stores
†† See Section VII-5.E Standards for Private Indoor Firing Ranges

Section 4. That Section VII-5, Special Use Terms and Conditions, of the Urbana Zoning Ordinance is hereby amended by adding the following new conditions:

D. The following conditions shall apply to any Firearm Store:

1. Public hearing notification requirements of Section XI-10.B of the Urbana Zoning Ordinance shall be increased from 250 feet to 500 feet.
2. Approval of a site security plan by the Urbana Chief of Police, or designee, shall be a condition for approval of a Special Use Permit. Updated site security plans shall be submitted to the Police Chief at least every three years.

3. Firearms and ammunition shall not be displayed in windows.

4. Hours of service shall be limited to 9:00 a.m. to 9:00 p.m.

5. No individual under the minimum age to purchase a firearm in the State of Illinois shall be allowed on the premises unless accompanied by a parent or legal guardian.

E. The following conditions shall apply to any Indoor Firing Range:

1. Public hearing notification requirements of Section XI-10.B of the Urbana Zoning Ordinance shall be increased from 250 feet to 500 feet.

2. Private Indoor Firing Ranges shall conform to U.S. Department of Energy's Range Design Criteria or subsequent federal criteria.

3. No individual under the minimum age to purchase a firearm in the State of Illinois shall be allowed on the premises unless accompanied by a parent or legal guardian.

4. Hours of operation shall be limited to 9:00 a.m. to 9:00 p.m.

Section 5. The City Clerk is directed to publish this Ordinance in pamphlet form by authority of the corporate authorities. This Ordinance shall be in full force and effect from and after its passage and publication in accordance with the terms of Chapter 65, Section 1-2-4 of the Illinois Compiled Statutes (55 ILCS 5/1-2-4).

Section 6. The City Clerk is directed, within 30 days passage of this ordinance, to submit a copy to the Illinois Department of State Police, in conformance with Section 65/13.3 of the Firearm Owners Identification Card Act (430 ILCS 65).
This Ordinance is hereby passed by the affirmative vote, the "ayes" and "nays" being called of a majority of the members of the City Council of the City of Urbana, Illinois, at a regular meeting of said Council on the ___ day of _____________, 2012.

PASSED by the City Council this ___ day of ____________, 2012.

AYES:

NAYS:

ABSTAINED:  Phyllis D. Clark, City Clerk

APPROVED by the Mayor this _______ day of _____________, 2012.

Laurel Lunt Prussing, Mayor
CERTIFICATE OF PUBLICATION IN PAMPHLET FORM

I, Phyllis D. Clark, certify that I am the duly elected and acting Municipal Clerk of the City of Urbana, Champaign County, Illinois. I certify that on the ___ day of ____________, 2012, the corporate authorities of the City of Urbana passed and approved Ordinance No. ____________, entitled "AN ORDINANCE AMENDING THE ZONING ORDINANCE OF THE CITY OF URBANA, ILLINOIS (Revising Table V-1, Article II, Article V, and Article VII to establish standards for "Firearm Store" and "Private Indoor Firing Range" - Plan Case No. 2181-T-12)" which provided by its terms that it should be published in pamphlet form. The pamphlet form of Ordinance No. ____________, including all of its attachments, was prepared, and a copy of such Ordinance was posted in the Urbana City Building commencing on the ___ day of ________________, 2012, and continuing for at least ten (10) days thereafter. Copies of such Ordinance were also available for public inspection upon request at the Office of the City Clerk.

DATED at Urbana, Illinois, this ___ day of ________________, 2012.
On the Firing Line:
Zoning for Gun-Related Uses

by Michael Lawton

Few issues have received more attention in recent decades than the implications of firearms. Gun-related warfare, school shootings, and post office shootings spurred a passionate debate between those defending the right to bear arms and those concerned about the violence in society. Zoning News will not delve into moral issues or the state of American culture. Rather, this issue will address the land-use requirements of gun-related enterprises, including firearms dealers and shooting ranges.

Is Nothing Untouched by Sprawl?
Outdoor shooting ranges have fallen victim to incompatible zoning. As the countryside succumbs to urbanization and farms are sold to developers, range operators find themselves uncomfortably close to the residents of new subdivisions. Annoyed and concerned homeowners, neighborhood associations, and town zoning boards complain about noise and related nuisances coming from the nearby shooting range.

Most outdoor shooting ranges are classified as agricultural, industrial, or recreational uses, and therefore are zoned appropriately where few residential uses are present. Even then, a jurisdiction may take extra measures to minimize the impact of the land use. For example, Durham, North Carolina, gives outdoor shooting ranges a “buffer intensity” classification in the city’s rural zoning district.

Ohio enacted legislation in 1998 to protect owners, operators, and users of existing shooting ranges from the ramifications of sprawl. Ranges that were established in isolated areas years ago came under fire when encroaching residential development led to legal action over noise. Supporters of the legislation argued that protection similar to that given farmers under Ohio’s Right-to-Farm Law. The law provides limited immunity from civil and criminal liability to persons who own, operate, and use shooting ranges that are in “substantial compliance” with standards established by the Division of Wildlife in Ohio’s Department of Natural Resources. The law prohibits courts from issuing injunctions against shooting ranges for nuisances if they find that a range is in substantial compliance with state standards. The law also affects the manner in which local governments can regulate ranges with measures such as zoning.

The law’s greatest effect is on the “reconstruction, enlargement, remodeling, or repair” of structures or facilities that are part of an existing shooting range. However, it offers minimal protection from local regulations addressing the establishment of new shooting ranges, which must comply with all existing local ordinances. Under the new law, all shooting ranges will abide by the general development standards that apply to all structures in a county or township. The rules adopted by the Division of Wildlife for the reconstruction, enlargement, remodeling, or repair of a shooting range and its related facilities do not preempt local laws. However, locally adopted standards may no longer be authorized if they specifically target facilities or structures that are part of a shooting range.

No Guns in My Back Yard
Zoning ordinances ensure that compatible land uses are placed in zoning districts that will minimize or prevent land-use conflicts. Concerns over gun-related enterprises include the buffering and screening of shooting ranges for aesthetic reasons and to prevent bullet and projectiles from leaving the premises. Other concerns focus on firearm noise, decalification of property near gun dealers and ranges, the perpetuation of crime, illegal firearms sales, and gun accessibility to minors and persons without licenses.

Outdoor shooting ranges have fallen victim to incompatible zoning. As the countryside succumbs to urbanization and farms are sold to developers, range operators find themselves uncomfortably close to the residents of new residential subdivisions.

Many ordinances eliminate gun dealing in residential areas altogether. Opponents of the dealers argue that “kitchen-table” operations pose a potential threat to nearby residents. The homes of such enterprises may not be equipped with the state-of-the-art security systems often found in commercial buildings. Storefront gun shops are typically required by ordinance to place bars on the windows and doors, employ security personnel, and install bulletproof glass. Gun inventories in stores are kept in locked cases, accessible to customers only when a trained professional is present. There is also the risk associated with residential gun dealers who do not keep sufficient records or conduct background checks on customers. Both offenses violate many state and federal laws.

Municipal ordinances can effectively deter kitchen-table operations by requiring a local dealer’s license. For example, the dealer may be required to present proof that the operation exists outside a residential neighborhood and away from schools, day care centers, parks, liquor stores, bars, and other firearms dealers. All these areas are frequently deemed sensitive by local officials.

Zoning provisions can rename firearm dealers to commercial terms. Lafayette, California, requires that dealers first obtain a land-use permit before opening shop. Applicants must also go

1: *Conditional Use
2: *Conditional Use

On the Firing Line: Zoning for Gun-Related Uses

through a public hearing process before the local plan commission to allow for public input. Still, the land-use permit is not lawful until the applicant secures a local police permit and meets federal and state licensing requirements. Such measures have reduced dramatically the number of residential gun dealers throughout the county. Oakland, California, passed its own comprehensive gun dealer ordinance in 1992, reducing the number of local dealers from 115 to six.

The owners of some storefront gun shops in Illinois actually lobbied against residential dealers by supporting President Clinton's 1994 '94 bill, which gave local governments more regulatory power over gun dealers. Until then, dealers in some of Chicago's suburbs could hold a permit to sell firearms even if the business was violating a state law or a local ordinance. Shop owners say their support for the bill arose from concerns about image rather than profits.

Banning guns in residential zones was not the only important objective of an ordinance passed in Los Angeles County, California. Requiring gun dealers to have a "fixed place of business where all licensed activities will be conducted" helps to eliminate illegal gun sales conducted out of the trunks of cars.

The ordinance requires the dealer to be the legal occupant of the place of business, which cannot be a United States post office box address. A private commercial mailbox may be used. The dealer must also prove that he is the owner, tenant, or other legal occupant of the fixed place of business. Any subsequent license will specify the post office address of the dealer's business.

Commercial districts are certainly not immune to the banishment of gun-related enterprises. Culver City, California, circulated a petition to adopt a zoning measure entitled "The Safe School Zones Ordinance of 1999," which would restrict certain uses, including gun shops, within 500 feet of public and private schools, regardless of the location. The petition states: "Not all commercial development is incompatible with school zones. A proper balance can be reached that enhances our business districts, but without sacrificing the health, safety, and well-being of our children in the process."

Permitted or Not?

When gun-related enterprises are not listed as a use by right (permitted use) in a zoning district, owners are required to traverse through a lengthy administrative process to determine whether the operator is permitted through an alternate measure. Lafayette's gun-related enterprises are not allowed in commercial districts as a permitted use. A firearms dealer must apply for and obtain a land-use permit before conducting business in a commercial area. Conversely, indoor ranges are listed as permitted uses in the planned industrial districts and the light and heavy industrial districts of Manteno, Illinois, which requires applicants to embark on the somewhat less difficult process of obtaining a business license, building permit, certificate of occupancy, etc., and complying with any performance standards established by the federal, state, and local governments. Such a process is certainly less burdensome for the planning staff, as the land-use implications of a permitted use are relatively marginal and the paperwork minimal.

Nonconforming use. The prevailing nonconforming use, one which may be referred to as having "grandfathered" status, is unavailable for zoning administrators as cultural interests and living style change and cities continue to grow. Despite such conflicts, some of the new "nonconforming" uses will be allowed to stay, albeit with restrictions. Even a minor structural modification of a gun facility could result in the termination of its nonconforming status, as stated in the Ohio law. The owner of a Michigan gun shop wanted to expand his building to include a new range. The request was denied because of the club's status as a preexisting nonconforming use, and to change or alter the use would violate the law, rendering the facility "different" and making it a potential threat to the area with which it was once thought compatible.

Conditional or special use. Subject to the high standards of planning and design, as well as the general standards established in the ordinance, conditional or special uses are allowed in districts that do not have them as a permitted use. These add flexibility to the ordinance by allowing a previously unwanted land use to be developed with minimal negative consequences to neighboring properties. Zoning boards typically approve a conditional or special use when that use is compatible with the surrounding area. Present and future compatibility with the surrounding area is an extremely important consideration that zoning administrators, who are the agents of local governments, must remember and exercise judiciously.

In Santa Monica, California, conditional uses (which include any "business or use which sells, transfers, leases, offers or advertises for sale, transfer or lease any firearm or munitions in any location where such business is permitted") may be granted if the following criteria are met:

- The proposed use will not adversely affect the welfare of neighborhood residents in a significant manner;
- The proposed use will not contribute to an undue concentration of similar uses in the area;
- The proposed use will not detrimentally affect nearby neighborhoods, considering the distance of the use to residential buildings, churches, schools, hospitals, playgrounds, parks, and other existing similar uses;
- The proposed use is compatible with existing and potential uses within the general area;
- The public health, safety, and general welfare are protected;
- No harm to adjacent properties will result.
The proposed use is not within 1,500 feet of any other similar use, any day care facility, or any elementary, middle, junior, or high school.

Special use provisions for outdoor shooting ranges in New Hanover County, North Carolina, require that:

- all shooting areas shall be set back a minimum distance of 100 feet from any street right-of-way;
- the firing range shall have a natural earth embankment at least 10 feet high placed behind all targets within the shooting area;
- the firing range shall be posted “No Trespassing—Danger—Shooting Range,” at 100-foot intervals around the perimeter;
- at least one qualified individual in the sponsoring club or organization shall be certified for shooting range supervision. Each facility shall adopt safety rules and regulations as determined by the sponsoring club or organization;
- the firing range shall be covered by a minimum of $300,000 accident and liability insurance.

Legal vs. Lethal

Because zoning ordinances originate from a local government's police power, which is used to ensure public welfare, legal challenges to municipal gun regulations may be unsuccessful, according to the Legal Community Against Violence, a San Francisco-based organization. (More information is available at the group's web site, www.lca.v.org.) Municipalities can regulate or prohibit uses that jeopardize the character or safety of a residential neighborhood, which may motivate opponents to challenge the municipality under various legal arguments.

Preemption. A preemption challenge by residential gun dealers may face rejection in a court of law. In California, the legislature authorizes cities and counties to regulate the sale of firearms within community boundaries, including decisions about licenses and local fees. State regulations exist as well, including those that require gun dealers to perform background checks. Preemption over local authority would not occur simply because a local ordinance prohibiting residential gun dealers “does not involve firearm registration or licensing.”

Additionally, the ordinance would not contravene the state's penal code requiring background checks because it does not impose any permit or licensing requirements on people who want to purchase firearms for their homes or places of business.

Equal protection. An ordinance challenged as violating equal protection will be upheld if the court finds that it does not specifically target a particular class or compromise a person's basic rights, and as long as there is a logical relationship between the ordinance and a valid governmental objective. If an ordinance that bans residential gun dealers has followed its intended purpose of maintaining the residential character of a neighborhood, then those arguing that it violates their equal protection rights will probably not have a solid legal argument.

A California Superior Court rejected a 1995 equal protection challenge to an ordinance banning residential gun dealers stating in its order, “The sale of firearms is not a fundamental right. There is a rational basis for a ban on gun dealers in residential areas and, accordingly, there is a justifiable exercise of police power.”

Inverse condemnation. Existing residential gun dealers may challenge an ordinance if they think that such regulation will negatively affect their business. They might argue that this would constitute a “taking without just compensation” in violation of the state and federal constitutions. Still, a case for action under inverse condemnation should fail. A taking would occur only if the ordinance imposes substantial constraints on the use of the property as a residence. Prohibiting kitchen-table gun operations does not severely limit a property owner in enjoying the benefits of selling or renting the home, or otherwise living in the home as he or she wishes.

Legislation regulating gun-related enterprises has increased substantially in recent years. Whatever the type of gun-related use, it is clear that zoning laws and other forms of municipal regulation are essential in achieving peaceful solutions.

Outdoor Range Standards

Shooting ranges have safety as the prime zoning purpose for regulation. Most codes require a minimum size of 10-20 acres, with 20 acres more common. Backstops of 50-200 feet are common for large yards and back stops in the line of fire. Buildings located ahead of the firing line are allowed to be located in the normal zone of impact. The site plan must show the location of the firing line or shooting ranges, targets, and backstops and indicate how the backstops are constructed. The backstop must be an earth mound of sufficient dimension to stop projectiles. The range must be screened and fenced with no gaps or sounds except as approved on the site plan to avoid the possibility of unauthorized persons entering the shooting area and to keep noise and shot projectiles from leaving the site. The passengers between the firing point and targets must be enclosed or be in a trench to protect them from projectiles.

An auxiliary retail store and snack shop is allowed, selling convenience items and prepared meals and beverages to patrons of the shooting range, but not drinks or beer, and short-term rental of firearms and equipment for use only on the property. Buildings shall have rooms for cleaning in the use of firearms but not as an indoor shooting range unless approved by the permit.

Big Box Big Issue in California

California is starting out the new year with a new approach to local competition for big box retail stores, courtesy of A.B. 178, which passed the General Assembly last year. Last September, Gov. Gray Davis vetoed a second law passed by the General Assembly that targeted big box retailing. It would have prohibited municipalities from approving retail projects larger than 100,000 square feet if more than 15,000 square feet of the store were used to sell non-taxable merchandise, such as produce.

A.B. 178 prohibits local governments from offering development incentives to retail stores or auto dealers over 73,000 square feet that move from one jurisdiction to another in the same market region. The new law requires that the receiving local government share 50 percent of the sales tax revenue if the relocation results in a loss to the city where the business was originally located. The resulting tax sharing between municipalities would be continued for 10 years. According to Davis, the new law offers a fair approach to dealing with the loss of a large retail store.

State Assemblyman Tom Tolleson, a supporter of the new law, says state and local budget crises have forced governments to compete over business developments that generate sales tax. Threatened cities must then scramble to come up with an investment package or face the relocation of a business to a nearby city. Tolleson previously had tackled this issue unsuccessfully with
MINUTES OF A REGULAR MEETING

URBANA PLAN COMMISSION

DATE: July 19, 2012
TIME: 7:30 P.M.
PLACE: Urbana City Building – City Council Chambers
        400 South Vine Street
        Urbana, IL 61801

MEMBERS PRESENT: Carey Hawkins-Ash, Andrew Fell, Tyler Fitch, Lew Hopkins,
                 Dannie Otto, Michael Pollock, Mary Tompkins

MEMBERS EXCUSED: Bernadine Stake, Marilyn Upah-Bant

STAFF PRESENT: Robert Myers, Planning Manager; Jeff Engstrom, Planner II

OTHERS PRESENT: Robin Arbiter, Camden Baxer, Ronald Berkman, John Boch, Matt
                 Boynton, Jessica Dewitt, Brendon Ellis, Chris Fortier, Will
                 Gillespie, Marcus Harris, Dean Hazen, Mike Holden, Pat Holden,
                 Christina Kniskern, David Martin, Ryan Meekma, Kenneth Selby,
                 Steve Stanley, Susan Taylor, Clyde Walker

COMMUNICATIONS

The following written communications were distributed to Plan Commissioners at the beginning
of the meeting:

- Updated recommendation for proposed Zoning Ordinance text for Plan Case No. 2181-T-12 provided by City staff.

NEW PUBLIC HEARINGS

Plan Case No. 2181-T-12: A request by the Zoning Administrator to amend Table V-1,
Article II, Article V, and Article VII of the Urbana Zoning Ordinance to establish
standards for “Firearm Sales” and “Firing Range (Private Indoor)”

Jeff Engstrom, Planner II, presented this case to the Plan Commission. The proposed text
amendment originated when a property owner contacted the Zoning Administrator to determine
where the Urbana Zoning Ordinance would allow opening a new gun store and firing range in
Urbana. Mr. Engstrom noted that the Federal Bureau of Alcohol, Tobacco, and Firearms (ATF)
enforces federal laws such as the Gun Control Act, the National Firearms Act, and the National
Instant Criminal Background Check System. Additionally, the State of Illinois has adopted firearms laws concerning rules for sale and purchase of firearms. Cities have the ability to regulate firearm sales through zoning or licensing. Zoning regulations may include minimum distances from schools, parks, churches or other gun shops or restricting firearm sales to specific zoning districts.

Mr. Engstrom stated that requirements for shooting ranges were less common than those for firearm sales. For indoor shooting ranges, design standards have been adopted by the federal government to ensure safety and low noise impacts on adjacent properties.

He discussed possible zoning districts in the City of Urbana where firearm sales might be allowed with a Special Use Permit. City staff is proposing firearm sales would only be allowed in the IN-1 (Light Industrial/Office) and B-3 (General Business) Zoning Districts. In addition, City staff is recommending the following three standard conditions for all principal use firearm sales businesses to meet: 1) Require a minimum distance from schools and places of worship; 2) Require a security plan approved by the City of Urbana’s Police Department and 3) Restrict firearms and ammunition from being displayed in windows.

He also spoke about limiting retail sales of firearms as a home occupation and permitting private firing ranges as a conditional or special use in certain districts. The amendment would also limit gun sales out of homes. Upon researching firing ranges, City staff found all of their concerns addressed in the federal guidelines for range design criteria. Staff is proposing to adopt these design guidelines as a requirement for any indoor firing range.

Mr. Engstrom explained how the 2005 Urbana Comprehensive Plan relates to the proposed text amendment. He read the options of the Plan Commission and presented City staff’s recommendation.

Chair Pollock asked staff to explain the processes for acquiring a special use permit and a conditional use permit. Mr. Engstrom then explained the process for each.

Mr. Hopkins asked if there is a particular reason why the special use permits being proposed in the text amendment only apply to IN-1 (Light Industrial/Office). Mr. Engstrom replied that when the City recently created the IN-1 (Light Industrial/Office) and IN-2 (Heavy Industrial) Districts, the intent of the IN-1 District includes limited retail uses, but IN-2 Districts are intended to be limited to heavy industrial uses.

Mr. Hopkins asked how indoor firing ranges related to the CRE (Conservation-Recreation-Education) Zoning District which is primarily public owned land. Mr. Engstrom answered that although CRE zoning is mostly publicly owned, it could also include privately owned property.

Mr. Hopkins asked what constitutes a private firing range as opposed to a public firing range. Mr. Engstrom responded that a new definition would define a “private” firing range as essentially private owned. The proposed text amendment distributed tonight would apply to private firing ranges and not publically owned ranges such as the law enforcement-only range at the closed City landfill.
Mr. Hopkins wondered if the Urbana Park District wanted to open a public firing range, then the proposed regulations would not apply. Mr. Engstrom said that is correct.

Mr. Otto noticed the wide range of minimum distance requirements on Page 3 of the written staff report range from 500 to 2,000 feet. Why is City staff proposing 500 feet distance? Mr. Engstrom explained that the table shows a sample of local standards. Most of the cities require from 500 to 1000 feet, so City staff decided to go with the lower distance. The Plan Commission can recommend a different distance if they wish to do so.

Mr. Otto asked why there are different laws based upon business volume. He feels that there should be one set of regulations. Mr. Engstrom replied that when we generally look at principal uses for different businesses, there are different concerns that would affect them. Larger businesses have larger volumes of traffic. Mr. Myers added that it is the intent of this amendment to deal with land use categories rather than gun sales specifically. This amendment concerns principal use gun stores rather than pawn shops and sporting goods stores which may include gun sales as a smaller component of a broader range of retail sales.

Chair Pollock inquired as to whether the proposed regulations, if approved by the City Council, would be applied to stores that currently sell firearms or would these stores be grandfathered in without the regulations. Mr. Myers responded that because it is a zoning regulation, any firearms stores, private firing ranges, or approved home-based gun sales would be grandfathered as legally non-conforming uses. When the City staff drafted the proposed text amendment, they had firearm stores in mind rather than general retail stores.

Mr. Otto commented that his concern is not so much over the character of the use but more for the security of the inventory. A larger business, such as Walmart, could have a firearm section that while it may only be considered a small portion of their overall inventory could be five times larger than a firearm store. The City needs to have the same laws for any business who would sell firearms.

Mr. Otto noted that on Page 7 of the memo, under Section V-13. H. (home occupations) it states that, "....No firearms inventory shall be regularly kept in the home." He felt this language should be removed for the simple reason that a firearm dealer with a home occupation permit will probably have a stock of guns for their own personal possession kept at home. How would one determine whether this would be part of the inventory or part of the dealer's personal collection? Mr. Myers stated that the City is not intending to limit gun ownership through this Zoning Ordinance amendment. The home occupation ordinance is vague in several major respects, including that it doesn't prohibit retail sales from the home. Allowing outright retail sales from a home flies in the face of residential zoning. Prohibiting stock in trade at home is intended to insure that a gun dealer operating from the home with internet sales does not become a gun store operated in a residential zoning district.

Mr. Fell asked if a firearm store owner wanted to provide a place for a potential buyer to fire a gun prior to purchasing it, would it be considered a firing range? Mr. Engstrom stated that this would be considered a private firing range. Chair Pollock pointed out that this could only happen in certain districts with the approval of a special use permit.
With no further questions for City staff, Chair Pollock opened the hearing for public input.

Marcus Harris and Dean Hazen approached the Plan Commission. Mr. Harris explained that he owns rental property and Mr. Hazen approached him about relocating his home firearm business. After researching firearm sales and firing ranges and reviewing the properties that he owns, he found two locations that would be suitable for these uses. The property at 705 South Glover Avenue might be a gun store, and 801 South Poplar might be suitable for an indoor firing range. Mr. Harris said he approached City staff about the process of opening each business.

Mr. Myers asked Mr. Harris to talk about the design of indoor firing ranges. Mr. Harris noted that the National Rifle Association (NRA) offers range conferences, and professional firing range outfitters can be hired to construct firing ranges to meet the federal, state and local regulations. Building or retrofitting a building to meet these standards requires a considerable investment.

Mr. Fitch questioned whether Mr. Hazen had any concern about possibly opening a firearm store close to an establishment where alcohol is served and consumed on premises. Mr. Hazen did not have any concern with this because most alcohol would be served in the evening during the hours when his business would be closed.

Mr. Fitch asked if Mr. Hazen felt confident that a security plan would cover any problems that might be unique to a similar location. Mr. Hazen recognized that the Plan Commission did not want to get specific details about his plans to open a firearm store and firing range, but he currently has an extensive security plan for his home business in which he has invested a lot of money.

Mr. Hazen spoke about larger chain stores selling firearms. Walmart used to sell guns at one time. However, he is not aware of any chain store in the area currently selling firearms. One reason why is because the stores would have to invest more training and money in employees authorized to handle firearm sales. The employees would have to pass written tests and background checks, obtain FOID cards and undergo extensive training. In addition, there are strict regulations on selling firearms and a large amount of paperwork to file when a firearm is sold. Larger chain stores realized it was not worth the extra cost, so they discontinued selling firearms in their businesses.

Mr. Hazen asked if there is a fee to apply for a special use or conditional use permit. Mr. Engstrom said yes. The fee is $150.00 for a conditional use permit and $175.00 for a special use permit. This is a one-time fee rather than annual.

Ron Berkman, of 1003 Philo Road, stated that shooting is a sport for him and his wife. They support the idea of allowing firearm sales and firing ranges in the City of Urbana. The nearest indoor firing ranges are in Bloomington, Rochester, and Pocahontas. They belong to the local clubs that provide outdoor shooting ranges in St. Joseph, Sadorus, and Foosland. They would like a local place to go when it gets cold outside. The use of firearms has to do with training and knowledge. There should be more information disseminated throughout the population. The City already supports bicycles and art, and there is no reason for the City not to support the sport
of shooting firearms. Firearms are simply machines, just like cars, motorcycles, boats, and aircrafts. Any of these could be used as weapons.

Robin Arbiter, President of the Lierman Neighborhood Action Committee (LNAC), and Jessica Dewitt, resident of the City of Urbana, came before the Plan Commission to speak. They handed out copies of a letter to the Plan Commission regarding the concerns of the Lierman Neighborhood Action Committee, and Ms. Arbiter read the letter aloud. The Lierman Neighborhood Action Committee does not want gun stores to be allowed by right but instead considered on a case-by-case basis. They want businesses and services which will serve and support the community. They need a store where they can buy fresh food. They already have liquor sales and adult entertainment. A gun store would not benefit the neighborhood.

Chair Pollock pointed out that many of the standards that LNAC recommends are included in the proposed text amendment. Ms. Arbiter replied that they do support the proposed text amendment and feel that it addresses many of the neighborhood’s concerns. The one area where the proposed text amendment had less emphasis is in spelling out the community impact. Chair Pollock assured them that every time the Plan Commission meets to review a case, they consider the impact that their decision would have on the community.

Ms. Dewitt wondered if a gun shop being located in a neighborhood would lower the property value of the homes in that neighborhood. Mr. Engstrom said he could research this issue.

Ms. Dewitt mentioned that there could be a potential for a secondary market of firearms even though this would be illegal. A firearms store locating in a neighborhood such as the Lierman Neighborhood would not present a good image for the neighborhood.

John Boch, President of Guns Save Life, approached the Plan Commission to speak. He encouraged the City of Urbana to adopt regulations that are more permissive than restrictive to avoid the potential for legal expenditures down the road. If the City adopts rules that are highly restrictive, it could lose in court like the City of Chicago and have to pay big money. He did not see a need for any setback requirements from other uses. The Constitution’s Second Amendment, the right to keep and bear firearms, is right on par with the right to free speech, freedom of religion, etc. Firearms used properly are very safe and beneficial. If they are used for criminal acts, then let the justice system take care of the offenders.

Chair Pollock asked if Mr. Boch had read the proposed text amendment and would he term it as being “highly restrictive”. Mr. Boch responded that based on his reading he believes that there is some wiggle room in the language and that it is not terribly objectionable. He hoped that it would not be amended to become more restrictive than what it appears in its current state.

Steven Stanley, resident of Liberty Commons, stated that he is a gun owner. He pointed out that purchasing firearms is already very restrictive with the federal and state regulations. He hoped that the City of Urbana would not create an ordinance that would infringe upon gun owners. Allowing indoor and outdoor shooting ranges would be beneficial to gun owners as well as to the City. Gun owners would have a local place to go, and the City would benefit from the revenue that shooting ranges would generate.
Kenneth Selby, a federally licensed firearms dealer, talked about his life experience with regards to firearms. He feels that the proposed text amendment is overly restrictive with regards to distance from schools. He owned a firearm store in Jacksonville that was within 300 feet from a public school and across the street from the athletic field for the high school. The only issue he had would be when there was a football game on Friday night with parents and fans parking in his parking lot. He never had an issue with kids coming into his shop because they were not old enough to purchase firearms. Another issue he has with the proposed text amendment is with regards to inventory. The ATF will not allow a person to open a firearms store out of their home unless they have specific hours of operation. “By appointment only” will not be approved by the ATF. In his current firearm business, which is located in Rantoul, he does mostly internet sales. Firearms are delivered to his house by regular carriers, and he ships firearms to his clients through the United States Post Office. He has about 30 guns in his inventory that he advertises on the internet.

The ATF allows for individuals to open firearm businesses in their homes, grow their business, and once the business has outgrown the home, the individual can move their business into a shop elsewhere in the City. However, the proposed text amendment as worded would not allow this to happen in the City of Urbana.

David Martin, resident of rural Urbana, noted that with regards to indoor shooting ranges, the City of Bloomington is 55 miles away, the range in the Danville area is north of Oakwood about five miles, and the Village of Foosland is approximately 7 to 8 miles north of Mahomet. To have an indoor shooting range close by for the citizens of Urbana and for residents of the surrounding areas would be a great benefit to the area. If ever the State of Illinois adopts a conceal/carry law, then there would be a big business in firearms training. People would need a place to practice.

Mr. Hazen re-approached the Plan Commission to address comments that were mentioned by other speakers. He verified Mr. Selby’s comments about the ATF requiring specific hours of operation for home based firearms businesses. In his current home business, he has one day a week with limited hours of operation to meet ATF’s regulations and restricts other business to no more than five visits per day to meet local regulations.

Regarding inventory, Mr. Hazen has about 65 to 70 guns in his business inventory. He has construction toolboxes bolted to the floor, alarms in the house, motion sensors, and barbed windows in the garage. He has customers who have four to five times the number of guns in their personal collections than he has in inventory, and his customers do not have nearly as much security as he does. He wanted to discuss what the City’s concerns are regarding security in terms of inventory.

With regards to his business and the proposed text amendment, Mr. Hazen understood that his home business would be grandfathered in. While the proposed text amendment would prevent any future competition, he believes in the American dream and that others should have the same opportunity that he has had. He mentioned that he has not made any money in the year and a half that he has been in business. It is a labor of love. Most of the firearm dealers that work out of their homes have this type of business because of fond memories from hunting with their fathers or learning how to shoot guns in school.
He talked about the Police Training Institute located on the University of Illinois' campus. He noted that this is not a public range. It is a shooting range for people who belong to the faculty and staff shooting club. The Urbana Police Department has their own range on the north side of town.

He stated that he is a police officer and a resident of southeast Urbana. He is very concerned about the development of southeast Urbana in terms of home values, crime rate and safety. When good businesses pull out of a neighborhood then it leaves more room for the crime rate to increase. Gun owners and firearm store owners are some of the most civic minded, methodical, and responsible people. This is the type of people who will be frequenting a firearm store; not people under the influence of alcohol or felons. He would like to see the neighborhood get built up with good business no matter what the business may be.

Mr. Myers explained that the intent of only allowing business "by appointments" is to prohibit retail trade from occurring in a home. Mr. Hazen asked that now City staff knows that the ATF require at least one day with limited hours if they could include that in the language of the proposed text amendment so that it would be possible for an individual to open a home-based firearm business. Mr. Myers said yes.

Mr. Harris mentioned that he owns about 50 residential properties in the neighborhood. He would not do anything to impact the value of those properties. Therefore, he would not rent to Mr. Hazen if a firearms store would lower home values.

Mr. Hopkins wondered if there is alternative language that would be more directly useful than not allowing any inventory be kept in a home based business. Mr. Hazen stated his security plan for his home based firearm business is on file with the Urbana Police Department as well as with METCAD. Mr. Hopkins proposed that the City change the language in the proposed text amendment to make it a requirement for any home based firearm business to submit a security plan to the Urbana Police Department and to METCAD in lieu of any other regulations.

Mr. Ash wondered if Mr. Harris or Mr. Hazen, upon getting approval in the future to open a firearm store and/or indoor shooting range, would provide educational training for people who are interested in learning about firearm safety. Mr. Harris remarked that if people are interested in the educational or training component, then he would be willing to have open doors to offer it and possibly even have some competitor events. Mr. Ash felt that by offering education and working together with people to obtain their FOID cards, that it could help bridge the gap between them and the community.

Mr. Berkman re-approached the Plan Commission. He mentioned that he has a home-based business and deals with people as clientele. He communicates with them through email and periodically someone will come by to pick up their product. He also has mail order customers. A gun shop and a shooting range could serve as a focal point for the individuals who are capable of sharing information with those who are interested in becoming involved. The more communication they have and the more interchange they have between the groups, then the better the end product will be.
Michael Holden, of 1209 East Michigan, welcomes an indoor shooting range. He, especially, likes the idea of a range being located close to his home so he could walk there. He asked why the Pledge of Allegiance was not said at the start of the meeting. Chair Pollock stated that it is said at City Council meetings in conjunction with holidays. Mr. Holden commented that he wished it would be said at the start of all government meetings.

Steven Stanley re-approached the Plan Commission. He talked about education and how it increases safety and it teaches people not to be as scared of firearms.

Ryan Meekma, resident of the City of Urbana, talked about how when he first moved here he was unable to meet new people who enjoyed the same hobbies as him, especially when it came to shooting as a sport. It took him two years to find shooting clubs in other communities. He advised people to be careful when talking about guns or firearms and not call them weapons. It offends those who like shooting as a sport or for hunting. We need to educate people correctly so that they do not consider guns as weapons.

Clyde Walker, of 901 South Lierman Avenue, senses an irony in the idea of locating a firearm store in an area where so much gun violence has occurred over the last several years. To him it is a matter of semantics of whether they are called firearms or weapons because the potential physical and psychological results are still the same.

With no further input from the audience, Chair Pollock closed the public input portion of the meeting and opened it up for further questions for City staff from the Plan Commission.

Mr. Ash questioned whether the two existing home-based firearm store permits would expire and have to be renewed. If so, would they be renewed under the amended ordinance? Mr. Engstrom said no, home occupation permits, once granted, are perpetual as long as the home owners abide by the conditions in their applications.

Chair Pollock then opened the meeting up for Plan Commission discussion. Mr. Hopkins felt that the Plan Commission needed to make some revisions to the proposed text amendment prior to making a motion.

One revision would be to Section V-13, Paragraph H. Mr. Hopkins believed that they should require approval of a site security plan by the Urbana Police Department. This should be the only requirement listed in this paragraph. The current proposed language is over written in trying to solve concerns of the City staff. The Urbana Police Department should be able to figure out whether a size of inventory requires some kind of alarm system or not.

Mr. Otto felt that anything they come up with should be in accordance with the ATF. He felt that Mr. Hopkins' suggestion to require approval of a site security plan by the Urbana Police Department is too broad or general, and he is worried that the responsibility of making the decision might fall on someone with less experience with the ATF's regulations. He would like for City staff to find the specific regulations that the ATF requires. It was the consensus of the Plan Commission to have City staff look at what types of issues we should have the Urbana Police Department look at, what the ATF regulations are and some options for how to reword the language so that it fits with the ATF criteria as well as safety concerns for the City's neighborhoods.
Mr. Otto inquired about current regulations for existing home-based businesses with regards to hours of operation. Mr. Myers replied that there are many issues with the home occupation ordinance. It does not actually say that retail is not allowed; however, it has been a long-standing interpretation that it does not include retail sales. It does not generally prohibit having business hours open to the public because some home occupation uses that are permitted may need to have hours of operation, such as a hair salon/parlor. Chair Pollock suggested that given the vagueness of the ordinance in general and its various different applications depending on types of businesses that when the Plan Commission looks at gun sales in particular they hone in specifically on this use. The Plan Commission should leave the recrafting of the home occupation ordinance in general to a later date.

Mr. Hopkins felt that the notion of distance from other uses needs some justification. Chair Pollock voiced his idea that maybe discussion on this should take place during the special use permit process depending on the property, adjacent properties and the zoning of the properties. Mr. Fitch stated that he would like to see a justification of why 500 feet would be appropriate instead of 200 or 300 feet and why does it only apply to churches, schools and mosques. Why does it not apply to businesses that sell alcohol? He believes it warrants more discussion and research by City staff.

Mr. Hopkins understood Section VII-5. Paragraph D to be specific conditions to be added to the special use criteria for firearms in addition to general criteria for special uses. It seems to him that Item 4 is so vague that it is covered under the general criteria for special uses, and therefore invites misinterpretation. Chair Pollock added that special use permit process provides great flexibility for the Plan Commission and the City Council to make those determinations on a case-by-case basis, so there is really no reason to have Item 4 in the ordinance. It was the consensus of the Plan Commission to remove Item 4.

Mr. Otto pointed out that there had been no discussion on hours of service for a firearm sale use. The Plan Commission agreed that City staff should research this more and find if other areas have hours of operation for firearm sale use as home occupations.

Mr. Otto stated that he would prefer to include the outdoor shooting range use with the proposed text amendment rather than to wait until someone expresses an interest. Chair Pollock mentioned that he had previous conversations with City staff prior to the meeting about how to handle this. City staff is not ready to present a text amendment to the Zoning Ordinance on outdoor shooting ranges. However, it is on the list of what City staff is planning to propose changes to or create in the form of future text amendments.

Mr. Ash asked Mr. Harris and Mr. Hazen whether they would offer firearm educational services to which they assented.

Chair Pollock announced that this case will be continued at the next regular meeting of the Plan Commission.
MINUTES OF A REGULAR MEETING

URBANA PLAN COMMISSION

DATE: August 9, 2012

TIME: 7:30 P.M.

PLACE: Urbana City Building – City Council Chambers
400 South Vine Street
Urbana, IL 61801

MEMBERS PRESENT: Carey Hawkins-Ash, Andrew Fell, Tyler Fitch, Dannie Otto, Michael Pollock, Bernadine Stake, Mary Tompkins

MEMBERS EXCUSED: Lew Hopkins, Marilyn Upah-Bant

STAFF PRESENT: Robert Myers, Planning Manager; Teri Andel, Planning Secretary

OTHERS PRESENT: Marcus Harris, Dean Hazen, Susan Taylor

CONTINUED PUBLIC HEARINGS

Plan Case No. 2181-T-12: A request by the Zoning Administrator to amend Table V-1, Article II, Article V, and Article VII of the Urbana Zoning Ordinance to establish standards for “Firearm Sales” and “Firing Range (Private Indoor)”

Robert Myers, Planning Manager, presented an update of the proposed text amendment to the Plan Commission. City staff intends for the proposed text amendment to establish standards for firearm sales as a land use category rather than as an activity. Based on this, City staff modified the proposed term “firearm sales” to “firearm store” in Table V-1, Table of Uses.

At the request of the Plan Commission, Mr. Myers has further researched minimum distance requirements for firearm stores and firing ranges. He pointed out that there are minimal distance requirements for other uses in the City of Urbana are common, such as billboards and adult entertainment uses. He talked about minimum distance requirements for firearm sales and the results of the court case Illinois Sporting Goods Association versus County of Cook (1994). Establish minimum distance standards can be a reasonable zoning requirement, but City staff recommends that the standard minimum distance requirement be removed from the proposed ordinance since it is limited to two specific uses: firearm stores and firing ranges. The Plan Commission could choose to recommend minimum distance requirements, but City staff would need to do further legal research to determine whether these standards would need to be applied across the board to all firearm sales. The proposal in writing before the Plan Commission is to
deal with potentially sensitive nearby land uses such as churches and schools on a case-by-case basis through the special use permit process.

To address Plan Commission questions about what elements might be included in site security plan, Mr. Myers met with Dean Hazen and Roger Tillman of D & R Firearms to review the security used for their home-based business. Mr. Myers discussed these elements and suggested that the Plan Commission could make approval of a security plan a standard condition.

Chair Pollock opened the hearing up for Plan Commission questions to City staff. The questions and answers were as follows:

If a minimum distance regulation was supported and added to the proposed text amendment, how would it affect a home-based firearm dealer use? Mr. Myers replied that minimum distance requirements would not apply to a home based business because the use is accessory to the principal use as a home.

If the proposed text amendment is approved, would it prohibit home-based firearm business? Mr. Myers responded that such uses would still be permitted as long as it meets all of the City’s home occupation standards and complies with approved permits.

Does the City’s existing Home Occupation Ordinance require a security plan? Mr. Myers responded that it does not.

What about firing ranges? Mr. Myers responded that the current Zoning Ordinance does not have indoor firing ranges in the Table of Uses. As being proposed, the City would review requests for firing ranges on a case-by-case basis to ensure compatibility with neighboring properties.

There was a concern about who would approve a site security plan given that the proposed wording would be approval by the Police Department. Mr. Otto would be more comfortable identifying the Chief of Police as the person who reviews site security plans rather than just naming the Police Department. Mr. Myers said this could be changed.

There was also concern that there are no restrictions on the hours of operation. It is conceivable to have hours of operation as long as it relates to a public purpose.

Should there be a specific list of security measures that a future owner would be required to complete? Mr. Myers recommended that this be left to the Chief of Police to determine what type of security would be needed for each business. The City could also address this when reviewing and deciding upon the special use permit request that is required to open a firearm store.

Are firearm dealers required to renew their site security plans every so often? It would be reasonable to require periodic review of security plans.
Are regulations in a special use permit process allowed to be determined based on the specific needs of that particular request without regard to other special use permit approvals that have come before? Mr. Myers responded “yes”.

Could an age limit be placed on entry into the store as a condition on approval of a special use permit request? How old must a person be to obtain a FOID card? Mr. Myers believed an age limit could be a condition if the City finds a reasonable relationship between the age limit and protecting the public.

Does the City of Urbana impose hours of operation for alcohol sales? Mr. Myers responded that City staff could find out and get back to the Plan Commission.

Why would private indoor firing ranges require a conditional use permit rather than a special use permit in the AG, Agricultural, and CRE, Conservation-Recreation-Education, Zoning Districts? Wouldn’t the City Council want to review all of these uses? Mr. Myers explained that because AG and CRE Zoning Districts usually have large lots, firing ranges established there are less likely to impact neighbors and so a conditional use seems reasonable. But there is some logic to having all of these uses approved by the Plan Commission and City Council as Special Use Permits. Mr. Myers would support this change.

In researching the distance from specific uses, did City staff find any communities that regulate distance between a firearm store and a business that sells alcohol? Yes, occasionally. The most common distance regulations applied to schools, residences, places of worship and parks. Distance requirements to liquor stores is probably the fifth most common.

With no further questions for City staff, Chair Pollock reopened the public hearing and asked for any comments from the public.

Dean Hazen and Marcus Harris came before the Plan Commission to speak.

Following up on Plan Commission questions, Mr. Hazen explained that a person must be at least 18 years old to obtain FOID card and 21 years old to purchase. An 18-year-old can purchase shotgun and 22-rifle ammunition only.

A firearm business is required by the Federal Bureau of Alcohol, Tobacco, and Firearms (ATF) to have a block of hours that the business is open, even if it’s just a couple of hours a week. The reason is because the ATF can only inspect the business during business hours. For this reason a home occupation firearms dealer needs to be able to have some limited hours open to the public.

With regards to restricting the age limit for people who can enter a firearm business, he stated that some of his customers bring their children with them when coming to his business. They are out running errands and stop by his business to see what he has for sale. Owners of this type of business and the children’s parents are not going to allow the children to handle guns. It is actually educational for children as part of firearms safety. It would not be onerous for the City to place an age restriction for entrance as long as they include that minors can be accompanied by their parent or legal guardians. It is a state law that a person must have a FOID card to even
look at or touch a firearm. He believes that the reason an 18-year-old can purchase a FOID card is for hunting purposes. Even then, the 18-year-old has to be sponsored by a parent.

He confirmed that there is a 72 hour waiting period to purchase a hand gun and 24 hour waiting period to purchase a long gun (shotgun or rifle). He explained the process for completing a background check. In the case where the waiting period has expired and he has not heard back from the Illinois State Police, there are specific steps to follow. After the initial 72 hour waiting period, he calls the State Police’s FOID Division to inform them that he has not heard anything about the customer. They have an additional 2 days to respond. After 5 days with no response, the customer is legally able to purchase a firearm. But the firearm dealer is not obligated to sell a gun. He has turned down a few people even though they had a FOID card.

There was a concern expressed about the potential noise produced from an indoor firing range. Mr. Hazen said that any indoor shooting range he has visited he has not heard any noise outside whatsoever except in a few cases when someone is shooting something enormously loud. Chair Pollock pointed out that as mentioned earlier, an indoor shooting range is only allowed in the AG and CRE Zoning Districts, which are usually fairly large sized parcels. However, if an indoor shooting range is proposed to be located within the City on a smaller size lot, then the noise level is something that could be addressed during the special use permit process.

Mr. Hazen noted that easily 90% of his customers have inquired about places to practice shooting and receive training and education on firearms. There is no place locally for the public to go. Some people set up cans along the roadside to practice shooting, which is extremely dangerous because bullets can travel a long distance.

With regards to restricting hours of operation for a firearm store, Mr. Hazen thought that a closing time of 7:00 p.m. or 8:00 p.m. would not interfere with business. Most customers visit his business either before work, after work or on the weekends. Mr. Harris recommended for a shooting range, extending the hours of operation from 9:00 a.m. until 9:00 p.m. Weekends are very popular.

As for firearms, Mr. Hazen explained that most people bring their own firearms to a shooting range. However, most shooting ranges will have firearms that people can rent while at there. This gives people an opportunity to fire a gun that they may not own or have wanted to try.

Customers must have FOID cards. There are certain regulations people must follow to transport their firearms to a shooting range. Once a customer arrives, a range officer would then inspect the firearm to ensure that it is safe and would also inspect the customer’s ammunition because there are regulations on what type of ammunition can be used at a range.

Mr. Harris stated that firing ranges are often conjoined with gun stores, or they sell their own ammunition and firearms. Sometimes the gun store and the shooting range are owned by separate people.

With no further input from the public, Chair Pollock closed the public hearing and opened it up for further questions for City staff from the Plan Commission.
The Plan Commission asked how a "school" was defined. Mr. Myers explained that staff uses the definitions in the Zoning Ordinance as land use categories to find principal uses of properties. The Zoning Administrator would interpret what the principal use of a property is based on the definitions in the Zoning Ordinance prior to a special use permit request coming before the Plan Commission or City Council.

With no further questions, Chair Pollock entertained Plan Commission discussion and/or motion(s).

Mr. Foll wondered if the minimum distance requirement should also apply to home occupation permits. It seems that every other instance where we have a minimum distance requirement, it is something that would never be a home occupation use, such as radio tower, wind turbine, etc. If we apply a minimum distance requirement to a firearm store, then we also need to apply it to a home-based firearm business. Mr. Myers replied that this opens up the issue of whether a minimum distance should be required for any business that sells guns. This would include a pawn shop or a sporting goods store, which are both permitted by right in certain zoning districts. As such, gun sales would only be a small portion of the overall business either in square footage or in their level of income. The City could never allow outright retail sales in any home occupation business because it flies in the face of residential zoning. Mr. Fell pointed out that home firearm businesses are required to be a retail shop for a certain period of time each week by having set hours of operation. Mr. Myers replied that City staff does not consider it to be a retail shop just because they have a few hours of operation. They have prior arrangement for visits on a clientele basis. The hours of operation could be time when pre-arranged clients could come to fill out paperwork, finalize a sale that started on the internet, pick up a product, etc. The proposed text amendment as written does not include minimum distance requirements. Each request would be considered on a case-by-case basis. Mr. Otto stated that it would be a good idea for the City to require a rationale for placing a minimum distance requirement on a specific request. Mr. Myers agreed.

Mr. Ash wondered if there should be any distinction for combination firearm stores/firearm ranges guns. Mr. Ash said that the two uses could cohabitate in one building with a wall separating them. Chair Pollock believes that they could impose a minimum distance requirement on the gun range from schools, churches, etc. in this instance.

Mr. Myers stated that there are two ways to deal with adjacent uses. One is through the approval process and the other is through standard conditions. The City could say that any specific use (such as billboard, firearm store, indoor shooting range, etc.) has to be a specified distance from another type of use (such as residential, church, etc.). Another way to deal with the use is to require a special or conditional use permit where it would be reviewed on a case-by-case basis. A third option would be to require both a minimum distance and a special or conditional use permit. Chair Pollock added that this part of the process is simply what zoning districts a firearm store or indoor shooting range would be allowed in and what type of process would an owner go through to locate there.
Ms. Stake talked about the danger of having a firearm store located near schools. There have been 100 school shootings since the deadly 1999 Columbine High School shooting. It is not reasonable to locate a firearm store or indoor shooting range in an area where there is already a high crime rate. She is opposed to people owning guns.

Could a firearm store currently be established in a commercial district? Mr. Myers responded that it could not now be established as a primary use. It could be part of a larger retail use such as a sporting goods store or pawn shop. The Zoning Administrator would need to make this interpretation.

There was discussion about the noticing requirements for special and conditional use permit hearings. City staff is required to notice public hearings within 250 feet, excluding City right-of-ways. If the Plan Commission desired to increase this distance, then they could add that to the recommendation that they forward to City Council for the proposed text amendment.

Mr. Fitch moved that the Plan Commission forward Plan Case No. 2181-T-12 to the Urbana City Council with a recommendation for approval as indicated in the revised written staff report dated August 3, 2012. Mr. Fell seconded the motion.

Mr. Ash moved a friendly amendment to amend Section V-13.H to read as such: The sale of firearms as a home occupation shall require approval of a site security plan by the Chief of Urbana Police Department or his designee for renewal every three years. Mr. Otto seconded the motion.

Mr. Ash stated that this will incorporate what the Plan Commission had already discussed in specifying the officer responsible for approval. If the Chief of Police is too busy, then he can designate one of his responsible deputies. It also incorporates Mr. Fell’s comments as to the renewal period in the event that there is growth and expansion for the business owner.

Mr. Otto called the question on the amendment. Mr. Fitch seconded. A hand vote was taken and the question on the amendment passed.

Roll call on the motion to amend was as follows:

The motion to amend was approved by a vote of 6-1.

Mr. Ash moved a friendly amendment to amend Section VII-5. Special Use Terms and Conditions Subsection D, Number 1 to read as such, “Urbana Police Department approval of a site security plan shall be submitted to the Urbana Chief of Police or his designee for his approval every three years as a condition for approval of a Special Use Permit.” Ms. Stake seconded the motion.
Mr. Fell understood the motion to mean that a firearm store owner would have to get approval of a new Special Use Permit every three years. Mr. Ash stated that his intent is to require a firearm store owner to resubmit a security plan every three years as a condition of the approval of the permit.

Chair Pollock presented a scenario where a store owner gets approval of a special use permit to locate a firearm store, submits a site security plan and it is approved, then three years later resubmits a site security plan as required that is not approved by the Chief of Police or his designee, what happens then with the special use permit? Mr. Ash replied that the Chief of Police would give notice of the denial of the site plan, and the special use permit would come back to the Plan Commission in terms of the validity of the permit. It would actually trigger a review of the special use permit.

Mr. Otto likes this idea, because many times a special use permit is granted and there is no way to enforce that the owner is complying with the conditions of the permit. For example, when an owner agrees to contract for additional required parking. They let the parking contract lapse after getting approval of the special use permit, and the City has no way of enforcing that a new contract be arranged.

There was discussion by the Plan Commission about whether the owner should be notified every three years when the time comes to resubmit a site security plan or whether the owner should be held responsible to resubmit on their own similar to a driver’s license. It was pointed out that there is an expiration date on a driver’s license alerting the individual when his/her license would expire. The Plan Commission decided it should be an administrative decision.

Chair Pollock asked for the motion to amend to be read back to them.

Roll call on the motion to amend was as follows:

<p>| | | | | |</p>

The motion to amend was approved by a vote of 5-2.

Mr. Otto moved a friendly amendment to Table V-1. Table of Uses to change the level of review for Private Indoor Firing Range in the AG and CRE Zoning Districts from C (Conditional Use Permit) to S (Special Use Permit). Mr. Fitch seconded the motion.

Mr. Otto stated that an indoor firing range use has the potential to generate a lot of public interest and controversy. Therefore, he believes that it should require review and action by the Urbana City Council. Chair Pollock agreed.
Roll call on the motion to amend was as follows:

<table>

The motion to amend was approved by unanimous vote.

Mr. Otto moved a friendly amendment to Section VII-5. Special Use Terms and Conditions – Subsection D to add Number 3 and Subsection E to add Number 2 to read as such, “Hours of Service shall be limited to 9 a.m. to 9:00 p.m.” Mr. Fitch seconded the motion.

Mr. Otto felt that the earlier discussion explained the intent of this friendly amendment.

Roll call on the motion to amend was as follows:

<table>
<thead>
<tr>

</tbody>
</table>

The motion to amend passed by a vote of 4-3.

Chair Pollock moved a friendly amendment to Section VII-5. Special Use Terms and Conditions – Subsection D to add Number 4 and Subsection E to add Number 3 to read as such, “No individual under the age of 21 unless accompanied by a parent or guardian will be allowed on the premises.”

Mr. Ash requested that they add “...legal guardian...”

There was discussion about 18-, 19- and 20-year olds being able to enter purchase some types of ammunition. The Plan Commission decided that these individuals are exempt from the regulation because they are not old enough to purchase firearms anyway.

There was discussion about if the government lowers the age restriction to purchase firearms. The Plan Commission decided to change the language in the amendment to read “...under the legal age of 21 to purchase a firearm...”

Chair Pollock restated the amendment to read as follows, “No one under the legal age to purchase a firearm in the State of Illinois will be allowed on the premises without a parent or legal guardian.” Mr. Otto seconded the motion.
Roll call on the motion to amend was as follows:

Mr. Pollock    -    Yes    Ms. Stake    -    Yes
Ms. Tompkins  -    Yes    Mr. Ash     -    Yes
Mr. Fell      -    Yes    Mr. Fitch    -    Yes
Mr. Otto      -    Yes

The motion to amend passed by unanimous vote.

Mr. Fitch moved a friendly amendment to Section VII-5, Special Use Terms and Conditions to add Subsection F to read as such, “Require notification for Special Use Permit to property owners within 500 feet of the subject property”. Ms. Stake seconded the motion.

Mr. Fitch felt this amendment is preferable for setbacks. Rather than setting a minimum distance requirement between uses, he believes that notifying a larger area of pending public hearings will generate more input for the Plan Commission and the City Council to use in making decisions. There was discussion about whether or not 500 feet would be enough. Mr. Myers clarified that 500 feet would be from the outer property line of the parcel on which the use is located, not from the building in which it would be located.

Roll call on the motion to amend was as follows:

Ms. Stake    -    Yes    Ms. Tompkins    -    Yes
Mr. Ash      -    Yes    Mr. Fitch     -    Yes
Mr. Fitch    -    Yes    Mr. Otto      -    Yes
Mr. Pollock  -    Yes

The motion was passed by unanimous vote.

With no additional amendments, the main motion read as follows:

The Plan Commission forward Plan Case No. 2181-T-12 to the Urbana City Council with a recommendation for approval as amended in the revised written staff report dated August 3, 2012 along with the following amendments:

1. Amend Section V-13.H to read as such: The sale of firearms as a home occupation shall require approval of a site security plan by the Chief of Urbana Police or his designee for renewal every three years.

2. Amend Section VII-5. Special Use Terms and Conditions Subsection D, Number 1 to read as such: A site security plan shall be submitted to the Urbana Chief of Police or his designee for his approval every three years as a condition for approval of a Special Use Permit.

3. Amend Table V-1, Table of Uses - Change the level of review for Private Indoor Firing Range in the AG and CRE Zoning Districts from C (Conditional Use Permit) to S (Special Use Permit).
4. Amend Section VII-5. Special Use Terms and Conditions – Subsection D to add Number 3 and Subsection E to add Number 2 to read as such, “Hours of Service shall be limited to 9 a.m. to 9:00 p.m.”

5. Amend Section VII-5. Special Use Terms and Conditions – Subsection D to add Number 4 and Subsection E to add Number 3 to read as such, “No one under the legal age to purchase a firearm in the State of Illinois will be allowed on the premises without a parent or legal guardian.”

6. Amend Section VII-5. Special Use Terms and Conditions to add Subsection F to read as such, “Require notification for Special Use Permit to property owners within 500 feet of the subject property.”

Roll call on the main motion and amendments was as follows:

The motion was approved by a vote of 6-1.

Mr. Myers noted that Plan Case No. 2181-T-12 will be forwarded to City Council on Monday, August 20, 2012.
Staff Report
Plan Commission
February 6, 2013

Subject Property: N/A (Text Amendment)

Zoning District: Subject text amendment is applicable to all zoning districts

Requested Action: Text amendment to the Definitions Section Article II, Part A, 2.02, relative to Fence, Semi-Private, or Semi-Private Fence; Banquet Facility, Façade, and Restaurant/Restaurant, Fast-Food or Carryout

Nature of Request: Certain text amendments are proposed to eliminate unnecessary/confusing references and to clarify certain definitions.

Petitioner: Village Board

Summary
Fence, Semi-Private, Or Semi-Private Fence: Section 2.02 of the Zoning Ordinance defines semi-private fence as:

“FENCE, SEMI-PRIVATE, OR SEMI-PRIVATE FENCE: A Fence which is not a Solid Fence nor an Open Fence. These types of fences are restricted to board-on-board and shadow box types. The open space between vertical fence boards shall not exceed 85% of the width of the boards on the same side of the Fence.”

This definition refers to both board-on-board and shadow box as fence types. However, board-on-board and shadow box are the same type of fence. To clarify the definition the Plan Commission may consider removing one of the references.

Façade
The generally accepted definition of façade is, “Any side of a building facing a public way or space and finished accordingly.” For purposes of applying certain Zoning regulations, communities often narrow the definition to state that facades are any side of the building facing a street and/or public right-of-way. This definition is important because there are greater design standards that apply to facades than other building elevations. As a result, it is clear that the intent is to require higher quality design and materials on those portions of a building that will be most likely visible to the general public. Conversely, there is an acknowledgement that not all elevations are required to have the same high quality finishes.
Staff believes the definition adopted and found in the Zoning Ordinance can be unclear. It reads: 

**FAÇADE:** The exterior wall of a building that is exposed to public view.

The challenge with this definition is that all exterior walls of a building can be exposed to public view. Is it the intent of the Zoning Ordinance to require high quality materials on all building elevations or is it the intent to require high quality materials on those building elevations facing a street. By defining façade as the Zoning Ordinance currently does there is very little differentiation between building elevation and façade. As such,

Staff recommends the definition be clarified to read that a façade is that portion of a building that faces a public street. This would align with the more commonly used definition of façade as well as staff’s interpretation on the intent.

**Banquet Facility, Banquet Hall**
Staff notes that Banquet Halls are not listed in the Land Use Table however there is a definition for the use. Staff recommends clarifying that such uses are not permitted, that the definition be eliminated from the Definitions section of the Zoning Ordinance.

**Restaurants & Restaurants, Fast-Food or Carryout**
The definitions section of the Zoning Ordinance defines “Restaurant” and “Restaurant, Fast-Food or Carryout” separately. The reference and consideration that these are different types of uses are repeated in Section VII Table 7.01.1 the Off-Street Parking Schedule. However, the Permitted and Special Uses Table 4.01.1 lists only “Restaurant” with no reference to “Restaurant, Fast-Food or Carryout”. It has been staff’s interpretation that the Permitted and Special Uses Table considers “Restaurant” and “Restaurant Fast-Food or Carryout” to be the same use only differentiated by floor area. Recently, staff was questioned on this interpretation. In order to remedy any confusion or mis-interpretation staff believes that the definition of “Restaurant” and “Restaurant, Fast-Food or Carryout” can be modified.

**RESTAURANT:** A place of business in which food, drinks or refreshments are prepared and sold to customers primarily for consumption on the premises, and for which carryout services and facilities are clearly subordinate to the principal use of providing prepared foods for consumption on the premises. The term “restaurant” in the Permitted and Special Uses Table includes, without limitation, establishments such as cafes, lunch counters, cafeterias, **carryout** or other similar businesses., but does not include fastfood restaurants.

**RESTAURANT, FAST-FOOD or CARRYOUT:** Any business in which the principal part of the business is providing food or meals for compensation in disposable wrappers or containers for consumption within the principal building or off the premises at which it is prepared. **This definition shall be used for purposes of determining the required off-street parking for this sub-type of Restaurant Use.**

**Attachments**
1. Zoning Code Excerpt: Definitions, Semi-Private Fence, Façade, Banquet Facility, Restaurants/Restaurants, Fast-Food or Carryout
FENCE PANEL: That portion of a Fence that is between the Fence posts.

FENCE, REAR or BACK FACE: The face side of a Fence which shows the most amount of structural supports.

FENCE REPAIR: Any action in which a person fixes, mends, restores, or removes that portion of a Fence which provides its opacity (e.g., vertical boards, individual post replacement, slats, pickets, chain link) and/or associated horizontal supports. Repair shall include any action to an existing Fence within a calendar year not specifically included within the definition of "Fence Replacement" or "Fence Maintenance".

FENCE REPLACEMENT: Any action in which a person removes and replaces more than twenty-five percent (25%) of the number of posts or horizontal or vertical members in a Fence within a calendar year.

FENCE, SEMI-PRIVATE, OR SEMI-PRIVATE FENCE: A Fence which is not a Solid Fence nor an Open Fence. These types of fences are restricted to board-on-board and shadow box types. The open space between vertical fence boards shall not exceed 85% of the width of the boards on the same side of the Fence.

FENCE, SOLID, OR SOLID FENCE: A Fence which is not open over fifty percent (50%) of the surface area. Examples include, but are not limited to: stockade, board and batten, basket weave, chain link with woven slat inserts, and brick, except as otherwise provided.

FENCE MATERIAL, UNACCEPTABLE: Materials such as concrete block, cinder block, plank lumber over six inches (6") in width, scrap lumber, scrap materials, barbed wire (except at the top of a Fence in an "M" District where not abutting a residential Lot or in any zoning district where used to enclose utility or telecommunications facilities), pallet lumber, plastic pipe, plastic or synthetic materials, exterior insulation finish systems, combinations of materials, "chicken wire mesh" (except as allowed immediately around compactly planted vegetable gardens, as seasonally needed in Rear and Side Yards only, square wire farm fence, in residential zones welded wire fence with members less than ½" in diameter, fabric, burlap, plastic sheets (except approved synthetic composite materials), wood and plastic snow fence, rubble and debris and Open Fences with obstructions.

FINISHED FIRST FLOOR: The finished surface of the floor level above the basement or cellar of a structure or building, or the upper surface of the floor of the first story of a structure or building.

FINISHED FIRST FLOOR HEIGHT: The vertical distance from the grade elevation at the top of the curb to the top of the finished first floor.

FLAG: A construction of fabric, plastic, paper or other synthetic or natural material depicting through symbols, characters, design or letters, a nation, political subdivision, institution or business.

FLASHING SIGNS: Any sign which contains an intermittent or flashing light source, or which includes the illusion of intermittent or flashing light by means of animation or an externally mounted intermittent light source.
ENTERTAINMENT VENUE: An outdoor or indoor area, building, or part of a building, devoted to showing motion pictures, or for dramatic, dance, musical, or other live performances.

ESTABLISHMENT, BUSINESS: A place of business, the ownership or management of which is separate and distinct from those of any other place of business located on the same or other lot.

FAA: The Federal Communications Aviation Administration.

FAÇADE: The exterior wall of a building that is exposed to public view.

FACILITY WITH DRIVE-THROUGH: (see DRIVE-THROUGH ESTABLISHMENT)

FALLOUT SHELTER: An accessory building and use which incorporates the fundamentals for fallout protection-shielding mass, ventilation and space to live-and which is constructed of such materials, in such a manner, as to afford to the occupants substantial protection from radioactive fallout.

FAMILY: An individual, or two or more persons related by blood, marriage or adoption, living together in a dwelling unit, or a group of not more than five persons who need not be related by blood or marriage or adoption, living as a single housekeeping unit in a dwelling unit, and sharing common facilities as considered reasonably appropriate for a family related by blood, marriage, or adoption, in either case exclusive of servants.

FENCE: An accessory structure, assembled using cut or formed natural materials or artificial materials, which is used as a barrier, boundary, decorative accessory, means of protection or confinement enclosing or dividing a piece of land, and which is over twelve inches (12") in height above the ground level. Examples include, but are not limited to, Open Fences, Solid Fences, masonry and stone walls. For the purposes of this Chapter, a Fence shall not include naturally growing shrubs, bushes and other foliage.

FENCE HEIGHT: All sections of fence (excluding the post) in any Lot may have a total height that shall not exceed the prescribed maximum Fence Height; provided that the space between the bottom of a section of Fence and the ground beneath it shall not exceed three (3) inches. A Fence post may extend no more than a maximum of three (3) inches above the section of Fence.

FENCE, LEGAL NONCONFORMING, OR LEGAL NONCONFORMING FENCE: Any Fence which was erected pursuant to a permit and is maintained in good condition and existing prior to the passage of the regulation, but which does not conform to the regulations set forth in this Zoning Ordinance.

FENCE MAINTENANCE: The painting, staining, sand scraping, nailing, screwing, riveting, welding, tie-wiring, or clamping so as to restore the like new appearance, restore the safe condition, or maintain the condition of what would generally be considered a good functioning Fence.

FENCE, OPEN, OR OPEN FENCE: A Fence including gates, which has, over its entirety, no less than fifty percent (50%) of the surface area in open space as viewed from an angle of ninety degrees (90°), from the Fence line. Examples include, but are not limited to: chain link; wrought iron; picket; Kentucky rail; split rail.
and replacement of minor parts and accessories, but not including major repair work such as
motor replacement or rebuilding.

**AUTOMOBILE WRECKING YARD:** See Junk Yard.

**AWNINGS:** A roof-like mechanism, retractable in operation, which projects from the wall of a
building for the purpose of affording weather protection to doorways and windows. Often,
awnings provide identity for a business and provide shade for display areas.

**BAKERIES RETAIL, BAKERIES WHOLESALE:** A Retail Bakery is one where not more than fifty
percent (50%) of the floor area is devoted to processing or manufacturing of baked goods. A
Wholesale Bakery is one where the floor area is devoted to processing or manufacturing baked
goods, and not to include retail sales.

**BANK, CREDIT UNION, SAVINGS AND LOAN:** A financial institution that is open to the
public and engaged in deposit banking, and that performs closely related functions such as
making loans, investments, and fiduciary activities.

**BANNER:** A temporary sign applied to, or constructed of, paper, plastic or fabric of any kind,
with or without frame, used to identify or attract attention to a location, object, institution,
product, service or business. Flags of nations, states, political subdivisions, businesses or
institutions shall not be considered banners for purposes of this Zoning Ordinance.

**BANQUET FACILITY, BANQUET HALL:** A banquet facility or banquet hall is a building or
portion (excluding facilities located in restaurants or hotels) thereof where food, either prepared
on the premises or otherwise and/or beverages are provided on a prearranged basis for
consumption on premises; is primarily intended to accommodate one or more groups of diners
or patrons for functions such as banquets, wedding receptions and similar functions, is not open
to the public, and the use thereof is restricted to the invitees of the party contracting for use of
the facility.

**BASEMENT:** A portion of a structure located partly underground, but having less than half of its
clear floor-to-ceiling height over more than half of its floor area below grade.

**BED AND BREAKFAST:** A private, owner-occupied business in a single-family residence where
overnight accommodations and a morning meal are provided to transients for compensation.

**BENCH SIGN:** A sign placed on, or part of, a bench and used for advertising purposes.

**BERM:** A mound of soil, either natural or man-made, used to screen and visually separate, in
part or entirely, one area, site or property from the view of another area.

**BILLIARD CLUB:** A business establishment containing more than two pool or billiard tables for
the use of patrons.

**BLOCK:** A tract of land bounded by streets, or by a combination of streets, public lands,
railroad rights-of-way, bulkhead lines or waterways, or boundary lines of the Village.

**BOARD OF TRUSTEES:** The President and Board of Trustees of the Village of Lincolnwood.
Conversion Vans are not Recreational Vehicles for purposes of this Zoning Ordinance.

RECREATIONAL VEHICLE TRAILER: Any Trailer as defined herein and shall also include any vehicle on wheels, skids, rollers or blocks, either self propelled or propelled by any other means, which is used or designed to be used primarily for residential, living, sleeping purposes or for the transportation of boats or any other recreational equipment, or for other similar purposes.

RELIGIOUS INSTITUTION: A place of worship or religious assembly with related facilities such as: rectory; private school; meeting hall; offices for administration of the institution; licensed child or adult care, playground, cemetery.

RESEARCH LABORATORY: A building or group of buildings in which are located facilities for scientific research, investigation, testing or experimentation, but not facilities for the manufacture or sale of products, except as incidental to the main purpose of the laboratory.

RESTAURANT: A place of business in which food, drinks or refreshments are prepared and sold to customers primarily for consumption on the premises, and for which carryout services and facilities are clearly subordinate to the principal use of providing prepared foods for consumption on the premises. The term “restaurant” includes, without limitation, establishments such as cafes, lunch counters, cafeterias, or other similar businesses, but does not include fast-food restaurants.

RESTAURANT, FAST-FOOD or CARRYOUT: Any business in which the principal part of the business is providing food or meals for compensation in disposable wrappers or containers for consumption within the principal building or off the premises at which it is prepared.

RETAIL SALES AND SERVICES: A commercial enterprise that provides goods and/or services directly to the consumer, where such goods are available for immediate purchase and removal from the premises by the purchaser.

RIGHT-OF-WAY: A strip of land occupied or intended to be occupied by a street or related facilities, public path or trail, railroad, electric line, oil or gas pipeline, water main, sanitary or storm sewer, communication line, or for other special uses.

ROADWAY: That portion of a street which is used or intended to be used for the travel of motor vehicles.

ROOF SIGN: A sign erected, constructed and maintained on or above the roof of any building.

ROOFLINE: The top of the parapet of a building with a flat roof, the deck line of a building with a mansard roof, or the eaves line of a building with a gable, gambrel or hip roof.

ROOFTOP FLAGPOLE: Structures which are used for displaying flags which are affixed to the rooftop of any building or structure.

SCHOOL, PUBLIC: A building operated and maintained for educational purposes and such other community uses as deemed necessary and desirable.
Staff Report
Plan Commission
February 6, 2013

Subject Property: N/A (Text Amendment)

Requested Action: Text amendment to consider requirements for Balconies, Porches, and Open Patios or Terraces as found in the Permitted Obstructions in Yards Table 3.10.01 of the Zoning Ordinance.

Nature of Request: A text amendment is proposed to consider modifying or additional bulk requirements for Open Balconies in the Front Yard, Open Patios, and Attached and Covered Porches.

Petitioner: Village Board

Summary
Open Balconies – Table 3.10.01 of the Zoning Ordinance identifies the permitted obstructions in yards, i.e. where items such as electrical generators, detached buildings, decks, and other accessory structures are permitted. Open Balconies are permitted not to exceed 4 feet from the building as per Table 3.10.01 of Zoning Ordinance. Staff notes however, that Open Balconies in the front yard are the only accessory structure which requires a Special Use. Staff seeks guidance on the intent of the bulk regulations for Open Balconies. More specifically:

1. Do all balconies on the front elevation require Special Use approval?
2. Are all balconies permitted as long as they do not exceed 4 feet from the building? In the event a balcony on the front elevation exceeds 4 feet, is a Special Use required to permit such a balcony?
3. If the Principal Structure is located at the minimum front setback line and a balcony is on the front elevation does this balcony at any distance from the building require a Special Use?

Staff’s recommendation is to identify the permitted dimension of a balcony, currently extending 4 feet from the building and identifying which elevations such a balcony complying with the dimension is permitted. Once this is determined it is staff’s recommendation that all other balconies be subject to approval by the variation process and hardship standards.

Open Patios – The Zoning Ordinance contains unclear language as it pertains to the “size” of patios. Open Patios are permitted as follows:

Open patios or terraces in a residential district, provided that they are at least four feet from all side and rear property lines, not over four feet (4’) above the average
level of the adjoining ground and do not project over ten feet (10') (excludes covered porches)

The portion of the regulation that staff seeks consideration by the Plan Commission is the underlined portion which states, “...do not project over ten feet (10')...” The standard does not make reference to what or where the limitation to not project over ten feet is taken from. Is a patio not permitted to project more than ten feet from the house? Is it to not project more than ten feet into the required rear yard?

It is staff’s belief that the requirement is intended to limit patios to not extend more than ten feet into the required rear yard. It would be very restrictive to limit patios to not extend more than ten feet from the principal structure. Additionally, staff notes that there are numerous patios in the community which would not comply with the most restrictive of interpretations. Staff seeks an amendment to provide clarification to this section.

Porches – Attached and covered porches are permitted in all yards provided they are at least four feet from all side and rear property lines. This regulation appears to leave it open for a property owner to construct a nearly unlimited covered porch in their front and rear yards. Staff does not believe that this is the intention of the standard so at the February 6th meeting staff seeks discussion on what the reasonable limitation should be for covered porches. It is likely that staff will then need to draft language for review at a future meeting.

Attachments:
  1. Zoning Ordinance Excerpt: Article III Table 3.10.01
PART C: YARDS, ALLOWABLE OBSTRUCTIONS

3.09 YARDS, GENERAL

(1) The minimum yard space required under the terms of this Zoning Ordinance for one structure shall not again be considered as yard space for another adjoining structure.

(2) No lot shall be reduced in area so that the yards or other open space and lot area become less than required by this Zoning Ordinance.

(3) On streets where a front yard setback of more or less depth than required by Article IV has been maintained for buildings existing on lots or tracts having a frontage of forty percent (40%) or more of the total frontage on one side of a block, the front yard setback line for each remaining vacant interior lot along the block shall be the average distance of the existing front yard setbacks on that side of the block.

(4) On a vacant through lot, both lot lines adjacent to a street shall be established as the front line, except that where two (2) or more through lots are contiguous and a front line has been established by an existing principal building on the contiguous through lot, the same street line shall thereafter be deemed to be the front lot line.

3.10 PERMITTED OBSTRUCTIONS IN REQUIRED YARDS

Table 3.10.01 below (Permitted Obstructions in Yards) list items which are permitted in yards and the location (e.g. front yard) where they are permitted. A “P” denotes that an obstruction is permitted; an “S” denotes that an obstruction is considered a special use and may be permitted in the subject district only after review and approval in accordance with Article V of this Ordinance; a “-” denotes that the obstruction is prohibited. (Ordinance No 2012-2987)

Subject Property: N/A (Text Amendment)

Zoning District: Subject text amendment is applicable to all zoning districts

Requested Action: Text amendment to modify language in sections of Articles II, III, IV, VI, VII, and X in particular Section 3.13.4A; Section 3.13.4B; Section 6.09.2; Section 6.13.1G; Section 2.02; Section 3.13.6B; Section 4.04.3; Section 4.09.5; Section 6.09.9; Section 7.06.6Bi; Section 7.08.8; Section 4.07.8; Section 10.04.10

Nature of Request: Text amendment of modify language from sections of the zoning code

Petitioner: Village Board

Summary
Certain language and references in the zoning code have expired and no longer accurately reflects how the zoning code is administered today. The zoning code refers the Building Department, Building Commissioner, and PC/ZBA (Plan Commission/Zoning Board of Appeals). The Village of Lincolnwood no longer has a Building Department, Building Commissioner, and joint PC/ZBA. Staff recommends changing these terms to accurately reflect current organizational structure and procedures.

Building Department References
Staff recommends modifying sections in the zoning code that say “Building Department” to “Community Development Department”. To correct this, staff recommends:

| Section 3.13.4A | “a. Installation of new, relocation of more than ten percent (10%) of existing, and replacement of more than twenty-five percent (25%) of fencing on a given Lot, requires the submission of a permit application and issuance of a permit by the Village Community Development Department.” |

Community Development Department.

<tr>
<td>3.13.4B</td>
<td>“b. Applications for Fence Permits shall contain the application form, a survey of the parcel with current structures and important features shown, photographs of adjoining property taken from the applicant’s property to show the view into the neighbor’s property, and any other photographs deemed necessary by the Village Building Department Community Development Department.”</td>
</tr>
<tr>
<td>6.09.2</td>
<td>“(2) All residential dwelling units shall contain no more than 10 percent of a non-masonry material on the exterior walls of the second floor elevation, with no more than 50 percent of any facade covered with a non-masonry material; provided, however, that this Section 6.09(2) shall not include dormers and gables. All residential dwelling units shall contain masonry on 100 percent of each first floor elevation or ground levels of such units. All materials for the remaining wall surfaces shall be approved by the Zoning Officer and Building Department Community Development Department staff. The use of EIFS is prohibited on all exterior walls. (Ordinance No 2011-2972)”</td>
</tr>
<tr>
<td>6.13.(1)G</td>
<td>“g. In conformance with the Schedule of Recommended Plants maintained by the Building Department Community Development Department.”</td>
</tr>
</tbody>
</table>

**Building Commissioner References**

Staff recommends changing “Building Commissioner” to “Zoning Officer”. To correct this, staff recommends:

<table>
<thead>
<tr>
<th>Section</th>
<th>Text</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.02, Definitions, Development Review Team</td>
<td>“DEVELOPMENT REVIEW TEAM: The Village Building Commissioner, the Zoning Officer, the Village Director of Public Works, the Village Police Chief, and the Village Fire Chief, or their respective designees.”</td>
</tr>
<tr>
<td>3.13.6B</td>
<td>“b. Chain link Fences installed in a Residential District shall be color coated in black, dark bronze, dark green or any other dark color as approved by the Building Commissioner Zoning Officer. Uncoated or galvanized chain link Fences shall not be installed in Residential Districts on or after the effective date of this Section 3.13. However, this regulation shall not apply to chain link or open mesh type Fences accessory to public parks, municipal recreation areas, public schools, and municipal or governmental property.”</td>
</tr>
<tr>
<td>4.04.3</td>
<td>“(3) Prohibited Uses. Uses identified with a ‘—’ in Table 4.01.1 are expressly prohibited in the subject district. Uses that are not listed may also be prohibited; determination of whether an unlisted use may be permitted shall be made by the Building Commissioner Zoning Officer in accordance with Section 4.01 (Interpretation).”</td>
</tr>
</tbody>
</table>
| Section 4.09.5 | (5) Lighting/Security Lighting: As determined by the Building Commissioner **Zoning Officer**.

---

| Section 6.09.9 | When, in the Building Commissioner **Zoning Officer** opinion such residences as depicted in plans submitted for building permit approval are not of sufficiently dissimilar design, the Building Commissioner shall not issue a building permit for erection of such residence. Plans for the particular residence in question may be resubmitted after they have been modified to accommodate variation in plan, elevation the use of exterior building materials and color.

---

| Section 7.06.6B.i | “i. In Residential and Business zones all open off-street parking areas (including a driveway used as a parking area) shall be improved with a durable pavement consisting of an all-weather asphalt, concrete pavement surface, pavers, or the equivalent in accordance with Village requirements, unless otherwise approved by the Administrative Officer. Alternative pavers, such as pervious concrete or natural stone, that reduce the overall surface coverage and lessen stormwater runoff are encouraged and may be approved by the Building Commissioner **Zoning Officer** and Village Engineer in off-street parking areas, crosswalks, parking stalls, or in drive aisles.”

---

| Section 7.08.8 | “(8) Uses not listed. The Building Commissioner **Zoning Officer** shall make an administrative decision for parking requirements of uses not specifically listed. Such a decision shall be based on the requirements for similar uses found either inside or outside the corporate limits of the Village.”

---

**PC/ZBA References**
The joint Plan Commission/ZBA (PC/ZBA) was split into two separate bodies. Some sections of the zoning code still refer to the PC/ZBA. To correct this, staff recommends changing PC/ZBA to PC or ZBA where appropriate:

---

| Section 4.07.8 | “(8) Drive-through facilities. Drive-up or through facilities designed for transactions of business from customers' vehicles, and not otherwise permitted to serve any retail or business use otherwise permitted in the District, shall obtain a special use permit. In considering the issuance of a special use permit, the Planning and Zoning Commission **Plan Commission** and the Village Board shall consider the following, in addition to the other general standards for Special Uses in Article V, Section 5.18.”
Section 10.04.10  “(10) Security fencing. Telecommunications facilities shall be enclosed by security fencing not less than six feet in height and shall also be equipped with an acceptable anti-climbing device or design; provided, however, that the PZ/ZBA Plan Commission may recommend, and the Village Board of Trustees may grant, a waiver of such requirements, as deemed appropriate.”

Recommendation

Staff believes it is in the best interest of the Village, readers, and interpreters of the zoning code to make the changes to the sections listed above.

8. Zoning Code Excerpts: Section 4.09.5
10. Zoning Code Excerpts: Section 7.06.6B.i
11. Zoning Code Excerpts: Section 7.08.8
12. Zoning Code Excerpts: Section 4.07.8
13. Zoning Code Excerpts: Section 10.04.10
(2) Conformance Required: Notwithstanding the Legal Nonconforming Use Continuation provisions set forth herein in Article IX, the issuance of a Demolition Permit for the principal structure for the Lot on which a Fence is located shall require any preexisting Fence or Natural Screening on that Lot which is not in conformance with the regulations set forth in this Section 3.13 to be brought into conformance with standards set forth in this Section 3.13.

(3) Variations: Variations to these regulations may be sought by a petitioner through the procedures set forth in this Section 3.13, with a public hearing by Zoning Board of Appeals, or if so determined by the Zoning Officer or so directed by the Village Board of Trustees, the public hearing shall be held by some other committee or commission designated by the Village Board of Trustees to hold a public hearing on the application. Final action on all variations shall be by the Village Board of Trustees.

(4) Permit Requirements; Permit Applications: The following regulations shall apply to all Fences erected, constructed, installed, or replaced after the effective date of this regulation:

a. Installation of new, relocation of more than ten percent (10%) of existing, and replacement of more than twenty-five percent (25%) of fencing on a given Lot, requires the submission of a permit application and issuance of a permit by the Village Building Department.

b. Applications for Fence Permits shall contain the application form, a survey of the parcel with current structures and important features shown, photographs of adjoining property taken from the applicant's property to show the view into the neighbor's property, and any other photographs deemed necessary by the Village Building Department.

(5) Harmony and Compatibility of Fences: For aesthetic purposes, as well as maintaining property values, it is desirable that the appearance, structure, and design shall be compatible and in harmony with other Fences in the Village, particularly in the neighborhood and on adjacent and contiguous property. Uniformity of Fences is desirable where two or more dwelling units are connected by a common wall. Fences for such separate dwelling units shall be of uniform height, material, type, color and design. The Zoning Officer may suggest changes or recommendations to achieve these objectives. If the applicant for a Fence permit refuses to make such changes, the Fence permit application and drawing shall be reviewed by the Zoning Board of Appeals.

(6) Materials and Appearance: The following regulations shall apply to all Fences erected, constructed, installed, or replaced, after the effective date of this Zoning Ordinance.

a. Fencing shall not be painted or stained bold, harsh, or disruptive patterns or combinations of colors. All paint or stain used on fencing material shall be compatible with the paints and stains used on the structures on the Lot where the Fence is located and the fences and structures in the surrounding neighborhood.
structures in the area, excessively bright or brilliant colors should be used only for accent. Materials and colors should withstand the weather well over a twenty-five (25) year period.

6.09 Design Standards

(1) The exterior surface of a masonry wall shall consist of a textured finished surface, shall not have a flat surface, and shall not be constructed of concrete block or cinder block having a plain, flat surface. Brick facades shall not be painted.

(2) All residential dwelling units shall contain no more than 10 percent of a non-masonry material on the exterior walls of the second floor elevation, with no more than 50 percent of any facade covered with a non-masonry material; provided, however, that this Section 6.09(2) shall not include dormers and gables. All residential dwelling units shall contain masonry on 100 percent of each first floor elevation or ground levels of such units. All materials for the remaining wall surfaces shall be approved by the Zoning Officer and Building Department staff. The use of EIFS is prohibited on all exterior walls. (Ordinance No 2011-2972)

(3) Where the side or rear of a residential dwelling unit faces a street, the exterior materials used on the side or rear elevations of the residential dwelling unit shall be comparable in character and quality to the exterior materials used on a front elevation of the structure.

(4) Windows shall be provided in façades greater than 30 feet in length and shall comprise at least 20% of the façade area.

(5) Windows, building entrances, decks and balconies shall be designed and placed to minimize direct views into neighboring houses.

(6) Horizontal façades longer than 30 ft. shall include design elements to articulate the wall into smaller units, consistent with the single-family residential scale of surrounding buildings. At least two of the following methods shall be included:

   a. Distinctive roof forms
   b. Changes in materials
   c. Window patterns
   d. Recesses/offsets

(7) To compliment and relate to existing residential neighborhoods and minimize the impact of height and bulk on surrounding homes, one of the following alternatives shall be required (Note: See Figures 6.08.05 and 6.08.06 for explanation of each alternative standard):

   a. Alternative 1: Lower Eave Line: Instead of creating vertical two-story exterior walls, the eave line of the second story roof shall not exceed 23 feet in height, so as to reduce the appearance of bulk and height. Gables and dormers may extend above the established eave height, provided that:
c. Selected for interest in its structure, texture, color and for its ultimate growth.

d. Harmonious to the overall design and of good appearance.

e. In conformance with the American National Standards for nursery stock as approved by American National Standards Institute and issued as ANSI 2601, 1986.

f. In conformance with the Schedule of Prohibited Trees maintained by the Village Arborist.

  g. In conformance with the Schedule of Recommended Plants maintained by the Building Department.

(2) Existing trees with a six (6) inch caliper or greater shall be preserved on the property as determined by the Zoning Officer. Trees that are preserved shall be counted toward compliance of the requirements of this Section.

(3) Evergreens shall be incorporated into the landscape plan and treatment of a site, where appropriate to the site as determined by the Zoning Officer, particularly in required buffers for property zoned residential, the screening of refuse holding areas, and critical points of required parking lot screening.

(4) Shrubs shall be used whenever possible. Shrubs used in sight triangles shall be low growth shrubs that do not exceed thirty (30) inches in height at maturity.

(5) Plant materials shall be placed against long expanses of building walls, fences and other barriers to soften their effect.

(6) Where site characteristics or property dimensions limit the use or survivability of live landscaping as an effective screen, masonry walls shall be used for required screening subject to the regulations set forth in this Zoning Ordinance, Article III, Section 3.13, "Fences and Natural Screening".

(7) All masonry walls or decorative fencing which may be approved shall be constructed and installed in a durable fashion and shall have the finished side facing the street or property line subject to the regulations set forth in this Zoning Ordinance, Article III, Section 3.13 "Fences and Natural Screening".

(8) Installation of Plant Materials:

  a. Plant materials of all types and species shall be installed in accordance with the minimum technical specifications of the "Illinois Chapter of Landscape Contractors", including the guarantee and replacements sections.

  b. Minimum Plant Sizes at time of installation shall be:

    i. Shade Trees: two and one-half (2 1/2) inch caliper.
    ii. Ornamental Trees: two (2) inch caliper or if in clump form, six (6) feet in height.
    iii. Evergreen Trees: five (5) feet in height.
Fair Housing Act, 42 USC § 3602(h)(1), as may be amended; and (b) does not serve persons as an alternative to incarceration for a criminal offense or persons whose primary reason for placement is treatment of a communicable disease. (Ordinance No 2012-2993)

**COMPREHENSIVE PLAN:** The official Comprehensive Plan of the Village of Lincolnwood.

**CONFORMING BUILDING or STRUCTURE:** Any building or structure which: (a) complies with all the regulations of this Zoning Ordinance or of any amendment thereto governing bulk of the district in which said building or structure is located; or (b) is designed or intended for a permitted or special use as applicable in the district in which it is located.

**CONTIGUOUS:** In actual contact.

**CONVENIENCE STORE:** Any retail establishment offering for sale a limited line of groceries and household items intended for the convenience of the neighborhood.

**CONVERSION VAN:** A stock model van with major customizing and which bears "RV" license plates.

**DAY CARE NURSERY:** A place providing daycare for not more than six children, including family members, being operated as a home occupation, and retaining all necessary state licenses.

**DECIBEL:** A unit of measurement of the intensity (loudness) of sound. Sound level meters, which are employed to measure the intensity of sound, are calibrated in "decibels".

**DEVELOPMENT REVIEW TEAM:** The Village Building Commissioner, the Village Director of Community Development, the Village Director of Public Works, the Village Police Chief, and the Village Fire Chief, or their respective designees.

**DIRECTIONAL PANEL ANTENNAS:** Directional (or "panel") antennas, designed to receive and/or transmit signals in a directional pattern which is less than 360°, typically an arc of approximately 120°.

**DIRECTORY SIGN:** A sign which identifies only the names and locations of occupants or uses within a building or on a lot.

**DISH ANTENNA:** Any disc not exceeding 39 inches in diameter, whether flat, concave, or parabolic, that is designed to receive signals from satellites or other sources or to transmit such signals to a receiving station.

**DISTRICT:** A portion of the corporate area of the Village of Lincolnwood, as designated on the Zoning District Map, within which certain uniform regulations and requirements, or various combinations thereof, apply under the provisions of this comprehensive amendment.

**DORMER:** That portion of a structure that consists of a gable roof and a window at its outer end, and that projects from a sloping roof. Also known as a “dormer window”. (Ordinance No. 2011-2972)

**DRIP LINE:** A vertical line extending from the outermost portion of the tree canopy to the ground.

---

Lincolnwood Zoning Ordinance

Article II – Rules and Definitions

November 6, 2008

Page 2-7
b. Chain link Fence installed in a Residential District shall be color coated in black, dark bronze, dark green or any other dark color as approved by the Building Commissioner. Uncoated or galvanized chain link Fences shall not be installed in Residential Districts on or after the effective date of this Section 3.13. However, this regulation shall not apply to chain link or open mesh type Fences accessory to public parks, municipal recreation areas, public schools, and municipal or governmental property.

c. Unacceptable Natural Screening is not permitted.

(7) Signage: Signage on fences shall comply with the regulations set forth in Article XI of this Zoning Ordinance.

(8) Special Fences: Preexisting Masonry Fences; Landscape Terrace Walls; Decorative Wrought Iron Fences. Through Lot Fences: Special Fences are those which have a greater potential than permitted Fences to have an adverse impact upon the surrounding neighborhood. Special Fences may be appropriate in some locations and inappropriate in other locations. The following Fences may be allowed by Special Fence authorization in accordance with this Section 3.13 where the Zoning Board of Appeals finds that a Special Fence is appropriate at the location requested. The Zoning Board of Appeals may recommend, and the Board of Trustees may impose conditions, terms and restrictions in addition to those set forth herein as a condition of granting Special Fence authorization.

a. The following types of Fences shall be Special Fences:

i. Brick Walls, masonry Fences, and stone walls.
ii. Masonry enclosures.
iii. Landscape terrace walls of stone or masonry construction, over 30 inches (30") in height.
v. Through Lot Fences.
vi. Natural Screening on public rights of way, utility easements, or Village property installed and maintained by private individuals at their expense.

vii. Open, four (4') foot fences maintaining a five (5') foot setback from the corner side yard property line with screening shrubs installed to the street side of the fence, located in the corner side yard to the rear of the home.

b. Those items set forth in (8) a. (i)-(vi) above, which were legally in existence at the time of enactment of this Section 3.13, may continue to exist, so long as they are maintained in good condition, do not pose a safety hazard and conform to the line of sight regulations as set forth in the Village Code. Notwithstanding the foregoing, Special Fences are subject to the provisions relating to “Fence Replacement” (as defined in Article II Rules and Definitions), permit requirements (Section 3.13(4) and replacement, relocation and repair requirements (Section 3.13(23)).

(9) Location and Orientation of Fences and Natural Screening:
PART B: PERMITTED AND SPECIAL USES IN DISTRICTS

4.04 USE DISTRICT TABLE

(1) **Permitted Uses.** Uses identified with a “P” in Table 4.01.1 are permitted as of right in each respective district, provided that uses comply with all other applicable standards of this Ordinance. No building or premises improved or unimproved shall be used, and no building shall be hereafter erected, converted, enlarged, reconstructed, or structurally altered, except for a purpose permitted in the district in which the building or land use located as shown in Table 4.04.1, except for:

   a. Uses lawfully established prior to the effective date of this Zoning Ordinance or in accordance with Article IX, Nonconformities, of this Ordinance.

   b. Special uses allowed in accordance with Article V, Section 5.18, Special Uses.

(2) **Special Uses.** Uses identified with an “S” in Table 4.01.1 are considered special uses and may be permitted in the subject district only after review and approval in accordance with Article V, Section 5.18 (Special Uses) of this Ordinance.

(3) **Prohibited Uses.** Uses identified with a “-“ in Table 4.01.1 are expressly prohibited in the subject district. Uses that are not listed may also be prohibited; determination of whether an unlisted use may be permitted shall be made by the Building Commissioner in accordance with Section 4.01 (Interpretation).

4.05 INTERPRETATION OF USES

The Village Board, upon recommendation of the Planning Commission, shall have the right to permit any other use not specifically listed in the following Table 4.01.1 without formal amendment, provided that the proposed use is similar to and compatible with those uses permitted in the district in question, and which is consistent with the purposes of this Ordinance.

Lincolnwood Zoning Ordinance

Article IV – Zoning Districts; Maps

November 6, 2008

Page 4-6
4.09  ADDITIONAL USE STANDARDS FOR THE PUBLIC OPEN SPACE

(1) Parks and Boundaries of Parks: The parks located within the Village and park boundaries are as set forth in the Village Code.

(2) Hours: Opening and closing hours for all Parks shall be as determined by the Board of Trustees as set forth in the Village Code.

(3) Off-Street Parking and Off-Street Loading: Parking shall be in accordance with applicable regulations set forth herein in Article VII.

(4) Signs: Signs in the P District shall comply with the regulations set forth in Article XI of this Zoning Ordinance.

(6) Nonconforming Buildings, Structures and Uses: Nonconforming Buildings, Structures and Uses shall be governed by the applicable regulations set forth in Article IX of this Ordinance.

(7) Accessory Buildings, Structures and Uses: In addition to parks and playgrounds as permitted in Table 4.01.1, the following accessory buildings, structures and uses are permitted in the Public Open Space – Recreation – Park District:

   a. Accessory buildings including, but are not limited to, indoor recreation and fitness facilities, clubhouses, washrooms, changing rooms, maintenance buildings, indoor/outdoor shelter structures, bleachers, arbors, pergolas, recreation and community centers;

   b. Accessory commercial facilities, including concession stands, where incidental to the operation of public recreational uses;

   c. Sculpture garden, public;

   d. Outdoor storage of park supplies;

   e. Privately operated baseball/softball recreational facilities open to the general public;

   f. Meeting and recreation facilities for Veterans' Organizations located in public buildings; and

   g. Other uses which are found by the Plan Commission to be similar to permitted and special uses in the P District.

(8) The Following Temporary Uses are Permitted, Subject to Conditions, as Follows:

   a. Festivals and carnivals shall be permitted only when sponsored by a not-for-profit religious, philanthropic or civic group or organization; provided however,
roofing) that the compared residence and has at least three (3) of the following features different from the compared residence:

- Roof type (hip, gable, flat, etc.)
- Plan orientation (right-hand model vs. left hand model)
- Site Orientation (Different elevation facing the street)
- Front Porch (Actual porch vs. stoop or steps with landing)
- Architectural Style (Contemporary, colonial, prairie style, neo-colonial, neo-deco, neo-federalist, futuristic, etc.)

When, in the Building Commissioner’s opinion such residences as depicted in plans submitted for building permit approval are not of sufficiently dissimilar design, the Building Commissioner shall not issue a building permit for erection of such residence. Plans for the particular residence in question may be resubmitted after they have been modified to accommodate variation in plan, elevation the use of exterior building materials and color.

Notes:
1) Handicapped spaces; see 7.06(4) above.
2) All minimum parking stall dimensions are exclusive of access drives or aisles, ramps, columns, office or work areas.
3) Enclosed parking spaces shall have a vertical clearance of at least seven feet (7').

b. Surfacing:

i. In Residential and Business zones all open off-street parking areas (including a driveway used as a parking area) shall be improved with a durable pavement consisting of an all-weather asphalt, concrete pavement surface, pavers, or the equivalent in accordance with Village requirements, unless otherwise approved by the Administrative Officer. Alternative pavers, such as pervious concrete or natural stone, that reduce the overall surface coverage and lessen stormwater runoff are encouraged and may be approved by the Building Commissioner and Village Engineer in off-street parking areas, crosswalks, parking stalls, or in drive aisles.

ii. In the MB zone all open off-street parking areas (including a driveway used as a parking area) shall be improved with a durable pavement consisting of an all-weather asphalt, concrete pavement surface, pavers, or the equivalent. This subsection shall not apply where an open off-street parking area (including a driveway used as a parking area) is not improved with the required durable pavement surface in conformance with Village requirements at the time of the adoption of this amendment to the Zoning Ordinance. In such cases, the gravel or other nonconforming surface of an open off-street parking area must be maintained in a first class condition. The failure to maintain any such gravel or other nonconforming surface in a first class condition, or
1. Location: All required loading spaces shall be located on the same lot as the principal use served. Unenclosed off-street loading facilities shall not be located in any front yard or corner side yard.

2. Area: An off-street loading space shall not be less than ten feet in width and fifty-five feet in length (10' x 55'), exclusive of aisle and maneuvering space; except, when a loading space having a length greater than fifty-five (55'), exclusive of aisle and maneuvering space is required herein, it shall be not less than twelve feet (12') in width. Enclosed off-street loading spaces shall have a vertical clearance of at least fourteen feet (14').

3. Access: Each required off-street loading berth shall be designed with appropriate means of vehicular access to a street or alley in a manner which will least interfere with traffic movement.

4. Surfacing: All open off-street loading spaces shall be improved with pavement in accordance with such standards set forth herein for off-street parking spaces and storm water drainage facilities.

5. Utilization: Space allocated to any required off-street loading space shall not, while so allocated, be used to satisfy the requirements for any off-street parking spaces.

6. Minimum Facilities: Uses for which off-street loading facilities are herein required but which are located in buildings of less floor area than the minimum prescribed for such required facilities, shall be provided with adequate receiving facilities, accessible by motor vehicle, off any adjacent alley, service drive, or open space on the same lot.

7. Off-Street Loading Space Requirements: Off-street loading spaces are contained in Table 7.01.02 - Off-Street Loading Requirements.

8. Uses not Listed: The Building Commissioner shall make an administrative decision for parking requirements of uses not specifically listed. Such a decision shall be based on the requirements for similar uses found either inside or outside the corporate limits of the Village.

7.09 RELIEF FROM OFF-STREET PARKING AND LOADING REQUIREMENTS

1. Variations from the Zoning Board of Appeals. The Zoning Board of Appeals may grant parking variations in the specific instances set forth in Article V of this Zoning Ordinance.

2. Payment in Lieu of Providing Parking Spaces. A reduction in the required number of off-street parking and loading facilities in any zoning district may be granted by the Board of Trustees, after a hearing by the Zoning Board of Appeals in accordance with Article V.

   a. Such reduction may be granted provided that the owner of the property shows that there are practical difficulties or particular hardships preventing the
c. On-site display of products at business establishments with a primary use of:
   i. Auto/light truck sales and service; and
   ii. Boat/RV sales, service or storage; and
   iii. Heavy equipment sales or service; and
   iv. Motorcycle sales or service; and
   v. Flea market
   vi. Garden center; and
   vii. Lumberyard

8) **Drive-through Facilities.** Drive-up or through facilities designed for transactions of business from customers’ vehicles, and not otherwise permitted to serve any retail or business use otherwise permitted in the District, shall obtain a special use permit. In considering the issuance of a special use permit, the Planning and Zoning Commission and the Village Board shall consider the following, in addition to the other general standards for Special Uses in Article V, Section 5.18:

   a. **Number of Lanes:** To minimize any negative impacts related to drive-through lanes or the potential for circulation conflicts, conflicts with vehicles entering or exiting the site, pedestrian conflicts, and the existing condition of relatively small commercial lot sizes located within the Village, no more than one drive-through lane shall be permitted by special use permit in the B-1 District.

   b. **Sufficient stacking space:** To establish safe stacking space, the following minimum stacking space is required: 4 vehicles at each bay window, ordering station or machine.

   c. **Location:** Drive-through facilities shall be prohibited from facing a public street. All drive-through facilities shall be located on the side or rear of the structure that is either facing the site’s parking area or internal drive-aisle.

   d. **Interference:** There shall be no interference with the operations of other businesses or residential uses in proximity of the drive-up facility.

   e. Any other matter or information determined to be relevant to the reasonableness of the proposed use.

9) **Dry Cleaning.** Dry cleaning and pressing establishments shall employ facilities for the cleaning and pressing of not more than seventeen hundred and fifty (1750) pounds of dry goods per day, and shall use perchlorethylene or other similar non-inflammable solvents approved by the Fire Department.

10) **Pub, Bar, or Lounge.** Taverns, pubs and lounges as defined in this Ordinance, shall be subject to the following standards:

   a. Such use shall hold a valid liquor license and shall comply with all regulations of the State and the Village of Lincolnwood with regard to liquor sales or service.
ii. A landscape plan showing specific landscape materials shall be provided unless waived by the Village.

iii. Where the Village determines that landscaping is not practical, the applicant will provide screening of Facilities by installation of a masonry wall to a height that effectively screens the Facilities.

iv. In locations where the visual impact of the facilities would be minimal, the landscaping requirement may be reduced or waived.

(10) **Security Fencing.** Telecommunications facilities shall be enclosed by security fencing not less than six (6) feet in height and shall also be equipped with an acceptable anti-climbing device or design; provided however, that the PZ/ZBA may recommend, and the Village Board of Trustees may grant, a waiver of such requirements, as deemed appropriate.

(11) **Antennas on Buildings:**

Antennas that are installed on buildings shall conform with one of the following:

a. Such antennas shall be located only on a lawfully pre-existing building and shall not exceed the following dimensions:

   i. Omnidirectional or whip antennas shall not exceed six (6) inches in diameter and twelve (12) feet vertically; and

   ii. Directional or panel antennas shall not exceed three (3) feet horizontally and six (6) feet vertically.

b. Such antennas and any necessary antenna support structures are fully enclosed or shielded from view from any point located off the zoning lot on which they are located by a structure otherwise permitted on the zoning lot and all electronic equipment is fully enclosed in a structure otherwise permitted on the zoning lot.

All such antennas shall not exceed the maximum height authorized by applicable zoning district regulations, and shall not extend above the highest point of the building or structure to which they are attached or more than two (2) feet from the exterior of any wall or roof of the building to which they are attached.

(12) **Abandonment; Removal of abandoned antennas and towers:**

a. Any telecommunications facility, tower, or antenna that is not operated for a continuous period of six (6) months shall be considered abandoned, whether or not the owner or operator intends to make use of such facility.

b. The Zoning Officer shall ascertain on an annual basis whether any telecommunications facility, tower or antenna has been abandoned.

c. If upon inspection by the Zoning Officer it is determined that a telecommunications facility, tower, or antenna is abandoned, or, upon receipt

Subject Property: N/A (Text Amendment)

Requested Action: Text amendment to consider modifying Notice of Violation; Time of Compliance, Complaint Section of the Zoning Ordinance; Section 3.13 (26).

Nature of Request: A text amendment is consideration of modifying the compliance deadline for fence violations.

Petitioner: Village Board

Summary
The Zoning Ordinance includes, for fence violations only a specific outline of the Notice of Violation requirements, Compliance Deadlines, and Filing Complaints with the Circuit Court of Cook County.

Staff seeks discussion on this section with consideration of the following:

1. Aside from the Sign Chapter, the Zoning Ordinance does not contain any other process on how the Village is to proceed with violations of any other section/requirement of the Zoning Ordinance.

2. With the Village now handling Zoning Ordinance violations through the Administrative Hearing Officer process any reference to filing directly with Circuit Court of Cook County should be eliminated.

3. Staff prefers to not have compliance deadlines dictated by code as situations differ. There is a protocol in place for all Village employees on how to handle violations. Section 3.13(26) is more lenient than staff protocol in the initial deadline given as well as allowances for a violation to remain during winter months.

Recommendation
Staff recommends consideration of eliminating Section 3.13(26). By doing so violation of the Zoning Ordinance relative to fences will be handled the same as other violations of the Zoning Ordinance.

Attachments:
1. Zoning Code Excerpt: Article IV Table 4.01.1 and 4.07(12)
(26) Notice of Violation; Time of Compliance; Complaint:

a. The Village shall serve or cause to be served, by hand delivery, or by certified mail, a copy of the notice of violation on the person or persons who own or occupy the Lot that is the subject of the violation.

b. Compliance with the regulations set forth in this Section 3.13 shall take place within thirty (30) days after the notice pursuant to subsection a. immediately above, or the property in question may be subject to a re-inspection by the Zoning Officer or his designee and be subject to a re-inspection fee as required in the Village’s Fee Ordinance. Further re-inspection fees may apply for each thirty (30) day period that the violation of the regulation remains in effect. If the work required to achieve compliance with these regulations is difficult to perform due to weather conditions during the winter months (November 15th through March 15th), full compliance with these regulations may be temporarily suspended by the Zoning Officer until after March 15th.

c. If, in the determination of the Zoning Officer, any time after ninety (90) days from the date the notice of violation was issued, there has been no satisfactory response to the notice of violation, or variation sought, or the denial of a sought variation for an illegal nonconforming Fence, the Zoning Officer may file a complaint with the appropriate division of the Circuit Court of Cook County, or before the appropriate administrative body, in the manner provided for the filing of ordinance violation complaints in the name of the Village. If, during the course of the proceeding, compliance with this Article is obtained the Village Attorney may non-suit or otherwise dismiss the complaint.

(27) Emergency Procedures; Nuisance Abatement: In the event that a violation of this Section is creating an imminent threat of serious injury to persons or serious damage to persons or real property and the continuation of the violation poses a substantial threat of injury to persons or property or a substantial interference with the quiet enjoyment of life normally present in the community, an officer of the Village possessing police powers may abate the nuisance creating the violation. Provided further that whenever the owner, occupant, agent or person in possession, charge or control of the Lot upon which the violation is occurring is unknown or cannot readily be found, a Village officer possessing police power may proceed to abate such nuisance without notice. Where the abatement of the nuisance requires continuing acts by the corporate authorities beyond the initial summary abatement and any other additional emergency abatements, it shall seek abatement of such nuisance on a permanent basis through judicial process as soon as reasonably possible. Any costs incurred by the Village in performing emergency work under this Section shall be a lien upon the real estate so affected after the Village files a notice of said lien in the office of the Cook County Recorder of Deeds.

Subject Property: N/A (Text Amendment)

Requested Action: Text amendment to correct section reference within Zoning Ordinance Article IV Part B the Permitted and Special Uses and Section 4.05.

Nature of Request: A text amendment is proposed to correct erroneous section references for Interpretations.

Petitioner: Village Board

Summary
The Zoning Ordinance Part B pertains to Permitted and Special Uses in Districts. Section 4.04(3) relates to Prohibited Uses:

(3) Prohibited Uses. Uses identified with a “−” in Table 4.01.1 are expressly prohibited in the subject district. Uses that are not listed may also be prohibited; determination of whether an unlisted use may be permitted shall be made by the Building Commissioner in accordance with Section 4.01 (Interpretation).

The Section reference for Interpretation is incorrect. The Interpretation of Uses Section immediately follows Section 4.04(3). The correct section reference should be Section 4.05 (Interpretation of Uses).

Recommendation
(3) Prohibited Uses. Uses identified with a “−” in Table 4.01.1 are expressly prohibited in the subject district. Uses that are not listed may also be prohibited; determination of whether an unlisted use may be permitted shall be made by the Building Commissioner in accordance with Section 4.05 Interpretation of Uses Section 4.01 (Interpretation).

Attachments:
1. Zoning Code Excerpt: Article IV Sections 4.04(3) and 4.05
PART B: PERMITTED AND SPECIAL USES IN DISTRICTS

4.04 USE DISTRICT TABLE

(1) **Permitted Uses.** Uses identified with a “P” in Table 4.01.1 are permitted as of right in each respective district, provided that uses comply with all other applicable standards of this Ordinance. No building or premises improved or unimproved shall be used, and no building shall be hereafter erected, converted, enlarged, reconstructed, or structurally altered, except for a purpose permitted in the district in which the building or land use located as shown in Table 4.04.1, except for:

a. Uses lawfully established prior to the effective date of this Zoning Ordinance or in accordance with Article IX, Nonconformities, of this Ordinance.

b. Special uses allowed in accordance with Article V, Section 5.18, Special Uses.

(2) **Special Uses.** Uses identified with an “S” in Table 4.01.1 are considered special uses and may be permitted in the subject district only after review and approval in accordance with Article V, Section 5.18 (Special Uses) of this Ordinance.

(3) **Prohibited Uses.** Uses identified with a “–” in Table 4.01.1 are expressly prohibited in the subject district. Uses that are not listed may also be prohibited; determination of whether an unlisted use may be permitted shall be made by the Building Commissioner in accordance with Section 4.01 (Interpretation).

4.05 INTERPRETATION OF USES

The Village Board, upon recommendation of the Planning Commission, shall have the right to permit any other use not specifically listed in the following Table 4.01.1 without formal amendment, provided that the proposed use is similar to and compatible with those uses permitted in the district in question, and which is consistent with the purposes of this Ordinance.

**TABLE 4.01.1 – Permitted and Special Uses in All Zoning Districts**

| Procedure for determining permitted and special uses in each district. For a property located in an Overlay District additional restrictions and standards may apply. | Step 1 | Check the Lincoln Avenue Overlay District (§8.2 of this Zoning Ordinance). See the Boundary Map §8.02, Step 2 | If your property falls within the Lincoln Avenue Overlay District, see Table 4.01.1 below for permitted or special uses and §8.03-8.08 for additional design standards, Step 3 | If your property does not fall within the designated Overlay Boundary, refer to Table 4.01.1 below for permitted and special uses in each district. |

Subject Property: N/A (Text Amendment)

Requested Action: Text amendment to consider Massage Therapy or other health related establishment at Permitted or Special Uses in the B1, B2, B3 District.

Nature of Request: A text amendment is proposed to consider Massage Therapy as a Permitted or Special Use.

Petitioner: Village Board

Summary
Section 4.07(2) of the Zoning Ordinance identifies an assortment of additional standards in the Business/Residential Transition Area of the Lincoln Avenue Overlay District. One additional standard is a greater use restriction within mixed use buildings. These additional standards are more restrictive relative to the permitted use types than the underlying Zoning District will allow, the B1 District. Massage therapy or other health related establishments is one use that the Section specifically identifies as one of the desired uses. While this use is specifically encouraged in the Business/Residential Transition Area, the use is not found within the Land Use Table as a Permitted or Special Use in any Zoning District.

Massage Therapy uses are defined as:

MASSAGE THERAPY ESTABLISHMENT: An establishment where massage therapy, as defined and licensed by the State of Illinois, or similar treatment or manipulation of the human body is administered, unless such treatment or manipulation is administered by a medical practitioner, chiropractor, acupuncturist, or physical therapist. This definition does not include an athletic club, health club, school, gymnasium, spa, or similar establishment where massage or similar manipulation of the human body is offered as an incidental or supplementary service.

Staff recommends in order to make the Zoning Ordinance as it relates to Massage Therapy Establishments more consistent, consideration of what if any other Zoning Districts such a use may be appropriate. Staff would recommend the consideration be limited to the B1, B2, and/or B3 District. If it is determined that this use is not appropriate beyond the Business/Residential Transition Area, staff recommends incorporating “Massage Therapy” into the land use table and noting the limitation as per Section 4.07(2).

Attachments:
1. Zoning Code Excerpt: Article IV Sections 4.07(2)
ii. That will serve as the residence for more individuals than permitted pursuant to CILA, whether or not the Community Residence is licensed pursuant to CILA; or

iii. At which any medical treatments or services will be provided to nonresidents of the Community Residence.

l. Ongoing Maintenance: Each Community Residence for which a reasonable accommodation has been approved pursuant to this Section 4.06(3) shall be operated and maintained in accordance with all conditions imposed by the Village in accordance with the ordinance approving the reasonable accommodation.

m. Reporting: Not less than once per year, each Community Residence for which a reasonable accommodation has been approved pursuant to this Section 4.06(3) shall deliver to the Village Director of Community Development a written report that provides evidence of continued compliance with the certification standards and conditions set forth in the ordinance approving the reasonable accommodation for the Community Residence.

o. Revocation: Upon the violation of any provision of this Section 4.06(3) or of the ordinance approving the reasonable accommodation, the Village Board shall have the right, but not the obligation to revoke the reasonable accommodation, upon the provision to the applicant of two months advance written notice of the reasons for the revocation and an opportunity to be heard at a regular meeting of the Village President and Board of Trustees.

(Ordinance No 2012-2993)

4.07 ADDITIONAL USE STANDARDS FOR THE BUSINESS AND OFFICE DISTRICTS

(1) Specific Standards for B-Districts. Specific minimum and maximum standards for lots, buildings and yards in the B districts are listed in Table 4.13, Bulk and Setback Standards, of this Zoning Ordinance.

(2) Restricted Uses. Nonresidential uses in a business/residential mixed use building within the boundaries of the Business/Residential Transition Area of the Lincoln Avenue Overlay District (as defined in Article VIII, B of this Ordinance) shall meet the following requirements:

a. All non-residential uses shall not exceed 2,500 SF in gross floor area;

b. All non-residential uses shall be located on the ground floor;

c. Commercial uses in a business/residential mixed-use building shall be restricted to uses, including, but not limited to, the following:

   i. Artist gallery or studio;
ii. Beauty salon or barber shop;
iii. Café or restaurant, without drive-through;
iv. Dry-cleaners, pick-up only;
 v. Massage therapy or other health-related establishment;
vi. Office, general or professional;
vii. Office, medical;
viii. Specialty retail shop; and
ix. Other uses which are found by the Plan Commission to be similar to permitted and special uses in the B-1 district.

d. The following commercial uses in a business/residential mixed-use building shall be prohibited within the Business/Residential Transition Area:

i. Auto/light truck sales & service;
ii. Catering service;
iii. Convenience store
iv. Grocery store;
v. Liquor store;
vi. Tattoo parlor; and
vii. Pub, bar, or lounge.

(3) Transitional Yard. Wherever a Business of Office district abuts a residentially zoned lot a transitional yard shall be maintained. Transitional yards shall meet the following requirements:

a. Buildings setback buffer. All structures adjacent to residential districts on the B-1, B-2, or B-3 zoned lot must be setback a distance that is equal to or greater than the side or rear yard setback requirement for the adjacent R-zoned lot, but not less than 10 feet. If the B-zoned property abuts two different R districts, then the greater setback shall apply.

b. Landscape buffer. A landscape buffer must also be provided. This buffer shall extend the length of the lot line or segment of the lot line that abuts the residential district, and shall be at least eight (8) feet wide or where screening consists of a masonry wall, a minimum width of five (5) feet. (See landscape buffer and screening requirements in Section 6.16 of this Zoning Ordinance).

c. Buffer restrictions. The landscape buffer shall not be used for the purposes of parking, loading, servicing, or storage.

d. Screening. In addition to standards required in Article VI, Part D Landscaping, the following screening in transition yards is required:

i. Required screening shall be a minimum height of six (6) feet at time of installation and may be comprised of bermis, masonry walls, a double row of densely planted landscaping, or a combination thereof

ii. Screening shall be continuous along the property line.

iii. Berms shall be utilized to the maximum extent feasible.
Staff Report
Plan Commission
February 6, 2013

Subject Property: N/A (Text Amendment)

Requested Action: Text amendment to Section 5.13 of the Zoning Ordinance to an amendment regarding final decisions of appeals.

Nature of Request: A text amendment to consider the Village Board to make final decisions on all appeals rather than the Zoning Board of Appeals.

Petitioner: Village Board

Summary
Section 5.13 of the Zoning Ordinance identifies the process in which an applicant may file an appeal of an administrative order, requirement, decision or determination made by the Zoning Officer with respect to the provisions of the Zoning Ordinance. Recently, the Village received what is believed to be the first request for an appeal of the Zoning Officers interpretation. As part of this process, the Village Board recommended the review of the procedure to consider the Village Board as the final administrative authority. Currently, as per Section 5.13(4) the Zoning Board of Appeals is the Village’s final administration authority and any appeal of the ZBA decision shall be subject to judicial review only.

Staff researched nearby communities for how appeals are handled and seven of the eight surveyed review appeals the same as Lincolnwood. The only community that does not is Skokie. Final determinations on appeals are made by the Village Board and Mayor.

Attachments:
1. Zoning Code Excerpt: Article V Sections 5.13(4)
the Plan Commission or the ZBA, as the case may be, to approve the requested relief. (Ordinance No. 2011-2936)

5.13 Appeals

(1) Authority: The ZBA shall hear and decide appeals from an administrative order, requirement or determination made by the Zoning Officer with respect to the provisions of this Zoning Ordinance.

(2) Initiation: An appeal may be taken to the ZBA by any person, firm or corporation, or by any office, department, board, bureau or commission, aggrieved by an administrative order, requirement, decision or determination made by the Zoning Officer with respect to the provisions of this Zoning Ordinance.

(3) Processing: An appeal shall be filed in writing with the Village Clerk within 45 days after the date of the action complained of. The Village Clerk shall then forward the appeal to the ZBA, which shall hold a public hearing of the appeal within 90 days after receipt of the written appeal. The Zoning Officer shall give notice of the date of the hearing on the appeal to all interested parties.

(4) Decisions: Within 90 days after receipt of the written appeal, or such further time to which the appellant may agree, the ZBA shall reverse, affirm, or modify, in whole or in part, the order, requirement, decision or determination. The decision of the ZBA shall be in writing. All decisions of the ZBA on appeals filed pursuant to this Section 5.13 shall, in all instances, be final administrative determinations and shall be subject to judicial review only, in accordance with the Illinois Administrative Review Law, 735 ILCS 5/3-101 et seq., as may be amended.

5.14 Minor Variations

(1) Purpose: A variation is a grant of relief to a property owner from the exact standards of this Zoning Ordinance, issued when undue hardship would be caused by the literal enforcement of this Zoning Ordinance. Additionally, a variation is intended to provide relief where the requirements of this Zoning Ordinance render the land difficult or impossible to use because of some unique or special characteristic of the property itself. The intent is not to simply remove an inconvenience or financial burden that the requirements of this Zoning Ordinance may impose on a property owner. Conditions existing prior to adoption of this zoning ordinance shall not require a variation.

(2) Definition: Only those variations specifically listed in Section 5.14(3) shall be classified as minor variations, and may be approved in accordance with this Section 5.14 only for single- or multiple-family residential uses.

(3) Authorized Minor Variations: The Zoning Officer shall have the authority to grant the following “minor variations” for single- or multiple-family residential uses:

   a. A reduction of up to fifteen (15) percent of the minimum required lot area;
   b. A reduction of up to ten (10) percent of the minimum required side or rear yard setback;
Staff Report
Plan Commission
February 6, 2013

Subject Property: N/A (Text Amendment)

Requested Action: Text amendment to Section 5.12, 5.14, 5.15, 5.16, and 5.17 of the Zoning Ordinance to amend the voting requirement deadlines.

Nature of Request: A text amendment to consider modifying or eliminating voting/recommendation deadlines on the Plan Commission and/or Zoning Board of Appeals for Public Hearings and Appeals.

Petitioner: Village Board

Summary
In administering the Zoning Ordinance staff has concerns with the voting/recommendation deadlines placed on the Plan Commission and Zoning Board of Appeals. The purpose of this consideration is to discuss the self-imposed deadlines relative to the Plan Commission and Zoning Board of Appeals voting. An example of the deadline is found below:

Section 5.15(5)d

The ZBA shall conduct a public hearing to review the proposed variation in accordance with the notices mailed and published pursuant to Section 5.20 of this Zoning Ordinance. Within 90 days after the completion of the application for the proposed variation, the ZBA shall make findings and recommend whether the variation should be approved, and shall transmit such recommendation in writing to the Board of Trustees.

Also included in this consideration is how failure to act is treated. Currently, if the Plan Commission or Zoning Board of Appeals fails to act within the identified deadline, the Zoning Ordinance states that such failure to act constitutes a recommendation to approve the application.

Section 5.12(2)

(2) Failure to Act: The failure of the Plan Commission or the ZBA, as the case may be, to act within the relevant time period set forth in this Zoning Ordinance for the relief requested, or such further time to which the Applicant may agree, shall be deemed to be a recommendation of the Plan Commission or the ZBA, as the case may be, to approve the requested relief.

Staff seeks discussion from the Plan Commission on whether these deadlines are a concern or if modifications should be considered. The deadlines are also vague as to when the “clock” starts. Additionally, should the Village modify the Failure to Act condition? Staff has not been able to conclude the appropriate research of nearby communities at this time.
Staff Report
Plan Commission
February 6, 2013

Subject Property: N/A (Text Amendment)

Requested Action: Text amendment to Section 6.03(2)b and Table 6.03.01 of the Zoning Ordinance to incorporate driveway requirements found in the Municipal Code into the Zoning Ordinance.

Nature of Request: A text amendment to consider incorporating the driveway requirements found only in the Municipal Code into the Zoning Ordinance.

Petitioner: Village Board

Summary
Currently, the driveway requirements for the Village are partially located in the Municipal Code as well as the Zoning Ordinance. Staff recommends that the standards currently only found in the Municipal Code also be incorporated into the Zoning Ordinance. Staff believes that this action will result in better customer service for those seeking information on driveway standards.

This action will also benefit the community by formalizing the process in which people seek a waiver or relief from these standards. All driveway relief will be subject to the review and recommendation of the Zoning Board of Appeals upon completion of a public hearing with the Village Board making the final vote.

Attached is the Zoning Ordinance Section pertaining to driveways as well as the Municipal Code sections pertaining to driveways.

Attachments:
1. Zoning Ordinance Section 6.03(2)b and Table 6.03.01
2. Municipal Code Section 6-5-1
6.03 GENERAL DEVELOPMENT STANDARDS

(1) Traffic, Off-Street Parking, and Pedestrian Circulation

a. Site plans shall minimize dangerous traffic movements and congestion, while achieving efficient traffic flow and providing the minimum number of off-street parking spaces required by Article VII (Off-street Parking and Loading).

b. Off-street parking shall not be permitted to dominate the visual image of any development site. Where practical, parking shall be located in side and rear yards. Parking located in any yard shall be screened with landscaping as required in Part D of this Article (Landscape Standards).

c. Sidewalks. Pedestrian sidewalks, not less than five feet in width, shall be incorporated into the site plan and are required: 1) along all sides of a lot that abut a public street and 2) along all sides of a building visible from a public right-of-way or accessible from an off-street parking area. The Zoning Officer may otherwise determine that additional landscaping is preferred in lieu of a sidewalk not abutting a public street.

d. Crosswalks, designated by striping or alternate paving material, are required across vehicular driveways to connect off-street parking with building entrances, where practical. To enhance pedestrian safety and comfort, and increase the attractiveness of the walkway, pedestrian paths shall be clearly distinguished from vehicular drives with landscaping, paving materials, or architectural elements.

e. Traffic studies may be required by the Village Zoning Officer or Village Engineer. Such studies may include: a projection of the number of motor vehicles to enter or leave the site, estimated daily and peak hour traffic levels based on the Institute of Transportation Engineers' Trip Generation, 3rd Edition (as may be updated from year to year), projected traffic flow patterns, impact of development on vehicular movement at major intersections and upon abutting roads capacities, combined traffic impact of approved, but not yet fully developed projects within the Village, safety and appropriateness of site design and circulation, and any unforeseen traffic hazards or circulation conflicts.

A traffic study shall be required when the development site is:

i. Within five hundred (500') feet from the nearest point of an elementary, junior or senior high school, playground or park, or
ii. Within one-quarter mile (1/4) mile of an elementary, junior or senior high school, playground or park, when the proposed use is located along the same street right-of-way as the school.

(2) Access Points, Driveways and Parking. Points of vehicular ingress and egress from any site shall be limited to the adjacent major and/or secondary thoroughfares only and
shall be reviewed by the Zoning Officer and Village Engineer for location and design of curb cuts and driveways and for layout of parking and loading areas.

a. Where practical, cross-access between sites is encouraged and shall be granted through cross-access easement agreements.

b. Minimum widths and distances of driveways shall be provided as follows:

<table>
<thead>
<tr>
<th>Table 6.03.01 - Minimum Driveway and Access Standards</th>
</tr>
</thead>
<tbody>
<tr>
<td>Driveway Width (One-Way, Min.)</td>
</tr>
<tr>

<tr>
<td>Distance from the end of the driveway curb cut to the nearest crosswalk (Min)</td>
</tr>
<tr>
<td>Curb radius of all Driveways</td>
</tr>
<tr>
<td>Angle between the Curb Line of a Street and the Center Line of a Driveway (Min.)</td>
</tr>
</tbody>
</table>

c. Vehicles used in conjunction with any permitted business may be parked only on the building owner’s property.

(3) Site Improvements – Service/Utility Areas. All service and utility areas – including but not limited to – loading docks, exterior storage areas, trash enclosures, dumpsters, HVAC and mechanical equipment shall be screened from view. Service/utility areas shall meet the following standards:

a. All service or utility areas shall not be located near public right-of-ways, building entrances, and pedestrian areas.

b. All utility meters shall be located either inside the building or in a recessed area within the rear or interior side yard façade of the building. Utility metering and exterior mounted telecommunication junction boxes shall be screened from view along a public right-of-way by walls, fences, landscaping or other such elements in accordance with applicable building codes and other agencies having jurisdiction.

c. Trash, Refuse, and Recycling Areas: Suitable areas for the storage of trash, refuse and recyclables shall be provided and designed to: 1) be fully screened from view; 2) prevent waste from blowing around the site or onto adjacent properties or public rights-of-way; and 3) permit safe, easy removal of trash,
6-1-5. Driveways and driveway approaches.

(A) Definitions. The following definitions shall apply in the interpretation and enforcement of this Section 6-1-5:

**DRIVEWAY**
A place on private property for the operation of automobiles and other vehicles.

**DRIVEWAY APPROACH**
That portion of a right-of-way that provides vehicular access from the roadway to an adjoining lot.

**ROADWAY**
That portion of a right-of-way improved, designed or ordinarily used for vehicular travel; provided, however, that the term "roadway" shall not include the berm, shoulder, or parkway, if any. In the event that a right-of-way includes two or more separate roadways, the term "roadway" shall refer only to each separate roadway, and not to all roadways collectively.

(B) Permit fee. No permit authorizing a driveway approach shall be issued until the fee therefor has been paid to the Village pursuant to Article 2 of this Chapter 6.

(C) Construction regulations.

1. It shall be unlawful to construct any curb or driveway approach or break out or remove any curb without first securing a permit as required pursuant to Article 2 of this Chapter 6.

2. No driveway approach shall be constructed or used so as to impede the flow of surface water in the street gutter or a drainage ditch.

3. No driveway approach to residential properties shall be constructed or used for the sole purpose as a parking space.

4. A minimum lot frontage of 60 feet is required for any circular driveway.

5. A maximum driveway width of 12 feet and a maximum driveway approach width of 14 feet shall be allowed for circular driveways.

(D) Approaches; location. No driveway approach shall be located so as to interfere with municipal or public utility facilities such as poles, traffic signals, signposts, catch basins, fire hydrants, crosswalks, or other street structures. Driveway approaches shall be located so as to avoid parkway trees. Removal of any parkway trees shall be subject to the Village Parkway Landscaping Ordinance set forth in Article 5 of this Chapter 6.

(E) Construction standards. Driveway approaches shall be constructed to the following standards:
(1) Surface. All driveway approaches which give access to an improved street with curb and gutter shall be surfaced with a permanent dustproof surface: either concrete (six inches) over five inches CA-6, crushed stone aggregate, bituminous surface (eight inches CA-6, crushed stone aggregate, and three-inch asphalt), brick (over six inches of concrete) or other material approved by the Village.

(2) Widths. The total width of driveways measured at the property line on a parcel of property used for residential purposes shall not exceed 1/3 the lot frontage, and no single driveway shall exceed 20 feet measured at the property line. The total width of driveways measured at the property line on a parcel of property used for nonresidential purposes shall not exceed 1/2 the lot frontage, and no single driveway approach shall exceed 30 feet measured at the property line. The width of the driveway approach measured at the curb shall in no case be greater than five feet more than the width measured at the property line.

(3) Location of drives. On a parcel of property used for residential purposes, a driveway shall not be located closer than one foot from the property line, and no driveway approach or driveway flare shall extend over the property line extended to the curb; provided, however, where the Board of Trustees finds that there is a particular hardship to the owner, a driveway that has been in existence in excess of 25 years may be reconstructed in its present location even if the driveway is closer than one foot from the property line or if the driveway approach or driveway flare extends over the property line extended to the curb. On a parcel of property used for nonresidential purposes, no driveway approach shall be located within five feet of the property line, or within 10 feet of any other driveway approach as measured at the property line.

(F) Restoration by Village. In the event that the Village removes any portion of a driveway approach constructed pursuant to this Section 6-1-5 in connection with any maintenance, construction, or repair activities within the right-of-way, the Village shall only be required to replace the driveway approach with one or more materials approved pursuant to Section 6-1-5(E)(1) of this Code.

Subject Property: N/A (Text Amendment)

Requested Action: Text amendment to correct use category reference within the Off-Street Parking Schedule table Article VII Section 7.10 and Table 7.10.01.

Nature of Request: A text amendment is proposed to correct incorrect and inconsistent land use reference to Office, Medical (In-Patient Only) as found in the Off-Street Parking Schedule.

Petitioner: Village Board

Summary
Zoning Ordinance Section 7.10 contains regulations for off-street parking of the various land use categories. The land use categories reflect those uses identified in the Permitted and Special Uses found in Table 4.01.1 of the Zoning Ordinance. The proposed text amendment relates to medical offices. The land use table differentiates between medical offices largely based on whether the patient is treated the same day or if overnight stay is needed.

In administering the Ordinance staff has noted that the land use reference, Office, Medical (in-patient only) as found in the Off-Street Parking Schedule is incorrect. In-patient care is commonly defined as care in which someone is admitted to a clinic or hospital for a period of time. The Lincolnwood Zoning Ordinance defines this type of land use as a Medical Clinic or a Hospital. The Off-Street Parking Schedule Table includes parking requirements for these uses. The same table however does not contain any off-street parking standard for Office, medical, outpatient only. This use is included in the Permitted and Special Uses Table however there is no parking standard in the Off-Street Parking Schedule. As a result, staff has determined that the land use reference in the Off-Street Parking Schedule; Office, Medical (in-patient only) is an error and the intended land use category should read Office, Medical (out-patient only). This modification would bring the off-street parking table and the land use table into greater consistency.

(Ordinance No. 2009-2867, 2011-2948, and 2012-2987)

**Note 1:** Ground floor residential uses (multi-family or townhomes) are only permitted within the Business/Residential Transition Area of the Lincoln Avenue Overlay District. See Section 8.06 Additional Standards for the Business/Residential Transition Area of the Overlay District.

**Note 2:** Restrictions on commercial uses within the Business/Residential Transition Area may apply (See Section 4.07 (2) and 8.06 of the Lincoln Avenue Overlay District for additional standards).

**Note 3:** Upper floor residential uses are only permitted within the Lincoln-Pratt-Crawford hub, Devon-Lincoln hub and the Business/Residential Transition Area of the Lincoln Avenue Overlay District. See Section 8.13 and Section 8.14 of the Overlay District.

**Note 4:** An Assisted Living Facility use cannot be established on a lot less than ten hundred feet (100') in width and one (1) acre in area.

**Note 5:** A Nursing and Personal Care Facility use cannot be established on a lot of less than five (5) acres in area.

**Note 6:** A Catering business or activity may hold on-premise "open house" or special event tasting which do not exceed twelve (12) per year. If such "open house" or special event tasting or any other activity of the Caterer, Catering Establishment or Catering Service involve the serving of alcoholic beverages, the business or activity must be licensed by the Village as an alcoholic liquor retailer and must comply with all state statutes, state regulations, Village Ordinances and regulations, and the rules and regulations established by the Local Liquor Control Commissioner governing the dispensation of alcoholic beverages.

**Note 7:** Community Residences are allowed in all Residential Zoning Districts only in compliance with, and pursuant to, the Reasonable Accommodation provisions and procedures set forth in Section 4.06(3) of this Zoning Ordinance.

(Ordinance No 2011-2948)
Staff Report
Plan Commission
February 6, 2013

Subject Property: N/A (Text Amendment)

Requested Action: Text amendment to Section 8.05 of the Zoning Ordinance pertaining to procedure for approval of a Planned Unit Development.

Nature of Request: A text amendment to consider requiring applications for Final Planned Unit Development to be heard by the Plan Commission at a public hearing.

Petitioner: Village Board

Summary
Section 8.05 of the Zoning Ordinance outlines the full procedure for review of Planned Unit Development applications. The current process is as follows:

1. Step 1: Pre-Application Procedure – A mandatory process that includes a Pre-Application Conference with the Board of Trustees. This is to take place at a public meeting however it is not a fully noticed public hearing.

2. Step 2: Conceptual Plan Procedure – An optional process in which the Plan Commission conducts an informal review at a regularly scheduled public meeting. Public meetings are not a fully noticed public hearing.

3. Step 3: Preliminary Approval Procedure – A mandatory process which is the public hearing held by the Plan Commission to consider the Preliminary PUD application. This meeting is held in accordance with all the requirements of notification for a public hearing.

4. Step 4: Final Approval Procedure – A required process to consider the Final PUD application to ensure consistency with the Preliminary PUD approval. Consideration of the Final PUD application is made by the Plan Commission at a regularly scheduled public meeting. Public meetings are not fully noticed public hearings.

Staff seeks consideration of a text amendment to modify the Final PUD approval process to require a fully noticed public hearing. Final PUD review is not necessarily routine in nature and as a result staff seeks the Plan Commission’s input on requiring Final PUD approval to be a public hearing. If requested, staff will conduct research of nearby communities to determine best practice.
Subject Property: N/A (Text Amendment)

**Requested Action:** Text amendment to the Article XI of the Zoning Ordinance pertaining to Glare Reduction for Signs.

**Nature of Request:** A text amendment to consider re-organizing the Glare Reduction requirements pertaining to all signs in the Village into one Section of the Sign Chapter of the Zoning Ordinance for easier use and understanding of the requirements relative to Sign Glare.

**Petitioner:** Village Board

**Summary**
Recently the Village amended the sign regulations to incorporate glare reduction requirements. The regulations were added to various section of Section XI of the Zoning Ordinance. Staff has found in using the Sign Chapter that the various references along with pre-existing references to glare are cumbersome to reference. These different references may also be difficult for an independent user of the Zoning Ordinance to decipher.

Staff recommends re-organizing the glare standards into one section. Staff has not prepared at this time the recommended language or section reference. However, at the February 6th Plan Commission meeting staff seeks concurrence with the re-organizing approach briefly outlined. If there is general agreement, staff recommends this matter be continued to a future Plan Commission meeting at which time staff will be prepared to present a specific recommendation.
